industry landscape management will help to establish the ecosystem's processes and environmental functioning. There are several post industrial sites in Europe where the wildlife areas developed due to natural processes are becoming wildlife hotspots in densely populated urban industry areas. In this respect many of the oligotrophic mineral terrestrial wetland and water habitats of anthropogenic origin should not be categorized as environmentally dangerous and undergo economic utility focused reclamation. Facing the actual environmental constraints of the Anthropocene Epoch the book's chapters presenting the natural basics and prerequisites of the environmental ecosystem mosaics will be interesting for a broad range of environmentalists, scientists and students, miners, economists and sociologists.
