doesn't slavishly obey him. In fact, the universe is a mathematical God factory and creates infinite Gods over eons of time. The universe via dialectical ontological mathematics is converging on the perfect answer to everything, the condition known as the Absolute or the Omega Point. The universe travels mathematically from Alpha to Omega from perfect potential to perfect actualization. The ancient secret society of the Illuminati has waged a war against Abrahamic monotheism and promoted the doctrine of becoming God. Mathematics is the Philosopher's Stone that can transmute base metal ordinary humans into gold Gods. You too can complete your cosmic journey across countless reincarnations. Are you ready to become an Omega Human?

The Best of All Possible Worlds? Leibniz's Philosophical Optimism and Its Critics 1710-1755 Hernán D. Caro, 2020-09-25

The reign of philosophical optimism or the doctrine of the best of all possible worlds in modern European philosophy began in 1710 with the publication of Leibniz's Theodicy about God's goodness and wisdom, divine and human freedom, and the meaning of evil. It ended on November 1, 1755, with the Lisbon Earthquake, which was followed by numerous attacks against optimism, starting with Voltaire's *Poème sur le désastre de Lisbonne* and *Candide*. The years between both events were intense. In this book, Hernán D. Caro offers the first comprehensive survey of the criticisms of optimism before the infamous earthquake, a time when the foundations of what has been called the debacle of the perfect world were first laid.
