- ❑ The Rational Interaction for Moral Sensitivity (RIMS) approach is designed as a decision-making strategy that can be used for both social and personal ethical dilemmas in the workplace.
- ❑ Social dilemmas arise when different people make conflicting judgments on what is considered to be morally right with regard to a specific situation.
- ❑ Personal dilemmas occur when a person becomes uncertain about what the most appropriate moral decision should be in a specific situation

**The Limits of Hobbesian Contractarianism** Jody S. Kraus, 2002 This book is the most comprehensive rigorous critique of contemporary Hobbesian contractarianism as expounded in the work of Jean Hampton Gregory Kavka and David Gauthier Professor Kraus argues that the attempts by these three philosophers to use Hobbes to answer current political and moral questions fail The reasons why they fail are related to fundamental problems intrinsic to Hobbesian contractarianism first the problem of collective action arising out of the tension in Hobbes theory between individual and collective rationality second the classical problem of explaining the normative force of hypothetical action a problem that can be traced to the conflicting strategies of hypothetical justification found in Rawls and Hobbes theories Given the deep interest in Hobbesian contractarianism among philosophers political theorists game theorists in economics and political science and legal theorists this book is likely to attract wide attention and infuse new life into the contractarian debate Internal Auditing Richard Cascarino, 2007-04 Book CD This book is designed primarily for undergraduate and postgraduate students intending to pursue a career in internal auditing as well as those chartered accountants with a specialist interest in governance and control issues This book covers the basic concepts philosophy and principles underlying the practice of internal auditing the relationships between the internal auditor management and the external auditor In addition the student will gain a knowledge and understanding of the nature of an organisation Risk management and the role of internal auditing in managing organisational risks in the context of current developments in corporate governance in both the public and private sectors are dealt with The book is now prescribed for those studying for the Certified Internal Auditor professional qualification since it addresses the syllabus requirements of the Institute of Internal Auditors IIA and the Standards for the Professional Practice of Internal Auditing and Competency Framework for Internal Auditors This book represents a practical integrated approach to the Institute of Internal Auditors recommended internal audit approach and may be implemented within an internal audit department in a cost effective manner Accordingly the text may be useful as a reference manual for internal audits in practice Foundations and Applications of Decision Theory C.A. Hooker, J.J. Leach, E.F. McClennen, 2012-12-06 1 INTRODUCTION In the Spring of 1975 we held an international workshop on the Foundations and Application of Decision Theory at the University of Western Ontario To help structure the workshop into ordered and manageable sessions we distributed the following statement of our goals to all invited participants They in turn responded with useful revisions and suggested their own areas of interest Since this procedure provided the eventual format of the sessions we include it here as the most appropriate introduction to these collected papers resulting from the workshop The reader can readily gauge the approximation to our mutual goals 2 STATEMENT OF OBJECTIVES AND RATIONALE Attached to this statement is a bibliography names of persons cited in the statement and writing in this century will be found referenced in the bibliography certain classics aside 2 1 Preamble We understand in the following the Theory of Decisions in

a broader sense than is presently customary construing it to embrace a general theory of decision making including social political and economic theory and applications Thus we subsume the Theory of Games under the head of Decision Theory regarding it as a particularly clearly formulated version of part of the general theory of decision making     Intentions in Communication Philip R. Cohen, Jerry L. Morgan, Martha E. Pollack, 1990 Intentions in Communication brings together major theorists from artificial intelligence and computer science linguistics philosophy and psychology whose work develops the foundations for an account of the role of intentions in a comprehensive theory of communication It demonstrates for the first time the emerging cooperation among disciplines concerned with the fundamental role of intention in communication The fourteen contributions in this book address central questions about the nature of intention as it is understood in theories of communication the crucial role of intention recognition in understanding utterances the use of principles of rational interaction in interpreting speech acts the contribution of intonation contours to intention recognition and the need for more general models of intention that support a view of dialogue as a collaborative activity The contributors are Michael E Bratman Philip R Cohen Hector J Levesque Martha E Pollack Henry Kautz Andrew J I Jones C Raymond Perrault Daniel Vanderveken Janet Pierrehumbert Julia Hirschberg Richmond H Thomason Diane J Litman James F Allen John R Searle Barbara J Grosz Candace L Sidner Herbert H Clark and Deanna Wilkes Gibbs The book also includes commentaries by James F Allen W A Woods Jerry Morgan Jerrold M Sadock Jerry R Hobbs and Kent Bach Philip R Cohen is a Senior Computer Scientist at the Artificial Intelligence Center at SRI International and is a Senior Researcher with the Center for the Study of Language and Information Jerry Morgan is Associate Professor Department of Linguistics and Beckman Institute for Advanced Science and Technology at the University of Illinois Martha E Pollack is a Computer Scientist at the Artificial Intelligence Center at SRI International and is a Senior Researcher with the Center for the Study of Language and Information Intentions in Communication is included in the System Development Foundation Benchmark Series

