telling her daughter about her bricklaying career to a father sharing his contributions to the space race as an aeromedical field tester these stories are poignant and heartfelt intergenerational explorations into the journeys people take to find the jobs they are meant to do Some found their paths at a very young age others upturned their lives to change careers later in life All discovered meaningful jobs where they could use their passions to find purpose in every day We meet a man from the barrios of Texas whose harrowing experiences in a family of migrant farmers inspired him to become a public defender We meet a longtime waitress who takes pride in making regulars and newcomers alike feel at home in her Nashville diner We meet a young man on the South Side of Chicago who became a teacher in order to help at risk teenagers like the ones who killed his father get on the right track We meet a woman from Little Rock who helps former inmates gain the skills and confidence they need to rejoin the workforce Together they demonstrate how work can be about much more than just making a living how we may find our callings in unusual places and how chasing dreams can transform our lives An essential contribution to the beloved StoryCorps collection filled with many stories that have never been broadcast or published before Callings is a tribute to rewarding work that continues to inspire everyone from students about to start their first jobs to retirees seeking their next chapter

Into the Extreme Valerie Olson, 2018-05-22 The first book length in depth ethnography of U S human spaceflight What if outer space is not outside the human environment but rather defines it This is the unusual starting point of Valerie Olson s *Into the Extreme* revealing how outer space contributes to making what counts as the scope and scale of today s natural and social environments With unprecedented access to spaceflight worksites ranging from astronaut training programs to life science labs and architecture studios Olson examines how U S experts work within the solar system as the container of life and as a vast site for new forms of technical and political environmental control Olson s book shifts our attention from space s political geography to its political ecology showing how scientists physicians and engineers across North America collaborate to build the conceptual and nuts and bolts systems that connect Earth to a specifically ecosystemic cosmos This cosmos is being redefined as a competitive space for potential economic resources social relations and political strategies Showing how contemporary U S environmental power is bound up with the production of national technical and scientific access to outer space *Into the Extreme* brings important new insights to our understanding of modern environmental history and politics At a time when the boundaries of global ecologies and economies extend far below and above Earth s surface Olson s new analytic frameworks help us understand how varieties of outlying spaces are known made and organized as kinds of environments whether terrestrial or beyond
