The Second Long March Peter Kien-Hong YU, 2011-11-03 This work written by an expert in the politics of Mainland China and Taiwan looks at the role the Constitution of the Republic of China has played in the development of Taiwan since 1949 and its potential influence on the People's Republic of China The Chinese Communists conducted the first long march for the sake of the majority of Chinese people with the victory of MAO Zedong In the second long march CHIANG Kai shek and his successors tried to convert the Chinese mainland from a Communist totalitarian system into a democratic prosperous one by relying on the spirit of the Republic of China ROC constitution and by setting itself as a good example in gradually guaranteeing freedom and democracy Needless to say this march is long and difficult The Second Long March challenges other models and theories on the study of the relationship between the ROC Taiwan area and mainland China or the People's Republic of China PRC since China became politically as opposed to legally divided in December 1949 Arguably it is the ROC Constitution that has helped ROC citizens to live in a non Communist or anti Communist political system Actively promoting democracy and freedom on the Chinese mainland neidi can further guarantee the Taiwan area's survival The book will provide valuable scholarship of interest to anyone researching the political history of China and its prospects for democratization

Words and Their

Stories Ban Wang, 2010-10-05 As China joins the capitalist world economy the problems of social disintegration that gave rise to the earlier revolutionary social movements are becoming pressing Instead of viewing the Chinese Revolution as an academic study these essays suggest that the motifs of the Revolution are still alive and relevant The slogan Farewell to Revolution that obscures the revolutionary language is premature In spite of dislocations and ruptures in the revolutionary language to rethink this discourse is to revisit a history in terms of sedimented layers of linguistic meanings and political aspirations Earlier meanings of revolutionary words may persist or coexist with non revolutionary rivals Recovery of the vital uses of key revolutionary words proffers critical alternatives in which contemporary capitalist myths can be contested

Tan,2024-02-15 The Minjian Avant Garde studies how experimental artists in China mixed with brought changes to and let themselves be transformed by minjian the volatile and diverse public of the post Mao era Departing from the usual emphasis on art institutions global markets or artists communities Chang Tan proposes a new analytical framework in the theories of socially engaged art that stresses the critical agency of participants the affective functions of objects and the versatility of the artists in diverse sociopolitical spheres Drawing from hitherto untapped archival materials and interviews with the artists Tan challenges the views of Chinese artists as either dissidents or conformists to the regime and sees them as navigators and negotiators among diverse political discourses and interests She questions the fetishization of marginalized communities among practitioners of progressive art and politics arguing that the members of minjian are often more complex defiant and savvy than the elites would assume The Minjian Avant Garde critically assesses the rise of populism in both art and politics and show that minjian could constitute either a democratizing or a coercive force This book was published with generous support from the George Dewey and Mary J Krumrine Endowment **Deng Xiaoping** Alexander Pantsov,Steven I.

Taylor,Jesse O. Taylor,2011-11-17 Since World War II development projects have invested more than two trillion dollars towards health services poverty alleviation education food security and environmental initiatives around the world Despite these efforts 20% of the world still lives on less than 1 50 a day and the environment within which all live declines dramatically There are clear limits to what further investments at this rate can achieve This book advances the thesis that a more effective and universal foundation for social change and environmental restoration is not money but human energy Using this approach Tibet recovered from being nearly deforested to having over 40% of its land area protected under conservation management Using principles outlined in this book mothers in northeast India implemented a package of life changing actions that halved child mortality They parallel the way New York City has created a citywide conservation program over three and a half centuries Each of these examples is particular to its time and place yet a shared set of principles is at work in all of them Improving the quality of life for a community starts by strengthening successes already operating It involves local knowledge and a relatively simple set of principles tasks and criteria designed to empower communities This highly readable account demonstrates how a comprehensive process for social change harnesses the energy of a community and scales it up with a rising number of participants becoming invested in increasingly high quality work Richly illustrated with photographs and stories of innovative people and programs in communities ranging from Nepal to Afghanistan to the South Bronx it provides practical proven guidelines for creating profound and sustained social change that begins in individual communities and grows to scale