*Multi-Agent Programming* Rafael H. Bordini, Mehdi Dastani, Jürgen Dix, Amal El Fallah Seghrouchni, 2005-07-29 Multi Agent Programming is an essential reference for anyone interested in the most up to date developments in MAS programming While previous research has focused on the development of formal and informal approaches to analyze and specify Multi Agent Systems this book focuses on the development of programming languages and tools which not only support MAS programming but also implement key concepts of MAS in a unified framework Part I describes approaches that rely on computational logic or process algebra Jason 3APL IMPACT and CLAIM SyMPA Part II presents languages and platforms that extend or are based on Java JADE Jadex and JACKTM Part III provides two significant industry specific applications The DEFACTO System for coordinating human agent teams for disaster response and the ARTIMIS rational dialogue agent technology Also featured are seven appendices for quick reference and comparison     Rationality, Rules, and Structure Julian Nida-Rümelin, W. Spohn, 2013-04-17 It is an obvious fact that human agency is constrained and structured by

many kinds of rules rules that are constitutive for communication morality persons and society and juridical rules So the question is what roles are played by social rules and the structural traits of human agency in rational decision making What bearing does this have on the theory of practical rationality These issues can only be discussed within an interdisciplinary setting with researchers drawn from philosophy decision theory and the economic and social sciences The problem is of profound fundamental concern to the social scientist and has attracted a great deal of intellectual effort Contributors include distinguished researchers in their respective fields and the book thus presents state of the art theory It can also be used as a textbook in advanced philosophy economics and social science classes

*Towards Agamemnon: Totalitarianism Origins & History* Benjamin Yang, 2023-01-01 One of the most striking phenomena of the 20th century is totalitarianism In both Europe and Asia different types of totalitarian states and political organisations have emerged fomenting global hatred wars and massacres of civilians Nearly 200 million people were killed as a result of totalitarian wars and political cleansing of populations The totalitarian catastrophe of the last century continues to have a profound impact on global politics and economy in the 21st century For politicians business leaders and civilians around the world it is impossible to ignore the many problems caused by totalitarianism The technological revolutions cultural expressions and changes in business models that we are experiencing are all closely related to it This book traces the origins of totalitarianism from ancient literature to events in the last century About the Author Benjamin Yang was born in China in 1972 A long time resident in Southeast Asia he has work experience in broadcasting research and teaching at Central South University and Hainan University primarily in philosophy and dramaturgy He has published more than 20 academic papers and his major publications include *The Cat in the Closed Chamber* *The Concept of Time and Space* and *the Collective Subconscious* 2013 which discusses how different human communities often have different conceptions of space and time and *Drama and the Rise of Great Powers* 2017 which points out that the birth of every modern western power has been accompanied by the emergence of an iconic theatre master This book *Towards Agamemnon Totalitarianism Origins History* is the result of his years of research and study in philosophy history politics and literature of both the Western and Eastern worlds Author's words I lived in Phnom Penh Cambodia during the Covid 19 pandemic It is a beautiful and romantic city in the Far East But the shadows of death seems to be creating in a hidden cycle of time The S 21 Concentration Camp where tens of thousands of people under the Khmer Rouge's totalitarian rule was just a fraction of the two million Cambodians who were killed in the political cleansing of the population John and I used translation software to exchange views on politics including totalitarianism The Red Revolution of the last century was like a horrific ideological viral outbreak that killed tens of millions of people during the Bolshevik Revolution the Chinese Cultural Revolution and the Khmer Rouge totalitarian rule The recollections of those horrific periods have indeed diverted our anxiety over Covid 19 My colleague Professor K came to join me in Phnom Penh For a fortuitous reason he led me to discover a secret There exists a literary tradition in the history of the West that is 2500 years old a tradition which had

produced the world's most famous plays and films The literary tradition contains the source of power of the West's resistance to totalitarianism over the years The Marxist regime and the Nazi forces created the apocalyptic landscape of the 20th century but they lost out to this tradition in the end This book provides the link between that tradition and causes of totalitarianism through the ages especially those during the 20th century This book traces the origins of totalitarianism from ancient literature to events in the last century

