Roopnarine,2016-01-11 This comprehensive reference analyzes psychological and anthropological studies concerning child and adolescent development across cultures digging into often forgotten topics like street children child soldiers and parenting in war torn countries Traditionally research on child and adolescent development has focused on American youth inadvertently neglecting 96 percent of the world s children This all encompassing volume introduces global perspectives on young people across the globe focusing on such topics as parenting and childcare gender roles violence against girls adolescence in poor and rich countries and developmental psychopathology across cultures Recently updated the second edition includes the latest findings in the field additional content and new photos and charts With contributions from leading psychological and anthropological scholars chapters address worldwide changes in children s lives parent child relationships sibling relationships immigrant children and their families and adolescents in both industrialized and developing nations A special section discusses children living in difficult circumstances including street children child soldiers global nomads and children suffering from various internalizing and externalizing disorders This book is the perfect introduction to the latest trends in developmental psychology Nature And Determinants of Socio-Moral Development: Theories, Methods and Applications Alessandra Geraci,Paola Rigo,Laura Franchin,Aner Govrin,2023-11-09

Learning to Live Together David A. Hamburg,Beatrix A. Hamburg,2004 With a view to deepening our understanding of sources of hatred and prejudice this book uses a developmental and evolutionary perspective to explore and explain the process by which our beliefs are conveyed to the youngest members of society Discussing the psychological obstacles to peaceful relations between groups the authors focus on the developmental processes by which we can work to diminish ethnocentrism prejudice and hatred which children learn from a very early age Until now scholarship and practice in international relations have gravely neglected crucial psychological aspects of these terrible problems and have not yet explored the educational opportunities related to them Addressing these promising lines of inquiry and innovation this book fosters a more humane and less violent development in childhood and adolescence Educators religious leaders developmental and social psychologists will find this a valuable resource as will a socially concerned segment of the public who are looking for practical ways to work for peace **Autism**

Spectrum Disorders Tim Williams,2011-09-06 Autism spectrum disorders are a major topic for research The causes are now thought to be largely genetic although the genes involved are only slowly being traced The effects of ASD are often devastating and families and schools have to adapt to provide the best for people with ASD to attain their potential This book describes some of the interventions and modifications that can benefit people with ASD **Socioemotional Development**

in the Toddler Years Celia A. Brownell,Claire B. Kopp,2010-06-03 This volume explores the key developmental transitions that take place as 1 to 3 year olds leave infancy behind and begin to develop the social and emotional knowledge skills and regulatory abilities of early childhood Leading investigators examine the multiple interacting factors that lead to socioemotional competence in this pivotal period covering both typical and atypical development Presented is innovative research that has yielded compelling insights into toddlers relationships emotions play communication prosocial behavior self control autonomy and attempts to understand themselves and others The final chapter presents a systematic framework for socioemotional assessment *Moral Psychology* Daniel K Lapsley,2018-10-08 This book a review of the psychological literatures with allied traditions in ethics emphasizes parenting and educational strategies for influencing moral behavior reasoning and character development and charts a line of research for the post Kohlbergian era in moral psychology

Infancy to Early Childhood Robert N. Emde,John K. Hewitt,2001-04-19 Behavioral genetics is a fast growing multidisciplinary field which attempts to explain the influence of genetic and environmental factors on behavior through the lifespan The preferred investigative technique for teasing out the differences between genetics and the environment is the longitudinal twin study This book is the first complete publication from the MacArthur Longitudinal Twin Study MALTS that is by far the most ambitious and comprehensive longitudinal twin study to date The goal of such an in depth study was not to merely provide thorough descriptions of developmental change between the ages of one and three years but to offer an original theoretical framework that explains how change occurs in different domains and how genetics and the environment influence those changes This rigorous study will set the agenda for developmental psychology and behavioral genetics for decades to come
