Garden Allies Frederique Lavoipierre, 2021-09-28 Explains how your garden can be a thriving, balanced community that gives more to your landscape than it takes. Douglas W. Tallamy, author of *The Nature of Oaks* and *Nature's Best Hope*, says the birds, mammals, reptiles, and insects that inhabit our yards and gardens are overwhelmingly on our side; they are not our enemies but instead our allies. They pollinate our flowers and vegetable crops and they keep pests in check. In *Garden Allies*, Frederique Lavoipierre shares fascinating portraits of these creatures, describing their life cycles and showing how they keep the garden's ecology in balance. Also included is helpful information on how to nurture and welcome these valuable creatures into your garden. With beautiful pen and ink drawings by Craig Latker, *Garden Allies* invites you to make friends with the creatures that fill your garden; the reward is a renewed sense of nature's beauty and a garden humming with life.

Fenland Nature Duncan Poyser, Simon Stirrup, 2025-05-06 This book showcases the natural history and landscape of the Fens, an area now responsible for a third of Britain's food production and worth over 3 billion to the economy every year. It describes the geology and geography across the Fenland Basin over the last 14,000 years, a period dominated by the flux of wetlands and movement of water. The human relationship with this landscape is traced through history from Mesolithic hunters to the prosperity of a medieval economy based on the currency of eels, through the taming and draining of the vast wetlands to modern farming on an industrial scale. While recognising that only a fraction of the Fens is left, *Fenland Nature* celebrates the breadth of wildlife still to be found in the region, from vast flocks of visiting wildfowl in the winter months to rare and specialised plants and insects, all illustrated with detailed and evocative photographs. The book concludes by contemplating an uncertain future where there are possibilities for a sustainable agricultural industry alongside increasing biodiversity, requiring new ways of thinking and working with the land. The Fenland landscape is a microcosm of the huge global challenges caused by habitat loss, ecological degradation, and climate change. If solutions can be found to these complex issues in the Fens, then there is hope that these can also apply to similar places across the world.
