Infinite Reach John E. Biersdorf, 2016-06-16 Infinite Reach Spirituality in a Scientific World connects and integrates the great spiritual insights with science and mathematics for the increasing numbers of Americans who consider themselves spiritual but not religious or spiritual and religious or none of the above and who no longer find traditional religious doctrines and institutions credible or matching their experience In nontechnical language it precisely and clearly traces how current brain mind research informs and enhances inner spiritual and religious experience and how scientific cosmology confirms spiritual intuitions From hunting gathering prehistory through city states empires and the great religions scientific methods advance exponentially faster into the future while the great spiritual insights have never been surpassed though often ignored or denied But scientific knowing and spiritual knowing share infinite reach Brain mind research contributes to understanding and living meditation and spiritual practices in silence ritual and vision Modern physics and mathematics demonstrate how humans observe and participate in the actual evolution of the universe Fractals in chaos theory are spiritual images of ultimate reality In creating loving and undifferentiated presence we find our own unique voice in the mystery of ultimate reality touching down here and now in the specifics of this present moment

Through Vegetal Being Luce Irigaray, Michael Marder, 2016-07-05 Blossoming from a correspondence between Luce Irigaray and Michael Marder Through Vegetal Being is an intense personal philosophical and political meditation on the significance of the vegetal for our lives our ways of thinking and our relations with human and nonhuman beings The vegetal world has the potential to rescue our planet and our species and offers us a way to abandon past metaphysics without falling into nihilism Luce Irigaray has argued in her philosophical work that living and coexisting are deficient unless we recognize sexual difference as a crucial dimension of our existence Michael Marder believes the same is true for vegetal difference Irigaray and Marder consider how plants contribute to human development by sustaining our breathing nourishing our senses and keeping our bodies and minds alive They note the importance of returning to ancient Greek tradition and engaging with Eastern teachings to revive a culture closer to nature As a result we can reestablish roots when we are displaced and recover the vital energy we need to improve our sensibility and relation to others This generative discussion points toward a more universal way of becoming human that is embedded in the vegetal world

Last Tape on Stage in Translation Burç İdem Dinçel, 2011-11-15 Samuel Beckett's theatrical works maintain a prominent position within contemporary theatre His plays provide a prodigious potential to study several forms of acting staging and dramaturgy as well as language and translation thereby setting a fertile ground to tackle the problematic issue of the relationship between theatre criticism and theatre translation criticism That is precisely what this study examines by drawing attention to the fundamental characteristics of translated theatre texts as blueprints for productions and taking several aspects into account from directing to acting from staging to performance together with the language factor To that end Burç İdem Dinçel focuses on one of Beckett's most significant plays namely Krapp's Last Tape situating it within the author's oeuvre and along the way scrutinising not only the theatrical pieces but also the prose By looking into the Turkish translations and productions of the play this book brings forth a new dimension into approaching theatre through translation
