Subcommittee on Europe, Eurasia, and Emerging Threats, 2017 **Dealing with the Russians** Andrew Monaghan, 2019-05-29 How to handle Russia This question has

become ever more prominent as the Euro Atlantic community's relations with Russia languish in systemic crisis with dialogue suspended reciprocal sanctions in place and proxy wars raging The wars in Ukraine and Syria accusations of Russian interference in domestic politics and the attempted murder of the Skripals on UK soil have all contributed to soaring tension in the relationship Yet faced with this array of serious challenges Euro Atlantic thinking about Russia remains stuck in twentieth century rhetoric trapped by misleading abstract labels and unsure whether to engage Moscow in dialogue or enhance deterrence and collective defence Instead of thinking in these terms leading Russia expert Andrew Monaghan argues that we must devise a new grand strategy for dealing with the Russians Examining the ongoing Euro Atlantic debate over Russia and framing Moscow's own position towards the West he sets out the foundations of a forward looking strategy one that can accommodate the many complex challenges presented by this new era of competition between Russia Europe and the United States *Russia and China* Aleksei Dmitrievich Voskresenskiĭ, 2003 This study incorporates elements from

MacLean, 2017-11-30 Some of Bill Clinton's most basic foreign policy elements democratic peace the post Cold War peace dividend geopolitics and state society relations are epitomized in the US Russian Highly Enriched Uranium HEU Purchase

Agreement It was one of the most remarkable initiatives of Clinton's presidency but oddly one of the most obscure that still continues under George W. Bush. This agreement illustrates how successfully the US and Russia could work together to reduce global nuclear fears but also how a series of decisions pitted global designs over American domestic interests. Illustrating one of the most compelling decisions Clinton made as President, this remarkable book elucidates the theory of democratic peace and demonstrates a new and more advanced nuclear restraint regime from reduction to elimination. The story behind Clinton's decision has repercussions for our understanding of arms control, foreign policy decision making, and US-Russian relations. This is a book about the intersection of levels of analysis, international security concerns, and domestic political economy and as such is ideal as a supplementary text for advanced courses in security and foreign policy. **The**

Planetary Interest Kennedy Graham, 2003-09-02. This text suggests that contemporary political and institutional arrangements for problem solving based on sovereignty as a principle and the nation state as a decision making unit are not equipped to handle such problems and that concepts and methods of decision making are therefore needed to augment existing ones in dealing with the challenges of the 21st century. Kennedy Graham argues that henceforth the planet and humanity must be considered as a single entity for decision making purposes. He introduces and develops the idea of the planetary interest as a vital conceptual tool to assist citizens and policy makers in understanding emerging global problems and approaching them with global solutions. The book includes contributions from 20 current or former politicians who discuss the particular global problems threatening their countries, looking at the ways in which the planetary interest can help them pursue a legitimate national interest. **China and Russia** Alexander Lukin, 2018-03-16. With many predicting the

end of US hegemony, Russia and China's growing cooperation in a number of key strategic areas looks set to have a major impact on global power dynamics. But what lies behind this Sino-Russian rapprochement? Is it simply the result of deteriorated Russo-US and Sino-US relations, or does it date back to a more fundamental alignment of interests after the Cold War? In this book, Alexander Lukin answers these questions, offering a deeply informed and nuanced assessment of Russia and China's ever closer ties. Tracing the evolution of this partnership from the 1990s to the present day, he shows how economic and geopolitical interests drove the two countries together in spite of political and cultural differences. Key areas of cooperation and possible conflict are explored, from bilateral trade and investment to immigration and security. Ultimately, Lukin argues that China and Russia's strategic partnership is part of a growing system of cooperation in the non-Western world, which has also seen the emergence of a new political community, Greater Eurasia. His vision of the new China-Russia rapprochement will be essential reading for anyone interested in understanding this evolving partnership and the way in which it is altering the contemporary geopolitical landscape.