**Morals by Agreement** David Gauthier, 1987-05-21 In this book the author argues that moral principles are principles of rational choice According to the usual view of choice a rational person selects what is likely to give the greatest expectation of value or utility But in many situations if each person chooses in this way everyone will be worse off than need be Instead Professor Gauthier proposes a principle whereby choice is made on an agreed basis of co operation rather than according to what would give the individual the greatest expectation of value He shows that such a principle not only ensures mutual benefit and fairness thus satisfying the standards of morality but also that each person may actually expect greater utility by adhering to morality even though the choice did not have that end primarily in view In resolving what may appear to be a paradox the author establishes morals on the firm foundation of reason

*Rights, Bodies and Recognition* Daniel Breazeale, 2019-03-29 The German philosopher Johann Gottlieb Fichte 1762 1814 has long been recognized as an important and original figure in the history of philosophy and Western thought and as a seminal influence upon the Romantic tradition The essays in this book focus on Fichte's contributions in political theory as set out in his *Foundations of Natural Right* Fichte was notorious as a political radical and his ideas in political theory proved to be decisive influences upon his contemporaries and of striking relevance to current political dispute This volume of essays which examine such issues as Fichte as a social contract theorist his theory of gender relations and his theories on punishment and the criminal law among many other topics remedies what has been a striking lacuna in the existing scholarly literature

*Cosmopolitan Liberalism* M. Sánchez-Flores, 2010-09-13 Cosmopolitanism in the contemporary debate is firmly based in the western tradition of liberal thought which is culturally situated The liberal conception of self alienates nature and childhood and its internal logic justifies colonialism and carries patriarchal and racialized baggage Cosmopolitan Liberalism is a critique of the western tradition of liberal thought and an effort to overcome the philosophical boundaries of individualism towards a more inclusive and open conception It seeks to expand the theoretical basis of individuality beyond its own limitations towards the ideal of universal love and the moral principle of compassion which are compatible with all world cosmologies liberal and non liberal Cosmopolitan Liberalism is a reflection on what it is that all human beings owe one another in spite of the many humanly created borders that set us apart

*Pandemic and the City* Mehmet Güney Celbiş, Karima Kourtit, Peter Nijkamp, 2023-02-15 This book features a collection of novel and original contributions to the study of urban sustainability from a human health perspective in the light of the current corona pandemic and the challenge of cities to offer inclusive appealing and healthy infrastructures Written by

experts from various disciplines this book analyzes the impact of the corona pandemic on contemporary cities and how these cities respond to the challenges Featuring also case studies on various cities and regions it addresses four interconnected research challenges and themes Cities cooperation and resilience in the face of COVID 19 Comparative approaches on patterns and effects of city and location specific policies and socioeconomic structures during COVID 19 The socioeconomic and labor market effects of pandemics on cities and local economies The need for new types of data and applications in addressing challenges in analysing the effects of COVID 19 on cities This book will appeal to scholars of regional and spatial science urban economics and urban planning and anyone interested in the impact of corona pandemic on city life How Speech Acting and the Struggle of Narratives Generate Organization Thorvald Gran,2017-06-26 New organization theory The power of speech acting New interpretive methods in social and human sciences The micro processes of Nordic social democracy Methods and Finance Emiliano Ippoliti,Ping Chen,2016-12-23 The book offers an interdisciplinary perspective on finance with a special focus on stock markets It presents new methodologies for analyzing stock markets behavior and discusses theories and methods of finance from different angles such as the mathematical physical and philosophical ones The book which aims at philosophers and economists alike represents a rare yet important attempt to unify the externalist with the internalist conceptions of finance **Post-transcendental Communication** Colin B. Grant,2008 Compared with other human and social sciences communication theory appears to be of recent origin Appearances deceive however for the antecedents of this growing field of work can be found in the classic philosophical treatises of western and non western thinkers including Plato Sextus Empiricus and Laozi reaching forward through the theolinguistic tradition of St Augustine Boethius Averro s and Ockham before arriving at the modern age Following Wittgenstein s linguistic turn and Husserl s phenomenology in the early decades of the twentieth century we arrive at the fertile plains of semiotics information theory pragmatics and dialogism out of which communication theory has grown And yet an unresolved and historically non coincidental tension remains between the implicit transcendental claims of much of communication theory and our experiences of risk uncertainty and dissolution in what Zygmunt Bauman has described as our liquid age As communication theory matures it is an opportune moment to reflect on what form a detranscendentalised theory of communication might take In bringing intentions understandings meanings and interactions down to earth this book invites its readers to account for the complex communications between communications actors and social processes without recourse to transcendental theories of understanding **Political Philosophy for the Global Age** M. Sanchez-Flores,Mónica Judith Sánchez-Flores,2006-08-30 In the spirit of communitarianism and dialogue between civilizations this ambitious book seeks a political philosophy where a diversity of world views can meet The main objective of the book is to propose a theoretical basis for convergence and to explain how it can be built After considering key positions in the current debate on political theory the author offers a theoretical solution to the seeming impossibility of universalizing an ethics of caring and responsibility

