Rationing Health Care

Stephen Harrison, David J. Hunter

Rationing Health Care:

Rationing Health Care in America Larry R. Churchill, 1987 Rationing Is Not a Four-Letter Word Philip M. Rosoff, 2014-07-03 In this book Philip Rosoff offers a provocative proposal for providing quality healthcare to all Americans and controlling the out of control costs that threaten the economy He argues that rationing often associated in the public's mind with such negatives as unplugging ventilators death panels and socialized medicine is not a dirty word A comprehensive centralized and fair system of rationing is the best way to distribute the benefits of modern medicine equitably while achieving significant cost savings Pricing Life Peter A. Ubel, 2000 A rational look at health care rationing from ethical economic psychological and clinical perspectives Although managed health care is a hot topic too few discussions focus on health care rationing who lives and who dies death versus dollars In this book physician and bioethicist Peter A Ubel argues that physicians health insurance companies managed care organizations and governments need to consider the cost effectiveness of many new health care technologies In particular they need to think about how best to ration health care Ubel believes that standard medical training should provide physicians with the expertise to decide when to withhold health care from patients He discusses the moral questions raised by this position and by health care rationing in general He incorporates ethical arguments about the appropriate role of cost effectiveness analysis in health care rationing empirical research about how the general public wants to ration care and clinical insights based on his practice of general internal medicine Straddling the fields of ethics economics research psychology and clinical medicine he moves the debate forward from whether to ration to how to ration The discussion is enlivened by actual case studies **Health Care for Some** Beatrix Hoffman, 2012-09-28 Skillfully chronicles America's struggles to make health care a right from the Depression through Obamacare beautifully written and compelling Jonathan Oberlander author of *The Political Life of Medicare* Named by Choice as an Outstanding Academic Title In *Health Care for Some* Beatrix Hoffman offers an engaging in depth look at America's long tradition of unequal access to health care She argues that two main features have characterized the US health system a refusal to adopt a right to care and a particularly American approach to the rationing of care *Health Care for Some* shows that the haphazard way the US system allocates medical services using income race region insurance coverage and many other factors is a disorganized illogical and powerful form of rationing And unlike rationing in most countries which is intended to keep costs down rationing in the United States has actually led to increased costs resulting in the most expensive health care system in the world While most histories of US health care emphasize failed policy reforms *Health Care for Some* looks at the system from the ground up in order to examine how rationing is experienced by ordinary Americans and how experiences of rationing have led to claims for a right to health care By taking this approach Hoffman puts a much needed human face on a topic that is too often dominated by talking heads A well researched readable primer on the development of the complex fragmented US medical system Times Higher Education **Rationing Health Care**

Stephen Harrison, David J. Hunter, 1994 What mechanisms should be used to ration health care what criteria should guide decisions and who should decide Examines ways and means of rationing from queuing to QALys Desperately Seeking Solutions David J. Hunter, 2018-10-08 Following the Governments health reforms in 1991 rationing has been put firmly on the agenda This book identifies and clarifies the numerous political and ethical issues surrounding rationing in healthcare Drawing upon international examples it offers a critical overview of the approaches to rationing and makes practical proposals for its management Desperately Seeking Solutions challenges the assumption that all health services are inherently subject to rationing as demand invariably outstrips supply and examines this within a comparative framework The author critically evaluates the extent to which rationing has always existed and should exist within the NHS although until recently it operated on an implicit rather than explicit basis and was bound up with clinical judgements rather than purely financial considerations The author questions whether calls for explicit rationing are actually desirable and potentially feasible *Why Ration Health Care?* Heinz Redwood, 2000 The National Health Service provides poor quality health care compared with systems in other developed countries In this book Heinz Redwood makes detailed comparisons between the UK France Germany and the USA in order to demonstrate just how wide the gap between Britain and the rest of the developed world has become We spend less of our national wealth on health than countries at a similar level of economic development In terms of numbers of doctors and nurses the UK is closer to Mexico and Turkey than it is to France and Germany As a result we find ourselves denied the standard of care which people in other countries take for granted or else we wait so long that some patients die before reaching the head of the queue **Future Issues in Health Care** David Mechanic, 1979 This book considers the people and the policies involved in the health arena in such a way that our full range of social and political options becomes clear Aware that financial problems tend to dominate all other considerations it presents an analytical scheme that encompasses both long and short term approaches to some of the most crucial areas of health care concern Problems of cost containment patient attitudes towards the medical marketplace and how to change them behavioral models in health education problems of the mentally ill the aged and other requiring long term care *The Ethics of Health Care Rationing: An Introduction* Greg Bogner, Iwao Hirose, 2014-06-05 Should organ transplants be given to patients who have waited the longest or need it most urgently or those whose survival prospects are the best The rationing of health care is universal and inevitable taking place in poor and affluent countries in publicly funded and private health care systems Someone must budget for as well as dispense health care whilst aging populations severely stretch the availability of resources The Ethics of Health Care Rationing is a clear and much needed introduction to this increasingly important topic considering and assessing the major ethical problems and dilemmas about the allocation scarcity and rationing of health care Beginning with a helpful overview of why rationing is an ethical problem the authors examine the following key topics What is the value of health How can it be measured What does it mean that a treatment is good value for money What sort of

distributive principles utilitarian egalitarian or prioritarian should we rely on when thinking about health care rationing Does rationing health care unfairly discriminate against the elderly and people with disabilities Should patients be held responsible for their health Why does the debate on responsibility for health lead to issues about socioeconomic status and social inequality Throughout the book examples from the US UK and other countries are used to illustrate the ethical issues at stake Additional features such as chapter summaries annotated further reading and discussion questions make this an ideal starting point for students new to the subject not only in philosophy but also in closely related fields such as politics health economics public health medicine nursing and social work Rationing and Resource Allocation in Healthcare

