

Indonesian projects to boost nickel supply

Stellar growth in Indonesian primary nickel supply since 2020 – namely nickel pig iron (NPI), nickel matte and mixed hydroxide precipitate (MHP) will keep the nickel market in surplus for the next three years, with Indonesia making up 44% of global primary nickel supply.

44%

Production capacity per annum ('000 tons)

While the market has criticized higher CO₂ emissions from the NPI-to-matte route and the large amount of HRAL tailings produced, battery makers and OEMs continue to invest ahead of an anticipated supply crunch in 2027.

Primary nickel output to surpass demand until 2027

High-nickel chemistries to constitute nearly half of global battery demand by 2030

Being Sure of Each Other Kimberley Brownlee, 2020-05-26 We are deeply social creatures Our core social needs for meaningful social inclusion are more important than our civil and political needs and our economic welfare needs and we won't secure those other things if our core social needs go unmet Our core social needs ground a human right against social deprivation as well as a human right to have the resources to sustain other people Kimberley Brownlee defends this fundamental but largely neglected human right having defined social deprivation as a persistent lack of minimally adequate access to decent human contact she then discusses situations such as solitary confinement and incidental isolation Fleshing out what it means to others Our core social needs can clash with others Brownlee considers why loneliness and weak social connections are not just moral tragedies but often injustices and argues that we endure social contribution injustice when we are denied the means to sustain our interests in interactive and associative freedom and when they do social needs take priority We have a duty to ensure that everyone has the opportunity to satisfy their social needs As Brownlee asserts we violate this duty if we classify some people as inescapably socially threatening either through using reductive essentialist language that reduces people to certain acts or traits criminal rapist paedophile foreigner or in the ways we physically segregate such people and fail to help people to reintegrate after segregation

The Moral Challenge of Dangerous Climate Change Darrel Moellendorf, 2014-04-14 This book examines the threat that climate change poses to the projects of poverty eradication sustainable development and biodiversity preservation It offers a careful discussion of the values that support these projects and a critical evaluation of the normative bases of climate change policy This book regards climate change policy as a public problem that normative philosophy can shed light on It assumes that the development of policy should be based on values regarding what is important to respect preserve and protect What sort of climate change policy do we owe the poor of the world who are particularly vulnerable to climate change Why should our generation take on the burden of mitigating climate change that is caused in no small part by emissions from people now dead What value is lost when natural species go extinct as they may well do en masse because of climate change This book presents a broad and inclusive discussion of climate change policy relevant to those with interests in public policy development studies environmental studies political theory and moral and political philosophy

Politics Johannes Urpelainen, 2022-07-29 Emerging economies have fundamentally transformed global environmental politics Led by China and India they increasingly make or break international negotiations which now require agreement among a large number of governments with widely varied preferences Emerging economies which still suffer from widespread poverty and frequently struggle with policy implementation often feel that Western led initiatives neglect their needs What does the global environmental policy landscape look like in the age of a rising Global South This book explains why emerging economies have come to dominate global environmental politics and examines the implications for future international cooperation Johannes Urpelainen shows that emerging economies continue to prioritize economic growth and often have limited institutional capacity to contain the environmental destruction that it causes However he argues despite barriers to cooperation innovative bargaining and institutional design offer a way forward Bottom up agreements that respect national sovereignty and invest in capacity building hold more promise than traditional top down treaties with binding commitments The book features detailed discussions of attempts to address hazardous chemicals loss of biodiversity and climate change a comparative analysis of China and India and case studies of nine other emerging economies around the world Global Environmental Politics is an essential forward looking overview of today's most pressing international issue

The Humble Cosmopolitan Luis Cabrera, 2020 Is a strong cosmopolitan stance irretrievably arrogant Cosmopolitanism which affirms universal moral principles and grants no fundamental moral significance to the state has become increasingly central to normative political theory Yet it has faced persistent claims that it disdains local attachments and cultures while also seeking the neo imperialistic imposition of Western moral views on all persons The critique is said to apply with even greater force to institutional cosmopolitan approaches which seek the development of global political institutions capable of promoting global aims for human rights democracy etc This book works to address such objections through developing a novel theory of cosmopolitan political humility It draws on the work of Indian constitutional architect and social activist B R Ambedkar who cited universal principles of equality and rights in confronting domestic exclusions and the arrogance of caste He sought to advance forms of political humility or the recognition of equal standing and openness to input and challenge within political institutions This book explores how an institutional global citizenship approach to cosmopolitanism could similarly promote political humility globally by supporting the development of democratic input and challenge mechanisms

beyond the state Such developments would challenge an essential political arrogance identified in the current system where sovereign states are empowered to simply dismiss rights based challenges from outsiders or their own populations even as they serve as the designated guarantors of human rights The book employs an innovative grounded normative theory method where extensive original field research informs the development of moral claims Insights are taken from Dalit activists reaching out to United Nations human rights bodies for support in challenging caste discrimination and from their critics in the governing Bharatiya Janata Party Further insights are drawn from Turkish protestors confronting a rising domestic authoritarianism and from UK Independence Party members demanding Brexit from the European Union in part because predominantly Muslim Turkey could eventually join Overall it is shown an institutional global citizenship approach can inform the development of a global framework which would orient fundamentally to political humility rather than arrogance and which could significantly advance global rights protections
