Douglas Fairbanks and the American Century John C. Tibbetts, James M. Welsh, 2014-06-02

Douglas Fairbanks and the American Century brings to life the most popular movie star of his day, the personification of the Golden Age of Hollywood. At his peak in the teens and 1920s, the swashbuckling adventurer embodied the new American century of speed, opportunity, and aggressive optimism. The essays and interviews in this volume bring fresh perspectives to his life and work, including analyses of films never before examined. Also published here for the first time in English is a first-hand production account of the making of Fairbanks's last silent film, *The Iron Mask*. Fairbanks (1883-1939) was the most vivid and strenuous exponent of the American Century, whose dominant mode after 1900 was the mass marketing of a burgeoning democratic optimism at home and abroad. During those first decades of the twentieth century, his satiric comedy adventures shadow-boxed with the illusions of class and custom. His characters managed to combine the American easterner's experience and pretension and the westerner's promise and expansion. As the masculine personification of the Old World aristocrat and the New World self-made man tied to tradition yet emancipated from history, he constructed a uniquely American aristocrat striding into a new age and sensibility. This is the most complete account yet written of the film career of Douglas Fairbanks, one of the first great stars of the silent American cinema and one of the original United Artists, comprising Fairbanks, Mary Pickford, Charlie Chaplin, and D. W. Griffith. John C.

Tibbetts and James M Welsh's text is especially rich in its coverage of the early years of the star's career from 1915 to 1920 and covers in detail several films previously considered lost *Land and Water Conservation Fund Act and Related Programs* United States. Congress. House. Committee on Interior and Insular Affairs. Subcommittee on National Parks and Recreation, 1972

Original Sin Bleddyn E. Bowen, 2023-01-01 Space technology was developed to enhance the killing power of the state The Moon landings and the launch of the Space Shuttle were mere sideshows drawing public attention away from the real goal military and economic control of space as a source of power on Earth Today as Bleddyn E Bowen vividly recounts thousands of satellites work silently in the background to provide essential military intelligence and economic capabilities No major power can do without them Beyond Washington Moscow and Beijing truly global technologies have evolved from the ground floor of the nuclear missile revolution to today's orbital battlefield shaping the wars to come World powers including India Japan and Europe are fully realizing the strategic benefits of commanding Earth's cosmic coastline as a stage for war development and prestige Yet as new contenders spend more and more on outer space there is scope for cautious optimism about the future of the Space Age if we can recognize rather than hide its original sin