Ezekiel Emanuel,Harald Schmidt,Andrew Steinmetz,2018-05-10 Budgets of governments and private insurances are limited Not all drugs and services that appear beneficial to patients or physicians can be covered Is there a core set of benefits that everyone should be entitled to If so how should this set be determined Are fair decisions just impossible if we know from the outset that not all needs can be met While early work in bioethics has focused on clinical issues and a narrow set of principles in recent years there has been a marked shift towards addressing broader population level issues requiring consideration of more demanding theories in philosophy political science and economics At the heart of bioethics new orientation is the goal of clarity on a complex set of questions in rationing and resource allocation Rationing and Resource Allocation in Healthcare Essential Readings provides key excerpts from seminal and pertinent texts and case studies about these topics contextualized by original introductions The volume is divided into three broad sections Conceptual Distinctions and Ethical Theory Rationing and Resource Allocation Containing the most important and classic articles surrounding the theoretical and practical issues related to rationing and how to allocate scarce medical resources this collection aims to assist and inform those who wish to be a part of bioethics 21st century shift including practitioners and policy makers and students and scholars in the health sciences philosophy law and medical ethics **EBOOK: Reasonable Rationing** Chris

Ham,Robert Glenn,2003-05-16 Reasonable Rationing is must reading for those interested in how to connect theory about fair rationing processes to country level practices The five case studies reveal a deep tension between political pressures to accommodate interest group demands and ethically motivated efforts to improve both information and institutional procedures for setting fair limits to care The authors frame the issues insightfully Professor Norman Daniels Harvard School of Public Health How are different countries setting priorities for health care What role does information and evidence on cost and effectiveness play How are institutions contributing to priority setting What are the lessons for policy makers Priority setting in health care is an issue of increasing importance Choices about the use of health care budgets are inescapable and difficult A number of countries have sought to strengthen their approach to priority setting by drawing on research based evidence on the cost and effectiveness of different treatments This book brings together leading experts in the field to summarize and analyse the experience of priority setting in five countries Canada The Netherlands New Zealand Norway and the United

Kingdom Drawing on literature from a range of disciplines it makes a significant contribution to the debate on the role of information and institutions in priority setting Reasonable Rationing has been written with a broad readership in mind It will be of interest to policy makers health care professionals and health service managers as well as students of health and social policy at advanced undergraduate and postgraduate levels **Can We Say No?** Henry J. Aaron, William B.

Schwartz, 2005-11-21 Examines the use of rationing as a means to curb health care spending using the experience of Great Britain to highlight the promises and pitfalls of this approach Provided by publisher *Making Medical Spending Decisions*

Mark A. Hall, 1997 This book explores the making of health care rationing decisions through the analysis of three alternative decision makers patients paying out of pocket officials setting limits on treatments and coverage and physicians at the bedside Hall develops this analysis along three dimensions political economics ethics and law The economic dimension addresses the practical feasibility of each method The ethical dimension discusses the moral aspects of these methods while the legal dimension traces the most recent developments in jurisprudence and health law **Rationing Health Care**

Alameda County Health Care Services Agency (Calif.), 1989 *Rationing Health Care* Association of Community Health Councils, 1993 *Rationing Health Care* André den Exter, Martin Buijsen, M. A. J. M. Buijsen, 2012

Medical need is a factor in health care access decision making but merit considerations are becoming important too In the shortening of waiting time priority arrangements are considered and or introduced based on non medical criteria Simultaneously in terms of financing health status has become important due to payment arrangements limited insurance package options etc At the same time health status disparities due to socioeconomic inequalities seem to be increasing Under these circumstances confronted with increased health spending it is expected that rationing will become more eminent Due to this the emerging relevant

questions are Who will be responsible for rationing the market governments bureaucrats physicians or others How does it function explicit or implicit What are relevant and acceptable selection criteria QUALYs DALYs health status sex age etc To what extent is current rationing just What can be done to make it more just Just Caring Leonard M. Fleck, 2009-03-30

What does it mean to be a just and caring society when we have only limited resources to meet unlimited health care needs Do we believe that all lives are of equal value Is human life priceless Should a just and caring society refuse to put limits on health care spending In Just Caring Leonard Fleck reflects on the central moral and political challenges of health reform today He cites the millions of Americans who go without health insurance thousands of whom die prematurely unable to afford the health care needed to save their lives Fleck considers these deaths as contrary to our deepest social values and makes a case for the necessity of health care rationing decisions The core argument of this book is that no one has a moral right to impose rationing decisions on others if they are unwilling to impose those same rationing decisions on themselves in the same medical circumstances Fleck argues we can make health care rationing fair in ways that are mutually respectful if we engage in honest rational democratic deliberation Such civic engagement is rare in our society but the alternative is

endless destructive social controversy that is neither just nor caring *The Ethics of Health Care Rationing* John
Butler, 1999 This volume explains why and in what ways health care is being rationed in the late 1990s health service It
examines the ethical questions which arise from this rationing and includes personal case studies from surgeons to geriatric
advisors Our Certain Fate Alan Maynard, Karen Bloor, 1998 **Health Care Rationing** , 1994
