Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen, 1996 Refugee Archives Andrea Hammel, Anthony Grenville, 2007 This volume gives an extensive overview of current developments in the field of archival collections relating to German speaking refugees located in Germany Austria the USA Ireland and the UK The contributions illustrate the three interlinked areas of refugee archives Exile and Migration Studies research and related databases and other resources The articles investigate their interrelationship as well as the future challenges facing all three areas by focussing on larger archival holdings as well as collections relating to individuals and organisations and more recently established electronic and online resources and finding aids The volume is aimed at researchers and archival practitioners alike and should be especially useful for anyone starting out in the field *Franz Werfel: Bibliography of German Editions* John M. Spalek, 2009-10-16 This volume is the first comprehensive bibliography of all Werfel publications in German language and thus a complete history of the publication of Werfel's works All works are arranged alphabetically by title followed by all other editions grouped by publisher Each bibliographical entry contains the edition's designation all the information from the title sheet a description of the volume the location and detailed explanatory notes **Sustainability and Evolution, or why life becomes increasingly complex: The Interaction Theory** Michael J. Ruf, 2018-12-14 Thanks to new improving experimental techniques modern biology is discovering a steadily growing body of new facts and data about the living nature A good example of this advancement is the decryption of the complete genome of a rapidly increasing number of organisms including humans Regardless of these impressive results however there are still no satisfying answers to very basic questions of biology such as What is life and Why does matter organize into biological forms that become more complex in the course of evolution The Interaction Theory by Michael J Ruf assumes that this unsatisfying situation is not simply the consequence that certain experimental data are still missing The lack of explanation of what life is actually and why simple molecules evolve into complex organisms rather reflects an existing conceptual problem that can only be solved with a radically new conceptual approach Interaction Theory is the result of such a radically new approach to life and evolution In contrast to conventional evolutionary theory the generation sequences of living forms are considered to be the decisive quality of life By clarifying how the continuation of these generation sequences can be sustainable over billions of years new fundamental principles become obvious and the phenomenon of an increasing biological complexity understandable As a result a law like process of biological complexity increase can be derived as immanent part of the evolution of life This allows Interaction Theory to provide new answers to key questions such as why sexual reproduction what species are and what life is The theory is however not limited to cells and organisms and their evolution It addresses the self organization to higher complexity of all kinds of structures that are subject to an evolution through multiplication processes This means that Interaction Theory also provides an understanding

of why and how molecular networks social communities and even societies become more complex over time

Transnational Conflicts and International Law Constantin von der Groeben, 2014-11-06 Ever since 9 11 the legal classification of transnational conflicts between states and non state armed groups such as Al Qaeda has become a highly debated topic While repeatedly referred to as the War on Terror the legal qualification of the conflict between the US and Al Qaeda remains controversial US military operations in Afghanistan against Al Qaeda and the use of drones against alleged terrorists in Pakistan Yemen and other states pose the question as to whether this conflict truly qualifies as one single global war Similarly transnational conflicts such as the Colombian operation against a FARC base in Ecuador Israel's fight against Hezbollah in Lebanon and Turkish operations against the PKK in northern Iraq pose difficulties as they transcend individual nations political systems and geographical borders Whether the law of war i.e. humanitarian law is applicable to such conflicts and to what extent human rights law binds the states involved is debated This work aims to provide structure to the current debate and analyzes the applicability of both humanitarian law and human rights law Furthermore it examines and explores approaches to enhance and develop the existing legal framework including proposed new legal regimes for transnational conflicts The author argues against the strict separation of international humanitarian law and human rights law and instead borrows from Colombian authorities experience in their struggle with the FARC to develop an alternate solution combining both legal regimes in an integrated approach

Performance prediction of a future SiGe HBT technology using a heterogeneous set of simulation tools and approaches Tommy Rosenbaum, 2017-03-10 Bipolar complementary metal oxide semiconductor BiCMOS processes can be considered as the most general solution for RF products as they combine the mature manufacturing tools of CMOS with the speed and drive capabilities of silicon germanium SiGe heterojunction bipolar transistors HBTs HBTs in turn are major contenders for partially filling the terahertz gap which describes the range in which the frequencies generated by transistors and lasers do not overlap approximately 0.3 THz to 30 THz To evaluate the capabilities of such future devices a reliable prediction methodology is desirable Using a

