Economic Policy Panagiotis E. Petrakis, 2014-02-17 It is a wide spread belief that the cultural background inherited in a society affects the requirements of economic development This relationship requires theoretical and empirical justification The present book provides this together with an analysis of the development of cultural background itself Cultural background is embodied in political institutions in transactions knowledge incentives in social capital even in the tangibles of the economy Thus economic development is shaped and the rate of growth is affected Conversely economic development affects cultural background When this interaction takes place at a non developmental cultural background level which is associated with low growth rates then a growth trap is formed Within such a growth trap economic policy public and monetary is relatively deactivated and the conditions influencing the change in cultural background and its timing are of primary importance
