R.D. Laing ,1971 **Recreating Sexual Politics (Routledge Revivals)** Victor Seidler,2009-12-15 This thought provoking book first published in 1991 examines sexual politics in a world which is being radically changed by the challenges of feminism Seidler explores how men have responded to feminism and the contradictory feelings men have towards dominant forms of masculinity Seidler s stimulating and original analysis of social and political theory connects personally to everyday issues in people s lives It reflects the growing importance of sexual and personal politics within contemporary politics and culture and demonstrates clearly the challenge that feminism brings to our inherited forms of morality politics and sexuality **Recreating Sexual Politics** Victor J. Seidler,2009-10-23 First published in 1991 this title examines sexual politics in a world which is being radically changed by the challenges of feminism Seidler explores how men have responded to feminism and the contradictory feelings men have towards dominant forms of masculinity **Existential Counselling & Psychotherapy in Practice** Emmy van Deurzen,2012-10-19 Offering a concrete framework and practical methods for working from an existential perspective the bestselling Existential Counselling and Psychotherapy is now in its third edition Central to the book is the belief that many of our problems arise out of the essential paradoxes of human existence rather than from personal pathology From this perspective the purpose of counselling and therapy is not viewed as problem solving but as a mean of enabling people to come to terms with living life as it is with all its inherent contradictions Emmy van Deurzen a leading existential philosopher and therapist presents a practical method of working using systematic observation clarification and reflection to help clients rediscover their inner strengths She shows how personal assumptions values and talents once acknowledged can be turned to constructive use Using wide ranging case examples the author also demonstrates the effectiveness of the existential approach in many different situations from crisis work to dealing with chronic unhappiness The existential approach is a well respected form of psychotherapy but most writing on the subject tends to be heavily theoretical This book offers a practical and accessible alternative which will be invaluable to those in training as well as to more experienced practitioners **Existential Therapies** Mick Cooper,2016-10-18 What does it mean to practice therapy in an existential way What are the different existential approaches What are their strengths and limitations Focusing on practical face to face work with clients the book introduces students to six existential therapies highlighting areas of commonality and difference and discusses key figures and their contributions including Yalom van Deurzen Spinelli Frankl and Laing It outlines the critical perspectives and key debates and presents implications for practice reflection and further reading Fully updated to reflect current issues this book now includes Sections presenting research evidence for each approach An extended case study running through the book demonstrating how different therapies might approach the same case Chapter overviews questions for reflection and additional case studies of actual existential practice The Healing Virtues Duff William Ramus Waring,2016 The Healing Virtues explores the intersection of psychotherapy

and virtue ethics with an emphasis on the patient's role within a healing process. It considers how the common ground between the therapeutic process and the cultivation of virtues can inform the efforts of both therapist and patient. The ethics of psychotherapy revolve partly around what therapists should or should not do as well as the sort of person that therapists should be, e.g. empathic, prudent, compassionate, respectful, and trustworthy. Contemporary practitioners have argued for therapist virtues that are relevant to assisting the patient's efforts in a healing process. But the ethics of a therapeutic dialogue can also revolve around the sort of person the patient should be. Within this book, Drew Waring argues that there is a case for patient virtues that are relevant to dealing with the problems in living that arise in psychotherapy, e.g. honesty, courage, humility, perseverance. The central idea is that treatment may need to build virtues while it ameliorates problems. Hence the patient's work in psychotherapy can both challenge character strengths and result in their further development. The book is unique in bringing the topic of virtue ethics to the psychotherapeutic encounter and will be of interest to psychotherapists, philosophers, and psychiatrists.

A-Z Guide to Modern Social and Political Theorists Professor Stuart Sim, Noel Parker, 2014-06-03. The *A-Z Guide to Modern Social and Political Theories* is a companion volume to the already published *A-Z Guide to Modern Literary and Cultural Theorists*. It ranges widely through the social sciences and related areas to identify thinkers who have had a major impact on the development of modern social and political theory and given clear, accessible summaries of their work. While the accent is on the later twentieth century, several up-and-coming theorists are included to ensure a contemporary edge to the volume. Classic names in the field from the earlier twentieth century are not neglected, and the collection also delves back into the nineteenth century for such founding figures of the social sciences as Marx and Comte. The volume is therefore both up-to-date and mindful of the sources of modern debates.

Gender, Race and the National Education Association Wayne J. Urban, 2020-08-26. Social Constructionism, Discourse and Realism Ian Parker, 1998-06-18. This book charts a clear and accessible path through some of the key debates in contemporary psychology. Drawing upon the wider critical and discursive turn in the human sciences, *Social Constructionism, Discourse and Realism* explores comprehensively the many claims about what we can know of reality in social constructionist and discursive research in psychology. Relativist versus realist tensions go to the heart of current theoretical and methodological issues, not only within psychology but across the social and human sciences. By mapping the connections between theory, method, and politics in social research and placing these within the context of the broader social constructionist and discursive debates, the int.

Psychiatry in Crisis Vincenzo Di Nicola, Drozd Stoj Stoyanov, 2021-02-03 The field of academic psychiatry is in crisis everywhere It is not merely a health crisis of resource scarcity or distribution competing claims and practice models or level of development from one country to another but a deeper more fundamental crisis about the very definition and the theoretical basis of psychiatry The kinds of questions that represent this crisis include whether psychiatry is a social science like psychology or anthropology whether it is better understood as part of the humanities like philosophy history and literature or if the future of psychiatry is best assured as a branch of medicine based on genetics and neuroscience In fact the question often debated since the beginning of modern psychiatry concerns the biomedical model so that part of psychiatry's perpetual self questioning is to what extent it is or is not a branch of medicine This unique and bold volume offers a representative and critical survey of the history of modern psychiatry with deeply informed transdisciplinary readings of the literature and practices of the field by two professors of psychiatry who are active in practice and engaged in research and have dual training in scientific psychiatry and philosophy In alternating chapters presenting contrasting arguments for the future of psychiatry the two authors conclude with a dialogue between them to flesh out the theoretical research and practical implications of psychiatry's current crisis outlining areas of divergence consensus and fruitful collaborations to revision psychiatry today The volume is scrupulously documented but written in accessible language with capsule summaries of key areas of theory research and practice for the student and practitioner alike in the social and human sciences and in medicine psychiatry and the neurosciences