heterogeneous set of simulation tools and approaches allows to achieve this goal successively and is beneficial for troubleshooting. Various scientific fields are combined such as technology computer aided design TCAD compact modeling and parameter extraction. To create a foundation for the simulation environment and to ensure reproducibility the used material models of the hydrodynamic and drift diffusion approaches are introduced in the beginning of this thesis. The physical models are mainly based on literature data of Monte Carlo MC or deterministic simulations of the Boltzmann transport equation BTE. However the TCAD deck must be calibrated on measurement data too for a reliable performance prediction of HBTs. The corresponding calibration approach is based on measurements of an advanced SiGe HBT technology for which a technology specific parameter set of the HICUM L2 compact model is extracted for the high speed medium voltage and high voltage transistor versions. With the help of the results one dimensional transistor characteristics are generated that serve as reference for the doping profile and model calibration. By performing elaborate comparisons between measurement based reference data and simulations the thesis advances the state of the art of TCAD based predictions and proves the feasibility of the approach. Finally the performance of a future technology in 28 nm is predicted by applying the heterogeneous methodology. On the basis of the TCAD results bottlenecks of the technology are identified.

Meinongian Issues in Contemporary Italian Philosophy Venanzio Raspa, 2013-05-02. The traditional and lively interest in Meinong's philosophy and related topics among Italian philosophers gives rise to this volume of MEINONG STUDIES. As more than an introduction Venanzio Raspa presents an enlightening historical presentation of Meinong's reception in Italy from his lifetime to the present day. Riccardo Martinelli offers a reconstruction of the Meinongian theory of musical objects of higher order. Francesca Modenato gives the outlines of Meinong's object theory as a theory of the pure object separating it from ontology and associating it rather with gnoseology. From a less historical than systematic analytic perspective Andrea Bottani deals with incomplete objects. Mario Alai investigates the problem of propositions concerning non-existent objects and Carola Barbero proposes a realistic theory of the emotions aroused by reading literary texts. As themes related to Meinongian ones Alberto Voltolini discusses the concept of existence as a property. Francesco Orilia validates an intuition of Meinong by adopting an approach called fact infinitism and Guido Bonino deals with Gustav Bergmann's interpretation of Meinong's ontology. Das traditionelle und lebhaftes Interesse italienischer Philosophen an Meinongs Philosophie und damit zusammenhängenden Themen gibt Anlass für diesen Band der MEINONG STUDIEN. Weiterber die Anforderungen an eine Einleitung hinausgehend präsentiert Venanzio Raspa eine erhellende Studie der Rezeption Meinongs in Italien von seinen Lebzeiten bis zum heutigen Tag. Riccardo Martinelli rekonstruiert Meinongs Theorie musikalischer Objekte ihrer Ordnung und Francesca Modenato umreißt Meinongs Objekttheorie als Theorie reiner Objekte welche sie eher der Gnoseologie denn der Ontologie zuordnet. Aus einer weniger historischen als systematisch analytischen Perspektive befassen sich Andrea Bottani mit unvollständigen Objekten, Mario Alai mit der Frage nicht existierende Objekte betreffender Aussagen und Carola Barbero

präsentiert eine realistische Theorie von Emotionen die durch die Lektüre literarischer Texte erweckt werden Als Meinong bezogene Themen diskutiert Alberto Voltolini den Begriff der Existenz als Eigenschaft Francesco Orilia bestreitet in seinem Fakteninfinismus genannten Zugang eine Meinongsche Intuition und Guido Bonino befaßt sich mit Gustav Bergmanns Interpretation der Meinongschen Ontologie

Sustainable Entrepreneurship Marc Dreßler,2024-01-29 Successful strategic management of small business isn't always as easy as it looks given the dynamic changes turbulent business environments and in many cases severely restricted room for maneuver that prevail nowadays in Western economies Which is why strategic and sustainable business governance and operational management are taking on growing importance especially in sectors consisting mainly of small businesses Although much has been written on these subjects a book that resolutely focuses on the nuts and bolts of strategically focused sustainability management is needed especially for smaller entities More than 200 illustrative examples of best practice and other scenarios drawn from actual practice in the wine industry and elsewhere plus more than 160 graphics and a wealth of empirical data serve to answer the why and how of strategy and sustainability in the small business sector

Narratives of Annihilation, Confinement, and Survival Anja Tippner,Anna Artwińska,2019-05-20 The concept of camp narratives rather than Holocaust narratives or Gulag narratives is based on the assumption that literary accounts of camp experiences share common traits aesthetically as well as thematically The book presents readings of camp literature that underscore the similarities between texts about Soviet gulag camps Nazi camps and about other camp experiences While literature about Nazi concentration camps still serves as a point of reference for camp narratives in the same way that the Holocaust serves as a point of reference for other genocidal operations socialist labor and penal camps have become transnational lieux de mémoire in their own right since 1989 This volume intends to provide a theoretical frame as well as an overview of several important European camp literatures and case studies of iconic camp narratives and to take a comparative and transnational perspective on the genre of the camp narrative
