Roman Builders A Study In Architectural Process:

Roman Builders Rabun Taylor, 2003-01-09 How were the architectural ideas behind great Roman building projects carried out in practice Each major phase of the building process is considered in the building histories of the Baths of Caracalla the Pantheon the Coliseum and the great temples at Baalbek New hypotheses are advanced on the raising of monolithic columns the construction sequence of the Coliseum and the vaulting of the Pantheon The illustrations include archival and original photographs as well as numerous explanatory drawings **The Colosseum** Keith Hopkins, Mary Beard, 2005-11-14 Byron and Hitler were equally entranced by Rome's most famous monument the Colosseum Mid Victorians admired the hundreds of varieties of flowers in its crannies and occasionally shuddered at its reputation for contagion danger and sexual temptation Today it is the highlight of a tour of Italy for more than three million visitors a year a concert arena for the likes of Paul McCartney and a national symbol of opposition to the death penalty Its ancient history is chock full of romantic but erroneous myths There is no evidence that any gladiator ever said Hail Caesar those about to die and we know of not one single Christian martyr who met his finish here Yet the reality is much stranger than the legend as the authors two prominent classical historians explain in this absorbing account We learn the details of how the arena was built and at what cost we are introduced to the emperors who sometimes fought in gladiatorial games staged at the Colosseum and we take measure of the audience who reveled in or opposed these games The authors also trace the strange afterlife of the monument as fortress shrine of martyrs church and glue factory Why are we so fascinated with this arena of death *Divine Institutions* Dan-el Padilla Peralta, 2023-06-06 How religious ritual united a growing and diversifying Roman Republic Many narrative histories of Rome's transformation from an Italian city state to a Mediterranean superpower focus on political and military conflicts as the primary agents of social change Dan el Padilla Peralta places religion at the heart of this transformation showing how religious ritual and observance held the Roman Republic together during the fourth and third centuries BCE a time when the Roman state significantly expanded and diversified Blending the latest advances in archaeology with innovative sociological and anthropological methods this incisive book overcomes many of the evidentiary hurdles that for so long have impeded research into this pivotal period in Rome's history Divine institutions reconstructs the scale and social costs of these religious practices and reveals how religious observance emerged as an indispensable strategy for bringing Romans of many different backgrounds to the center both physically and symbolically Back cover
