Sacred Science Of Numbers:

Sacred Science of Numbers Corinne Heline, 1971 *Sacred Science of Numbers* Corinne Heline, 1981-06-01 **Sacred Science of Numbers** Corinne Heline, 1990-01-01 **Sacred Science of Numbers** Corinne Heline, 1977 *A Study of Numbers* R. A. Schwaller de Lubicz, 1986-10-01

We lack direct consciousness of Space and Time. We can know of them only indirectly by mass force and energy and by the intermediary of phenomena such as may be tested by our five senses. Without direct awareness of Space or Time, human beings lack two senses necessary for the knowledge of all causes. From this imperfection of which we are always being made aware is born our need to simplify. Thus we reduce everything to fundamental properties without paying any attention to the underlying universal organization, the effects of which are all around us. The result is that the science of numbers, the most wonderful guide to the constant creation of the universe, remains an enormous hypothesis so long as its use has not awakened in us the higher consciousness of a universal order. By deepened knowledge of things and their process of becoming, we must come to recognize Numbers as a truth and to experience with our senses the living relation of a cause to an effect, this relation being truer and more real than the effect could ever be.

Published in 1917 under the author's given name of Ren Schwaller, *A Study of Numbers* is the first expression of the teachings we have come to associate with his later and better known name R. A. Schwaller de Lubicz. It is a masterly account of the living universal qualitative and casual reality of numbers. Starting from the irreducible one, Schwaller deals with the unfolding of creation through the cycles of polarization, ideation and formation. Topics covered include numbers, values and relations, the disengagement of numbers, the harmonic basis of numbers, the development of values and the establishment of harmony.

Numerology Made Easy William Mykian, 2011-09-28. This is a book of elementary principles, a primer, a down to earth discussion of Chaldean Numerology, an ancient and exceedingly accurate system of numbers. The Chaldean Science of Numbers reveals secrets and answers that lie within the numerical values, numbers and vibrational patterns of your name and birthdate. Chaldean Numerology says that we have a unique set of numbers which have meanings, and from those meanings we can discover our destiny, purpose, heart's desire, who we are compatible with, how others see us, and much, much more. It provides us the design and blueprint of our life's potential goals and experiences.

Traditional Forms and Cosmic Cycles René Guénon,2003 Ren Gu non 1886 1951 is undoubtedly one of the luminaries of the twentieth century whose critique of the modern world has stood fast against the shifting sands of recent philosophies His oeuvre of 26 volumes is providential for the modern seeker pointing ceaselessly to the perennial wisdom found in past cultures ranging from the Shamanistic to the Indian and Chinese the Hellenic and Judaic the Christian and Islamic and including also Alchemy Hermeticism and other esoteric currents at the same time it directs the reader to the deepest level of religious praxis emphasizing the need for affiliation with a revealed tradition even while acknowledging the final identity of all spiritual paths as they approach the summit of spiritual realization Traditional Forms and Cosmic Cycles is a wide ranging collection of articles that could just as well have been called Fragments of an Unknown History Although they must remain fragments as Gu non did not return to many of these themes again it would have been regrettable to leave such fascinating articles buried in old journals and so this posthumous collection is now offered to Anglophone readers for the first time The book opens with the key article The Doctrine of Cosmic Cycles followed by two pieces on Atlantis and Hyperborea Two sections follow concerned respectively with the Hebrew Tradition and the Egyptian Tradition The former comprises five articles concerned primarily with the Kabbalah and the Science of Numbers and the latter includes three articles on Hermes and the Hermetic Tradition Book reviews are inserted at relevant points To lend the collection coherence no other spiritual Traditions are here represented A list of the Collected Writings of Ren Gu non has been provided for those who wish to investigate Gu non s metaphysical expositions on such topics as Christianity Islam the Greco Latin Traditions Celtism etc