**Networks** Daniel Hardy, Guy Malleus, Jean-Noel Mereur, 2013-12-18 Revolution transformation upheaval and promise Yesterday the technologies of communication were accessible only to experts today they are a subject of constant discussion in the media New services are advertised on a daily basis and the potential realized or not of these technologies is a constant source of comment and discussion But beyond the media frenzy things really are developing with increasing speed driven by the power of the Internet The network has built up an ongoing relationship between research centres development teams and marketing teams allowing a constructive collaboration between technologies The network has become the catalyst for its own evolution The arrival of IP and GSM has given rise to new corporate giants like Cisco Systems and Nokia Operators witnessing the diversification of their main sources of revenue have been forced to merge or split Entirely new actors from various horizons are counting on their ability to act as operators without a network to their name Traditional equipment manufacturers have had to rethink their product lines in view of these new foundations Likewise governments have understood the need to create a body of laws that promote the harmonious and rapid development of networks to offer alternatives for operators and service providers These often complex regulations act both as constraint and opportunity for operators and give direction to the actions of actors across the board Frontiers in Social Dilemmas Research Wim B.G. Liebrand, David M. Messick, 2012-12-06 Social dilemmas are situations in which individuals groups or nations face a choice between their own short term interests and the longer term interests of all parties involved including themselves As a consequence in the end they all regret the way they have acted Examples of social dilemmas are easy to find depletion of vital resources arms races over production of hazardous substances and environmental pollutants information hoarding and the failure to provide and maintain public goods Understanding the dynamics of social dilemmas constitutes a major challenge One prominent feature that distinguishes this book is the focus on computer simulations as a methodology for the exploration of the dynamic interplay of individual level processes and aggregate outcomes *Reasons and Intentions* Bruno Verbeek, 2016-12-05 There are a number of problems in philosophy that seem to share a similar possible solution Why do promises and contracts bind Why ought citizens and judges obey the law and Can we realize the gains to be made from cooperation All three problems as well as some others share a possible solution in the form of rational internal commitment *Reasons and Intentions* is a state of the art overview of the relevant positions on the possibility of such commitment including critical ones The introduction provides a survey of the central problem of the volume how the will can bind itself and still be instrumental in nature and the various positions which are further examined in the contributions Addressing the question of the relation between intentions and action the considerations which make an intention rational and how this translates into our conception of moral agency this book brings together specially commissioned essays by the leading scholars in the field *Reason in the City of Difference* Gary Bridge, 2005 This book re-establishes a notion of conscious agency in our understanding of urban life Using empirical examples and drawing on pragmatist ideas of experience and rationality this text

offers a new alternative reading of the city      God and the Philosophy of Explanation James W. Peterson, 2010-08 The purpose of this book is simple It is to tell the truth about GOD Learning the truth about GOD is the result of Mr Peterson's discovery of the meaning and purpose of his life It was discovered as a direct result of his need to learn it following his daughter's death in August of 1980 He discovered that the purpose and course of his life is determined in the same manner as yours It matters not who you are or what your particular circumstance is It doesn't matter if you have lost a child to death It doesn't even matter if you have children It matters not if you are a murderer or a saint gay or straight male or female first world citizen or jungle savage plant or animal The purpose for living is the same for all living things A rather intriguing claim isn't it If one has experienced the death of a child Mr Peterson's experience is not different from one's own in any important way But the story of how he came about his particular experience probably is Mr Peterson says that his friends comprise a very special society of humans they are parents of children who died before they did it is not supposed to happen that way But because they did lose a child to death he says they are experts in the field of pain and grieving They are not proud of the knowledge they have gained but they realize they have gained knowledge of what life is and how it actually operates that can be achieved in no other way They have experienced the very worst pain a human being can experience and remain alive Mr Peterson uses his unique experience to guide his readers through a complex series of intellectual challenges with the ease of a master sculptor
