Roman Government's Response to Crisis, A.D. 235-337 Ramsay MacMullen, 1976 The Visigoths

Ferreiro, 2021-09-20 The study of the Visigoths continues to be one of the most actively researched topics in Late Antique Studies As might be expected the vast majority of the work has been carried out in Europe and especially by scholars from the Iberian Peninsula There has always been a need however to make much of this research accessible to English language specialists and the wider academic community in Late Antiquity Studies Too often Late Antiquity Studies tend to ignore or marginalize the Iberian Peninsula and this may be due in part to the lack of access to this scholarship in the English language This volume of essays has as one of its goals to ameliorate such a deficiency The scholars who participated in this volume are both from Europe and North America They also represent scholars who are well known and those who are establishing distinguished scholarly reputations Although thematically the essays do not exhaust the broad nature of Visigothic studies they do nevertheless offer an impressive array of topics Coverage includes research on Visigothic identity in Gaul regional studies on Galicia and Lusitania anti-Semitism in Visigothic law the political grammar of Ildephonsus of Toledo monasticism and liturgy numismatics Roman Visigothic pottery in Baetica urban and rural archaeology and Gothic consciousness among Mozarab communities **The Boundaries of Europe** Pietro Rossi, 2015-04-24 Europe's boundaries have mainly been shaped by cultural religious and political conceptions rather than by geography This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization or the end of the explicit endeavor to Europeanize the world From the decline of the Roman Empire to the polycentrism of today's world the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from mare nostrum to a frontier between nations Scandinavia eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration migratory movements cultural exchanges and war The Boundaries of Europe edited by Pietro Rossi is the first installment in the ALLEA book series Discourses on Intellectual Europe which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region *The Waves of Time* K. R. Dark, 2016-10-06 Since the end of the Cold War analysts of international politics have given much greater attention to issues of change It has become increasingly clear to specialists from many fields that any understanding of large scale political change must encompass far longer timescales than has been usual in the study of world politics and must incorporate multi disciplinary perspectives This book evaluates and draws on relevant theoretical approaches from other disciplines such as sociology economics geography history anthropology and archaeology as well as evolutionary theory and the mathematical study of complexity Using an epistemological framework Dark sets out a theory of long term world political change the theory of Macrodynamics This is then applied to historical anthropological and archaeological data to explain the changing forms of political organization from

the earliest human societies to the late twentieth century The resulting analysis is a reinterpretation of the processes of global political change in the past and present This in turn opens new areas of enquiry in the study of international relations and has profound implications for how we understand the changing world of today **Routledge Handbook of the History of Sustainability** Jeremy L. Sustainability or Collapse? Robert Costanza, Lisa J. Graumlich, Will Steffen, 2011-01-21 Scholars from a range of disciplines develop an integrated human and environmental history over millennial centennial and decadal time scales and make projections for the future Human history as written traditionally leaves out the important ecological and climate context of historical events But the capability to integrate the history of human beings with the natural history of the Earth now exists and we are finding that human environmental systems are intimately linked in ways we are only beginning to appreciate In Sustainability or Collapse researchers from a range of scholarly disciplines develop an integrated human and environmental history over millennial centennial and decadal time scales and make projections for the future The contributors focus on the human environment interactions that have shaped historical forces since ancient times and discuss such key methodological issues as data quality Topics highlighted include the political ecology of the Mayans the effect of climate on the Roman Empire the revolutionary weather of El Niño from 1788 to 1795 twentieth century social economic and political forces in environmental change scenarios for the future and the accuracy of such past forecasts as The Limits to Growth

A. Talbert, Fred S. Naiden, 2017-04-27 Mercury s Wings Exploring Modes of Communication in the Ancient World is the first ever volume of essays devoted to ancient communications Comparable previous work has been mainly confined to articles on aspects of communication in the Roman empire This set of 18 essays with an introduction by the co editors marks a milestone therefore that demonstrates the importance and rich further potential of the topic The authors who include art historians Assyriologists Classicists and Egyptologists take the broad view of communications as a vehicle not just for the transmission of information but also for the conduct of religion commerce and culture Encompassed within this scope are varied purposes of communication such as propaganda and celebration as well as profit and administration Each essay deals with a communications network or with a means or type of communication or with the special features of religious communication or communication in and among large empires The spatial temporal and cultural boundaries of the volume take in the Near East as well as Greece and Rome and cover a period of some 2 000 years beginning in the second millennium BCE and ending with the spread of Christianity during the last centuries of the Roman Empire in the West In all about one quarter of the essays deal with the Near East one quarter with Greece one quarter with Greece and Rome together and one quarter with the Roman empire and its Persian and Indian rivals Some essays concern topics in cultural history such as Greek music and Roman art some concern economic history in both Mesopotamia and Rome and some concern traditional historical topics such as diplomacy and war in the Mediterranean world Each essay draws on recent work in the theory of communications *Supply-Side Sustainability* Timothy F. H. Allen, Joseph A. Tainter, Thomas W. Hoekstra, 2003-02-19 While environmentalists insist that lower rates of consumption of natural resources are essential for a sustainable future many economists dismiss the notion that resource limits act to constrain modern creative societies The conflict between these views tinges political debate at all levels and hinders our ability to plan for the future Supply Side Sustainability offers a fresh approach to this dilemma by integrating ecological and social science approaches in an interdisciplinary treatment of sustainability Written by two ecologists and an anthropologist this book discusses organisms landscapes populations communities biomes the biosphere ecosystems and energy flows as well as patterns of sustainability and collapse in human

societies from hunter gatherer groups to empires to today's industrial world. These diverse topics are integrated within a new framework that translates the author's advances in hierarchy and complexity theory into a form useful to professionals in science, government, and business. The result is a much needed blueprint for a cost-effective management regime, one that makes problem-solving efforts themselves sustainable over time. The authors demonstrate that long-term cost-effective resource management can be achieved by managing the contexts of productive systems rather than by managing the commodities that natural systems produce.

