Look At Birth:

Birth, Death & InBetween Arlene Corwin, 2013-01-25 Birth Death one is grieved one wonders at the disappearance the invisibility the untimeliness what was before what may come after No longer a matter of death and dying but of birth death and the in between The speechlessness turns into a need to speak You don't put together a collection of poetry overnight There is no arbitrary subject There are threads A collection is a matter of emphasis accentuation and priority One's generation begins to go the whole of the sidewalk full of people coming at you will be gone in a hundred years not a person coming at you left If that is not a source of wonderment what is Birth Death InBetween is a collection of 300 some odd poems written over a period of 40 years observing examining questioning accepting the plain facts and the elusive nuances

Human Birth Wenda R. Trevathan, 2017-07-05 The story of human evolution has been told hundreds of times each time with a focus that seems most informative of the teller No matter how it is told the primary characters are rarely mothers and infants Darwin argued survival but today we know that reproduction is what evolution is all about Centering on this Trevathan focuses on birth which gives the study of human evolution a crucial new dimension Unique among mammals humans are bipedal The evolution of bipedalism required fundamental changes in the pelvis and resulted in a narrow birth canal Humans are also large brained animals which means that birth is much more challenging for our species than for most other animals The result of this mismatch of large head and narrow pelvis is that women are highly dependent on assistance at birth and their babies are born in an unusually undeveloped state when the brain is still small Human Birth discusses how the birth process has evolved and ways in which human birth differs from birth in all other mammals Human Birth is also concerned with mother infant interaction immediately after birth While working as a midwife trainee Trevathan

carefully documented the births of more than one hundred women and recorded maternal and infant behaviors during the first hour after birth. She suggests ways in which the interactions served not only to enhance mother-infant bonding but also to ensure survival in the evolutionary past. With clarity and compelling logic, Trevathan argues that modern birth practices often fail to meet evolved needs of women and infants and suggests changes that could lead to better birth experiences. This paperback edition includes a new introduction by the author.

Birth to Psychic Life Albert Ciccone, Marc Lhopital, 2022-03-30. Based on rich clinical experience and on theory from numerous psychoanalytical works, this book explores and analyzes the emergence and development of the psychic life. Birth to Psychic Life explores the genesis of the psychic apparatus, reconstructs the development of subjectivity with its ups and downs in babies as in all subjects, and studies the relationship between mental states at the dawn of psychic life and those characteristic of psychopathology. The book refers to Freudian, Kleinian, and post-Kleinian works proposing articulations between the different theoretical models. The referenced works' contributions to the understanding of early psychic disorders as well as to the implications of infantile psychic suffering in adulthood are essential. The authors identify the three psychic constellations recognized by many that accompany the psychic birth and suggest new, more adequate names in view of current works on subjectivity: the auto-sensual position, the symbiotic position, and the depressive position. Many other new and original proposals are developed by the authors. Providing tools to think about the processes of psychic growth, this book will be of interest to all psychoanalysts and psychotherapists working with infants and interested in the impact of early psychic development throughout life.

Birth of a Titan Gary Iascone, 2010-12-28. Cory Thompson is a fourteen-year-old boy on his way to magic school with his father and sister. At his unbinding ceremony, the powers he receives make it apparent that he is the first Titan to be born in over nine hundred years. In an attempt to get him ready for his destiny, Professor Archer decides to become his personal mentor. But due to a series of incidents, some caused naturally and others deliberately caused by the Ancient Order of the Cronos, Cory's sister Ashley makes the biggest mistake of her young life. Totally unprepared to face the power of the evil Cronos, Cory finds himself in the position of being the only one able to save his sister from becoming a Crone for life. Armed with only three months of formal training and the help of his pet bird, Indy, Cory attempts the impossible, knowing full well that if he fails, the Cronos gain far more than a new recruit; they would also capture the key to the magical community's only hope for the future, which in turn is the only hope for mankind itself.
