Pathogens Crossing Borders Cornelia Knab, 2022-07-29 The increasing globalization of trade travel and transport since the mid 19th century had unwelcome consequences one of them was the spread of contagious animal diseases over greater distances in a shorter time than ever before Borders and national control strategies proved to be insufficient to stop the pathogens Not surprisingly the issue of epizootics epidemics of animals was among the first topics to be addressed by international meetings from the 1860s onwards Pathogens Crossing Borders explores the history of international efforts to contain and prevent the spread of animal diseases from the early 1860s to the years after the Second World War As an innovative contribution to global history and the history of internationalism the book investigates how disease experts politicians and state authorities developed concepts practices and institutional structures at the international level to tackle the spread of animal diseases across borders By following their activities in dealing with a problem area which was and is today of enormous political social public health and economic relevance the book reveals the historical challenges of finding common international responses to complex and pressing global issues for which there are no easy solutions **Sacred**

American Globalization, 1492-1850 Bartolomé Yun-Casalilla, Ilaria Berti, Omar Svriz-Wucherer, 2021-06-28 Following a study on the world flows of American products during early globalization here the authors examine the reverse process By analyzing the imperial political economy the introduction adaptation and rejection of new food products in America as well as of other European Asian and African goods American Globalization 1492 1850 addresses the history of consumerism and material culture in the New World while also considering the perspective of the history of ecological globalization This book shows how these changes triggered the formation of mixed imagined communities as well as of local and regional markets that gradually became part of a global economy But it also highlights how these forces produced a multifaceted landscape full of contrasts and recognizes the plurality of the actors involved in cultural transfers in which trade persuasion and violence were entwined The result is a model of the rise of consumerism that is very different from the ones normally used to understand the European cases as well as a more nuanced vision of the effects of ecological imperialism which was moreover the base for the development of unsustainable capitalism
