Cupach,Brian H. Spitzberg,2010-09-13 Focuses on the paradoxical dialectical and mystifying facets of human interaction not merely to elucidate dysfunctional relationship phenomena but to help readers explore and understand it in relation to a broader understanding about relationships This volume is of interest to relationship researchers in social psychology and sociology *The Experience and Expression of Uncertainty in Close Relationships* Jennifer Theiss,2018 This book summarizes theoretical and empirical advancements in research on uncertainty in close relationships and recommends practical applications and extensions Military Deployment and its Consequences for Families Shelley MacDermid Wadsworth,David S. Riggs,2013-11-23 War related separations challenge families in many ways The worry and uncertainty associated with combat deployments provokes anxiety in family members left at home Lengthy separations may challenge the

personal social and economic coping resources of families at home In this war thanks to medical advances many service members who previously would have died of their injuries are returning home to live long although altered lives As a result families are facing the additional challenge of assisting service members who have experienced amputation traumatic brain injury and psychological wounds These challenges are faced not only by service members in the active component of the armed forces but also by service members in the National Guard and Reserves In response the Department of Defense has launched unprecedented efforts to support service members and families before during and after deployment in all locations of the country as well as in remote locations These support efforts are focused not only on medical care but also mental health care and logistical support Research about families and war tends to move forward in fits and starts associated with major conflicts and there is currently an increasing flow of family research moving into the scientific domain Military Families and the Aftermath of Deployment focuses heavily on the aftermath of deployment for families It is the first compilation of such chapters released in relation to the wars in Iraq and Afghanistan and includes contributions from leading researchers from diverse disciplines and arenas including universities the Veterans Administration and the Department of Defense as well as international researchers from Canada and Croatia among others This work will be of use to graduate students and researchers in family studies social work counseling military science psychology and sociology Arcadian America Aaron Sachs, 2013-01-08 Perhaps America's best environmental idea was not the national park but the garden cemetery a use of space that quickly gained popularity in the mid nineteenth century Such spaces of repose brought key elements of the countryside into rapidly expanding cities making nature accessible to all and serving to remind visitors of the natural cycles of life In this unique interdisciplinary blend of historical narrative cultural criticism and poignant memoir Aaron Sachs argues that American cemeteries embody a forgotten landscape tradition that has much to teach us in our current moment of environmental crisis Until the trauma of the Civil War many Americans sought to shape society into what they thought of as an Arcadia not an Eden where fruit simply fell off the tree but a public garden that depended on an ethic of communal care and whose sense of beauty and repose related directly to an acknowledgement of mortality and limitation Sachs explores the notion of Arcadia in the works of nineteenth century nature writers novelists painters horticulturists landscape architects and city planners and holds up for comparison the twenty first century's and his own tendency toward denial of both death and environmental limits His far reaching insights suggest new possibilities for the environmental movement today and new ways of understanding American history **Engaging Theories in Interpersonal**

Inscrutable Malice Jonathan A. [Finding the Valuable Person](#) Chris Steed, 2023-06-13 *Finding the Valuable Person* proposes a new form of therapy The big theme is that experiences of being devalued when we are not seen or heard

diminished or suffer indignities evoke responses that show up in distress clients bring These reactions show a prime human need for our personhood to be valuable and validated that generates soul hungers for connection desire significance and hope that are largely unconscious It is a fundamental drive that can be explored with clients in the way we are relational embodied makers of meaning and respond to agency and dignity This constitutes four domains of the REMA approach to therapy developed in this book Every counseling approach has its presuppositions most describe the human person as an individual entity separated from social context REMA pays attention to both REMA is theologically attuned but also incorporates realities such as gender and race that have reshaped society profoundly For the alignment of biblical faith and counseling psychology it is profoundly important to be attuned in both directions REMA is not only an innovative theoretical approach it is a working model currently offered in a community setting but of wider application Anyone can use it
