Knowledge, Ideology and the Politics of Schooling Rachel Sharp,2017-04-28 First published in 1980 this book argues that a theory of ideology is essential to a theory of education It relates developments in the Marxist theory of ideology to the analysis of schooling in a capitalist society Beginning with an appraisal of the early twentieth century liberal social theorists including Weber Durkheim Veblen and Mannheim it demonstrates that the weakness of their approaches arose from a failure to comprehend adequately the nature of capitalism It then outlines the state of the theory of ideology at the time and applies the concept in an analysis of contemporary schooling concluding with a discussion of its political implications The application of the theory of ideology offers important possibilities for a radical socialist strategy on education

Toward a Sociology of Education John Beck,Chris Jenks,Nell Keddie,Michael F. D. The manner in which we variously come to an understanding of our world presents problems for us all but the unified method by which we ought best to acquire such knowledge represents the particular problem of contemporary education This important book seeks to explore some of the underlying practises and assumptions that go to produce and sustain both such sets of activities As a result of its concerns with the social organization of knowledge at all levels the sociology of education has become a central form of much contemporary sociological theory All the papers in this collection are formulations of a reflexive method of theorizing within sociology of education This is a mode of address deriving partly from social

phenomenology which seeks to display the grounds of the theorists speech as itself an essential feature of any informative dialogue Major themes in education and in sociology are considered in this way including the social form of rationality the constitution of curricula normative beliefs about Learning the nature of literary study as liberal education and the character of scientific knowledge in the social world Teaching Science Ralph Levinson,2005-08-05 Science education has undergone far reaching changes in the last fifty years The articles collected together in this reader examine how we have reached our present consensus and what theories we now use to explain how children learn science The central sections of the reader examine how all this can be translated into effective and stimulating teaching how learning can be most accurately and fairly assessed and how the impact of gender ethnicity and other factors on children s performance can be addressed in methods of teaching which make science accessible to all The articles in the final section of the book are a reminder that the debate is not finished yet and raise some challenging questions about what science education is and what it is for **Ideology and Curriculum** Michael Apple,2004-03-01 To celebrate the 25th anniversary of its publication Michael W Apple has thoroughly updated his influential text and written a new preface The new edition also includes an extended interview circa 2001 in which Apple relates the critical agenda outlined in Ideology and Curriculum to the more contemporary conservative climate Finally a new chapter titled Pedagogy Patriotism and Democracy Ideology and Education After 9 11 is also included Ideology and Curriculum Michael W.
