## **Rationality study Of Religion:**

*Rationality and the Study of Religion* Jeppe Sinding Jensen, Luther Martin, 2013-09-13 Does rationality the intellectual bedrock of all science apply to the study of religion Religion arguably the most subjective area of human behaviour has particular challenges associated with its study Attracting crowd healers conjurers the pious and the prophetic alongside comparativists and sceptics it excites opinions and generalizations whilst seldom explicitly staking out the territory for the discussions in which it partakes Increasingly scholars argue that religious study needs to define and critique its own field and to distinguish itself from theology and other non objective disciplines Yet how can rational techniques be applied to beliefs and states of mind regarded by some as beyond the scope of human reason Can these be made empirically testable or comparable and replicable within academic communities Can science explicate religion without reducing it to mere superstition or redefine its truth in some empirical but meaningful way Featuring contributions from leading international experts including Donald Wiebe Roger Trigg and Michael Pye *Rationality and the Study of Religion* gets under the surface of the religious studies discipline to expose the ideologies beneath Reopening debate in a neglected yet philosophically significant field it questions the role of rationality in religious anthropology natural history and anti scientific theologies with implications not only for supposedly objective disciplines but for our deepest attitudes to personal experience Interesting and important Religion has long been associated with irrationality both by its defenders and its critics and the topic of rationality has been unjustly neglected The book certainly deserves to be widely circulated Greg Alles Western Maryland College

**The Perception of Christianity as a Rational Religion in Singapore** Clive S. Chin, 2017-03-23 This book evaluates the common criticism that Christianity in Asia is westernized Since the 1980s Asian evangelical theologians and missiologists argue that the intrusion of Western theology is responsible for the Western and hence alien expressions of Christianity in Asia Yet in Singapore the number of Christians has increased over the last few decades Empirical evidence demonstrates that younger

Chinese Singaporeans convert from Buddhism or Taoism to Christianity partly because they perceive it as a rational religion over Buddhism or Taoism which are viewed as irrational or superstitious Not only do many converts favor Christianity as a rational religion but they do not regard Christianity as a Western religion at the point of their conversion What accounts for those recent developments This study explores the processes of modernization and globalization as important factors impacting religious change in Singapore Personal contextual and structural elements actually influence one's religion of choice In facilitating effective mission one must qualify the use of the categories Asian and Western because religious and cultural boundaries overlap What matters most in missiology is discerning how the gospel of Jesus Christ engages the self understanding and lived realities of ethnic and religious others in diverse cultural settings

*Reason, Freedom, and Religion* Lorne L. Dawson, 1988 This book argues the advantages of using an unconventional method of social science the argument from rationality to ameliorate the disruptive methodological schism which exists between humanistic and social scientific perspectives in Religionswissenschaft and the sociology of religion The argument from rationality curbs the reductive thrust of conventional scientific accounts of religion by integrating the power of human choice and religious references to the transcendent into a viable mode of explanation for social and religious action Attention is focused on the role character and limits of the judgements of rationality undergirding the practice of the social sciences

**Patterns of Rationality** Tommaso Bertolotti, 2015-04-29 This book proposes an applied epistemological framework for investigating science social cognition and religious thinking based on inferential patterns that recur in the different domains It presents human rationality as a tool that allows us to make sense of our physical or social surroundings It shows that the resulting cognitive activity produces a broad spectrum of outputs such as scientific models and experimentation gossip and social networks but also ancient and contemporary deities The book consists of three parts the first of which addresses scientific modeling and experimentation and their application to the analysis of scientific rationality Thus this part continues the tradition of eco cognitive epistemology and abduction studies The second part deals with the relationship between social cognition and

cognitive niche construction i.e. the evolutionarily relevant externalization of knowledge onto the environment while the third part focuses on what is commonly defined as irrational thus being in a way dialectically opposed to the first part Here the author demonstrates that the irrational can be analyzed by applying the same epistemological approach used to study scientific rationality and social cognition also in this case we see the emergence of patterns of rationality that regulate the relationships between agents and their environment All in all the book offers a coherent and unitary account of human rationality providing a basis for new conceptual connections and theoretical speculations

**The Routledge Companion to Theism** Charles Taliaferro, Victoria S. Harrison, Stewart Goetz, 2013 There are deep and pervasive disagreements today in universities and colleges and popular culture in general over the credibility and value of belief in God This has given rise to an urgent need for a balanced comprehensive accessible resource book that can inform the public and scholarly debate over theism While scholars with as diverse interests as Daniel Dennett Terry Eagleton Richard Dawkins Jrgen Habermas and Rowan Williams have recently contributed books to this debate theism as a concept remains poorly understood and requires a more thorough and systematic analysis than it has so far received in any single volume The Routledge Companion to Theism addresses this need by investigating theism s history as well as its relationship to inquiry in the sciences social sciences and humanities and to its wider cultural contexts The contents are not confined within the philosophy of religion or even within the more expansive borders of philosophy Rather The Routledge Companion to Theism investigates its subject through the lens of a wide variety of disciplines and explores the ramifications of theism considered as a way of life as well as an intellectual conviction The five parts of the volume indicate its inclusive scope I What is Theism II Theism and Inquiry III Theism and the Socio Political Realm IV Theism and Culture V Theism as a Way of Life The result is a well ordered and thorough collection that should provide a wide spectrum of readers with a better understanding of a subject that s much discussed but frequently

misunderstood As the editors note in their Introduction while stimulating and informing the contemporary debate a key aim of the volume is to open new avenues of inquiry into theism and thereby to encourage further research into this vital topic Comprised of 54 essays by leading scholars in philosophy history theology religious studies political science education and sociology The Routledge Companion to Theism promises to be the most useful comprehensive resource on an emerging subject of interest for students and scholars      *Critical Theory and Political Theology* Paul S. Chung, 2019-05-02 This book deals with the aftermath of the enlightenment and its legacy in the political social and racial context It discusses the incomplete project of modernity in terms of social contract theory racial justice issues and political theology in the postcolonial context Hermeneutical realism and cultural linguistic inquiry become substantial features in elaborating postcolonial political theology and its ethical stance against the colonization of lifeworld and its pathologies A study of critical theory and political theology is of a reconstructive character in seeking to relocate critical theory and political ethics in the context of alternative modernities at the level of postcolonial theory
