Pratt, 2007-07-01 Houston's meteoric rise from a bayou trading post to the world's leading oil supplier owes much to its
geography geology and climate the large natural port of Galveston Bay the lush subtropical vegetation the abundance of
natural resources But the attributes that have made it attractive for industry energy and urban development have also made
it particularly susceptible to a variety of environmental problems *Energy Metropolis* presents a comprehensive history of the
development of Houston examining the factors that have facilitated unprecedented growth and the environmental cost of that
development The landmark Spindletop strike of 1901 made inexpensive high grade Texas oil the fuel of choice for ships

the Houston Ship Channel connected the city to the Gulf of Mexico and international trade markets Oil refineries sprouted up
and down the channel and the petroleum products industry exploded By the 1920s Houston also became a leading producer
of natural gas and the economic opportunities and ancillary industries created by the new energy trade led to a population
boom By the end of the twentieth century Houston had become the fourth largest city in America Houston's expansion came
at a price however Air water and land pollution reached hazardous levels as legislators turned a blind eye Frequent flooding
of altered waterways deforestation hurricanes the energy demands of an air conditioned lifestyle increased automobile traffic
exponential population growth and an ever expanding metropolitan area all escalated the need for massive infrastructure
improvements The experts in *Energy Metropolis* examine the steps Houston has taken to overcome laissez faire politics