Barbarian or Greek? Stamenka Antonova, 2018-11-01. In her book *Barbarian or Greek: The Charge of Barbarism and Early Christian Apologetics*, Stamenka Antonova examines different aspects of the charge of barbarism in the Greek and Latin Christian apologetic texts of the 4th centuries and the various responses to it by the early Christians. The author demonstrates that the charge of barbarism encompasses a broad range of meanings such as low social class, inadequate education, immorality, criminal activity, political treason, as well as foreign ethnicity and language. In addition to contextualizing the charge of barbarism in ancient rhetorical practices, the author also applies literary criticism and post-colonial theory to shed light on the concept of the barbarian as an ideological rhetorical tool for othering, marginalization, and persecution in the Roman Empire.

Law and Society in the Age of Theoderic the Great Sean D. W. Lafferty, 2013-07-25. This book explores the evolution of Roman law and society in Italy from 493 with the proclamation of the Ostrogoth Theoderic the Great as king until about 554 when the eastern Emperor Justinian was able to re-establish imperial authority in the region. Drawing upon evidence from a variety of legal and historical sources, it investigates how Theoderic and his successors attempted to govern the peninsula in the wake of foreign invasions, the collapse of civic administration, the break-up of the Mediterranean economy, and the emergence of new forms of religious and secular authority. It challenges long-held assumptions as to just how peaceful, prosperous, and Roman-like Theoderic's Italy really was. Its primary focus is the *Edictum Theoderici*, a significant but largely overlooked document that offers valuable historical insights into the complex and sometimes contested social, political, and religious changes that marked Italy's passage from Antiquity into the Middle Ages.

Menander Malcolm Heath, 2004-07-29. This book undertakes a fundamental assessment of Menander of Laodicea, Menander the Rhetor, and of the nature and functions of rhetoric in later antiquity, second to fifth centuries AD. It examines Menander's fragments collected here for the first time in detail, showing that he was primarily an expert on judicial and deliberative oratory. A source-critical analysis of the Demosthenes scholia shows that his influential commentary on Demosthenes can be partially reconstructed. It explores the educational practices of the rhetorical schools and shows that the skills which they taught still had a direct application in the subsequent careers of the rhetoricians' pupils.

Policymaking Under Adversity Yehezkel Dror, 2017-09-29. This groundbreaking study systematically treats recent policymaking trends, starting with a reconsideration of salient theoretical issues of policymaking and its study and culminating with a survey of current policy-related predicaments in various countries. Dror proposes that the task for social science research is to uncover

underlying causes of policymaking inadequacies Standard research methods Dror states have been unable to uncover the realities of important decisions made inside governments In order to gain an understanding of pressing predicaments he believes that policymakers need to examine the foundations of contemporary practices of present assumptions and that they need a multiplicity of approaches to policymaking After prescribing a set of requirements that policymaking must satisfy in order to adequately respond to challenges Dror posits several improvements needed in education and in policy decision making The book concludes with an extensive bibliography including numerous important German works not found in other English language studies This book supplements the earlier basic theory and models propounded in Dror's Public Policymaking Reexamined by dealing with current trends As a guide to public policy literature and related works it will be invaluable to students and practitioners

The Rush to Policy Peter William House, Roger Don Shull, Rush to Policy explores the appropriate role of technical analysis in policy formulation The authors ask when and how the use of sophisticated analytic techniques in decision making benefits the nation They argue that these techniques are too often used in situations where they may not be needed or understood by the decision maker where they may not be to answer the questions raised but are nonetheless required by law House and Shull provide an excellent empirical base for describing the impact of politics on policies policy analysis and policy analysts They examine cost benefit analysis risk analysis and decision analysis and assess their ability to substitute for the current decision making process in the public sector They examine the political basis of public sector decision making how individuals and organizations make decisions and the ways decisions are made in the federal sector Also they discuss the mandate to use these methods in the policy formulation process The book is written by two practicing federal policy analysts who in a decade of service as policy researchers developed sophisticated quantitative analytic and decision making techniques They then spent several years trying to use them in the real world Success and failures are described in illuminating detail providing insight not commonly found in such critiques The authors delineate the interaction of politics and technical issues Their book describes policy analysis as it is not how it ought to be Peter W House is the director of policy research and analysis at the National Science Foundation He is the author of ten books on multidisciplinary science and technology policy research and analyses in government private and university sectors including The Art of Public Policy Analysis and with Roger D Shull Regulatory Reform Politics and the Environment and Regulations and Science Management of Research on Demand Roger D Shull is a senior analyst at the Division of Policy Research and Analysis National Science Foundation
