*Roman Corinth* Donald W. Engels, 1990-05-29 In the second century A D Corinth was the largest city in Roman Greece A center of learning culture and commerce it served as the capital of the senatorial province of Achaëa and was the focus of apostle Paul s missionary activity Donald Engels s important revisionist study of this ancient urban area is at once a detailed history of the Roman colony and a provocative socioeconomic analysis With Corinth as an exemplar Engels challenges the widely held view that large classical cities were consumer cities innocent of the market forces that shape modern economies Instead he presents an alternative model the service city Examining a wealth of archaeological and literary evidence in light of central place theory and using sound statistical techniques Engels reconstructs the human geography of the Corinthia including an estimate of the population He shows that given the amount of cultivatable land rents and taxes levied on the countryside could not have supported a highly populated city like Corinth Neither could its inhabitants have supported themselves directly by farming Rather the city constituted a thriving market for domestic regional and overseas raw materials agricultural products and manufactured goods at the same time satisfying the needs of those who plied the various land and sea routes that converged there Corinth provided key governmental and judicial services to the province of Achaëa and its religious festivals temples and monuments attracted numerous visitors from all corners of the Roman world In accounting for the large portion of residents who participated in these various areas outside of the traditional consumer model Engels reveals the depth and sophistication of the economics of ancient cities Roman Corinth is a much needed critique of the currently dominant approach of ancient urbanism It will be of crucial interest to scholars and students in classics ancient history and urban studies [Ancient Economy](#) Walter Scheidel, 2019-08-07 No detailed description available for The Ancient Economy

Kloppenborg, 2019-11-26 A groundbreaking investigation of early Christ groups in the ancient Mediterranean As an urban movement the early groups of Christ followers came into contact with the many small groups in Greek and Roman antiquity Organized around the workplace a deity a diasporic identity or a neighborhood these associations gathered in small face to face meetings and provided the principal context for cultic and social interactions for their members Unlike most other groups however about which we have data on their rules of membership financial management and organizational hierarchy we have very little information about early Christ groups Drawing on data about associative practices throughout

the ancient world this innovative study offers new insight into the structure and mission of the early Christ groups John S Kloppenborg situates the Christ associations within the broader historical context of the ancient Mediterranean and reveals that they were probably smaller than previously believed and did not have a uniform system of governance and that the attraction of Christ groups was based more on practice than theological belief Creating Sacred Places in First Century Corinth Alisha N. Paddock, 2025-06-29 This book applies spatial theories from human and cultural geography to the archaeological remains of Ancient Corinth in order to consider how sacred places could have been created in the first century Building on Philip Sheldrake's theory among others the book defines sacred place as a space with significance Significance is found in the group's spiritual history their identity and the proper behaviours required to keep the group remaining a group The book further argues that if any of these elements of place are not recognized nor upheld the group risks becoming placeless **Trade, Traders and the Ancient City** Helen Parkins, Christopher Smith, 2005-06-20 Trade exchange and commerce touched the lives of everyone in antiquity especially those who lived in urban areas Trade Traders and the Ancient City addresses the nature of exchange and commerce and the effects it had in cities throughout the ancient world from the Bronze Age Near East to late Roman northern Italy Trade Traders and the Ancient City employs the most recent archaeological papyrological epigraphic and literary evidence to present an innovative and timely analysis of the importance and influence of trade in the ancient world
