Broadwater,2012-02-27 A hundred and fifty years ago naval warfare entered a new phase with the introduction of ironclad vessels On March 9 1862 the USS Monitor prototype of this new class of warships fought the Confederate ironclad CSS Virginia at Hampton Roads Virginia after the Virginia had ravaged the Union fleet blockading the James River sinking larger seemingly more powerful wooden warships in a potent demonstration of the power of an armored heavily gunned steam powered warship In the world s first clash between iron armored warships Monitor and Virginia exchanged gunfire at close range for nearly four hours Neither inflicted serious damage on the other While a technical stalemate the events at Hampton Roads changed naval warfare forever In the United States and abroad iron and steam would soon replace wood and sail for warship construction Less than nine months later the now famous Monitor was under tow heading south to Beaufort North Carolina when she sank in heavy seas with substantial loss of life Monitor was a total and irretrievable loss even the location of her final resting place became a mystery Not until 1973 was the inverted hull located and in 1974 excavation of the wreck began under the auspices of the National Oceanic and Atmospheric Administration in partnership with the US Navy The decision to place the Monitor in a protected zone a national marine sanctuary marked another historic first for the vessel The story of this decision the raising of the turret and the subsequent management of the historic resource adds another layer of history to the Monitor s fascinating story Sidebars in the book

flesh out details and add anecdotal color to the story of Monitor and of the efforts to preserve and interpret the site Lavish illustrations photographs site drawings and artifact sketches complement the informative and highly readable account by the archaeologist who planned and directed the major expeditions that resulted in recovery of many of the Monitor s most significant objects as well as the remains of two Union soldiers who were only recently interred in Arlington National Cemetery more than 150 years after their deaths The Natural History of the Snakes and Lizards of Iowa Terry VanDeWalle,2022-08-10 This book is an in depth look at the natural history of each snake and lizard species subspecies found in Iowa Each of the thirty three species accounts includes a sampling of the common names the species has been known by in the past the first specimens collected in the state and a brief history of the early Iowa literature related to the species along with a complete description and a discussion of similar species distribution in the state habitat behavior threats foods and feeding and reproduction While readers will be able to identify Iowa s snakes and lizards through its species accounts identification keys and beautiful photographs and illustrations this book is intended to be more than a field guide What makes it truly unique is the comparison of historic data collected by Iowa herpetologists in the 1930s and 1940s with data collected by the author along with James L Christiansen and others since 1960 Custom maps show the reader how species distributions have changed over time *Modeling Habitat Ecology and Population Viability of the Eastern Massasauga Rattlesnake in Southwestern Lower Michigan* Kristin Marie Bissell,2006 **Federal Register** ,2013-08 **Issues in the Ecological Study of Learning** T.
