Metaphors of Confinement Monika Fludernik, 2019-08-13 Metaphors of Confinement The Prison in Fact Fiction and Fantasy offers a historical survey of imaginings of the prison as expressed in carceral metaphors in a range of texts about imprisonment from Antiquity to the present as well as non penal situations described as confining or restrictive These imaginings coalesce into a carceral imaginary that determines the way we think about prisons just as social debates about punishment and criminals feed into the way carceral imaginary develops over time Examining not only English language prose fiction but also poetry and drama from the Middle Ages to postcolonial particularly African literature the book

juxtaposes literary and non literary contexts and contrasts fictional and nonfictional representations of imprisonment and discussions about the prison as institution and experiential reality It comments on present day trends of punitivity and foregrounds the ethical dimensions of penal punishment The main argument concerns the continuity of carceral metaphors through the centuries despite historical developments that included major shifts in policy such as the invention of the penitentiary The study looks at selected carceral metaphors often from two complementary perspectives such as the home as prison or the prison as home or the factory as prison and the prison as factory The case studies present particularly relevant genres and texts that employ these metaphors often from a historical perspective that analyses development through different periods

Asexualities Karli June Cerankowski, Megan Milks, 2014-03-14 What is so radical about not having sex To answer this question this collection of essays explores the feminist and queer politics of asexuality Asexuality is predominantly understood as an orientation describing people who do not experience sexual attraction In this multidisciplinary volume the authors expand this definition of asexuality to account for the complexities of gender race disability and medical discourse Together these essays challenge the ways in which we imagine gender and sexuality in relation to desire and sexual practice Asexualities provides a critical reevaluation of even the most radical queer theorizations of sexuality Going beyond a call for acceptance of asexuality as a legitimate and valid sexual orientation the authors offer a critical examination of many of the most fundamental ways in which we categorize and index sexualities desires bodies and practices As the first book length collection of critical essays ever produced on the topic of asexuality this book serves as a foundational text in a growing field of study It also aims to reshape the directions of feminist and queer studies and to radically alter popular conceptions of sex

and desire Including units addressing theories of asexual orientation the politics of asexuality asexuality in media culture masculinity and asexuality health disability and medicalization and asexual literary theory Asexualities will be of interest to scholars and students in sexuality gender sociology cultural studies disability studies and media culture *Restorations of Empire in Africa* Samuel Aghamu,2024-03-19 The histories of Europe and Africa are closely intertwined At times this closeness has been emphasized at other times suppressed and denied Since the nineteenth century European imperial powers have carved up the continent of Africa among themselves drawing borders and charting shorelines in the process inventing Africa This was a project anchored in ancient Greek and Roman representations of Africa For Italy colonialism in Africa was a matter of consolidating its project of national unification nominally completed in 1870 with the capture of Rome By asserting its position as an imperial power the young nation of Italy hoped to join the club of European nation states and in so doing be rid of the perception that it was a country somewhere in between Europe and Africa Yet Italy s colonial endeavour in Africa was also a project with deep historical meaning Italy posed its imperial project in Africa as a national return to territory which was rightfully Italian Italian ideologues of imperialism based this claim on the history of Roman history on the continent When Italian soldiers disembarked on the beaches of Libya during Italy s invasion of 1911 1912 and came across the ruins of Roman imperialism they were according to prominent cultural and political figures in Italy rediscovering the traces of their ancestors Yet when Italian imperial ambitions set their sights on East Africa regions that had not been conquered by Rome how could Italy nevertheless shape its imperial project in the image of ancient Rome This book charts this story Beginning with Italy s first imperial endeavours on the African continent in the last decades of the nineteenth century and continuing right through to Italy s current attitudes towards Africa this book argues that empire in Africa was a central aspect of Italian nation building and that this was a project which anchored itself in memories of ancient Rome in Africa Although Fascism s invasion of Ethiopia 1935 1936 is the best known moment of Italian imperialism in Africa this book shows that Italian imperialism modelled on ancient Rome has a history which long predates Mussolini s movement and has a legacy which continues to be acutely felt **The Heroic Ideal** M. Gregory Kendrick,2014-01-10 The word hero seems in its present usage an all purpose moniker applied to everyone from Medal of Honor recipients to celebrities to comic book characters This book explores the Western idea of the hero from its initial use in ancient Greece where it identified demigods or aristocratic mortal warriors through today Sections examine the concept of the hero as presented in the ancient medieval and modern worlds Special attention is paid to particular heroic types such as warriors martyrs athletes knights saints scientists rebels secret servicemen and even anti heroes This book also reconstructs how definitions of heroism have been inextricably linked to shifts in Western thinking about religion social relations political authority and ethical conduct Instructors considering this book for use in a course may request an examination copy here
