Garrity,1991 Educational resource for teachers parents and kids **Ecology and Literatures in English** Françoise Besson,2018-12-14 In all latitudes writers hold out a mirror leading the reader to awareness by telling real or imaginary stories about people of good will who try to save what can be saved and about animals showing humans the way to follow Such tales argue that in spite of all destructions and tragedies if we are just aware of and connected to the real world around us to the blade of grass at our feet and the star above our heads there is hope in a reconciliation with the Earth This may start with the emergence or rather the return of a nonverbal language restoring the connection between human beings and the nonhuman world through a form of communication beyond verbalization Through a journey in Anglophone literature with examples taken from Aboriginal African American English Canadian and Indian works this book shows the role played by literature in the protection of the planet It argues that literature reveals the fundamental idea that everything is connected and that it is only when most people are aware of this connection that the world will change Exactly as a tree is connected with all the animal life in and around it texts show that nothing should be separated From Shakespeare s theatre to ecopoetics from travel writing to detective novels from children s books to novels all literary genres show that literature responds to the violence destroying lands men and nonhuman creatures whose voices can be heard through texts **Dr. Seuss** Philip Nel,2005-01-01 Philip Nel takes a fascinating look into the key aspects of Seuss s career his poetry politics art marketing and place in the popular imagination Nel argues convincingly that Dr Seuss is one of the most influential poets in America His nonsense verse like that of Lewis Carroll and Edward Lear has changed language itself giving us new words like nerd And Seuss s famously loopy artistic style what Nel terms an energetic cartoon surrealism has been equally important inspiring artists like filmmaker Tim Burton and illustrator Lane Smith from back cover *Theodor Geisel* Donald E. Payne, Alan Reid, 2014-06-11 Recent scholarship on children's literature displays a wide variety of interests in classic and contemporary children's books. While environmental and ecological concerns have led to an interest in ecocriticism, as yet there is little on the significance of the ecological imagination and experience to both the authors and readers young and old of these texts. This edited collection brings together a set of original international research-based chapters to explore the role of children's literature in learning about environments and places with a focus on how children's literature may inform and enrich our imagination, experiences, and responses to environmental challenges and injustice. Contributions from Australia, Canada, USA, and UK explore the diverse ways in which children's literature can provide what are arguably some of the first and possibly most formative engagements that some children might have with nature. Chapters examine classic and new storybooks, mythic tales, and image-based and/or written texts read at home, in school, and in the field. Contributors focus on exploring how children's literature mediates and informs our imagination and understandings of diverse environments and places and how it might open our eyes and lives to other presences, understandings, and priorities through stories, their telling, and re-telling, and their analysis. This book was originally published as a special issue of *Environmental Education Research*.

Real Writing Mitchell Nobis, Daniel Laird, Carrie Nobis, Dawn Reed, Dirk Schulze, 2016-09-23 High school writing prompts often ask students to provide overly simplified responses to complicated issues, but a person's stance in the real world can rarely, if ever, be reduced to agree or disagree. Arguments are complex with more than two points of view and a range of evidence to consider. However, writing classes don't always embrace that complexity. *Real Writing: Modernizing the Old School Essay* contends that engaging fully with complex texts and difficult, nuanced arguments helps students become better thinkers and writers, more fully prepared for life both in and after high school. By offering students current texts to read and issues to discuss, teachers introduce their students to more complex arguments. *Real Writing: Modernizing the Old School Essay* recognizes the value of various types of texts, but the need for contemporary readings in our literature and composition classes is important for relevancy related to student engagement, the Common Core State Standards, and participation in our democratic society. This book shares curricular moves to engage students in reading and writing authentic arguments.

The challenges and opportunities for art therapy in working with terminal illness and bereavement are also addressed. *Pediatric Medical Art Therapy* delineates the essential considerations and lessons for the art therapist who joins the medical journeys of children and their families and emphasises the importance of this unique role. **Raising the Curve**

Ron Berler, 2014-03-04 Brookside Elementary in Norwalk Connecticut is preparing for a new school year and another chance to improve its failing scores on the statewide standardized test known as the CMT. The challenges are many and for the faculty whose jobs may depend on their students' ability to improve on the test, the stakes are high. Ten-year-old Hydea is about to start fifth grade with second-grade reading skills. Her friend Marbella is only a little further along. In past years, these students would have received help from the literacy specialist Mrs. Schaefer. But this year, due to cutbacks and a change in job description, she will have to select the few students whom she and the teachers can bet on, the ones who are close to passing the exams. And for added measure, Principal Hay has already asked his faculty to teach to the test. Journalist Ron Berler spent a full year at Brookside. In *Raising the Curve*, he offers a nuanced and personal portrait of the students, teachers, and staff who make up the Brookside community, capturing their struggles as well as their pride, resilience, and spirited faith. **Moving INTO the Classroom** Stacia C. Miller, Suzanne F. Lindt, 2017-09-06 This textbook focuses on research in movement integration and the benefits of physical activity to the child's physical, cognitive, emotional, and social development. It includes research on and suggestions for integrating movement into English language arts, mathematics, science, and social studies for lower and upper elementary students. Though the textbook is specifically aimed at elementary-level teachers, secondary teachers and pre-service teachers can modify the activities to fit their lessons as well.
