A Dictionary of Japanese Loanwords Toshie M. Evans, 1997-05-28 Recent studies report that Japanese is the second most productive source of new loanwords to English Such studies indicate that English speaking countries are paying more attention to Japan than ever before This dictionary lists and defines hundreds of terms borrowed from Japanese that are now used in English language publications Entries provide variant spellings pronunciation etymological information definitions and illustrative quotations These quotations were collected from books newspapers magazines novels texts advertisements and databases published or distributed in the United States between 1964 and 1995 When countries engage in a significant amount of commercial or cultural contact they frequently borrow words from each other's language These loanwords are assimilated to varying degrees and show how one country gains exposure to another country's culture Recent studies report that Japanese is the second most productive source of new loanwords to English showing that English speaking countries are paying more attention to Japan than ever before This dictionary includes entries for hundreds of Japanese terms now used in English language publications Included are terms from art and architecture medicine and the sciences business and education philosophy and religion and numerous other fields Entries provide definitions pronunciations variant spellings etymological histories and illustrative quotations These quotations were collected from books newspapers magazines novels texts advertisements and databases all of which were published or distributed in the United States between 1964 and 1995 While the volume is a valuable guide to the meaning and assimilation of particular loanwords it is also a fascinating chronicle of how certain elements of Japanese culture have strongly influenced American civilization

Nobel Universal Graphical Language Milan Randic, 2010-05-24 Nobel is a pictographic language based on some 120 basic signs and many arrows of different shape that are mutually combined It is named after Alfred Nobel 1833-1896 Swedish chemist and industrialist inventor of dynamite who left most of his fortune to a foundation that annually gives awards to individuals whose work is characterized as greatest benefit to mankind known as Nobel Prizes Besides the awards for sciences and literature significantly Alfred Nobel included among others a prize for peace that besides individuals also organizations may obtain Although it would be utopian to believe that human conflicts could be avoided if communication tools would improve the

emergence of universal languages certainly cannot make the situation worse Universal languages are a communication tool which makes it possible for people of no common language to communicate They are graphic but they should be distinguished from picture writings which only passively offer information on some event or give messages Universal languages have more similarity with the sign languages that are used for people who lost hearing or the sign language of American Plains Indians who spoke different languages and could communicate by sign language that they developed However written language has some advantages over hand sign languages in that one can communicate at a great distance particularly today in the age of fax and computer communications and that one can leave messages for posterity This is not the place to argue for or against the promise of written sign languages Graphic written sign languages exist today and the best known are Chinese characters used in China and Japan The problem with Chinese characters is that there are too many characters and it is difficult to learn so many It takes years for children in China and Japan to learn so many different characters and the task would be even harder for grown people to learn if they have not done this when young Nobel is designed to remove this difficulty and is based on the following requirements 1 SMALL NUMBER OF BASIC SIGNS 2 SIGNS SHOULD BE EASY TO RECOGNIZE 3 SIGNS SHOULD BE EASY TO REPRODUCE 4 COMBINATIONS LIMITED TO THREE SIGNS 5 COMPLEMENTARY We have already mentioned that Nobel uses about 120 basic signs which can be viewed as a small number particularly in view of over 100 signs of Nobel that are so obvious that they can be easily absorbed The other requirements are also very important There are many signs that can be easily recognized but in order to be acceptable for Nobel they also need to be easily reproduced because that will facilitate communication Also when making combinations of signs one has to make some restriction in order to maintain clarity so we decided to have no more than three signs combined into single word Finally the last requirement that of complementarities needs some explanation Besides having signs that one can easily recognize and easily draw one needs some structure to be embedded into composition of signs that facilitates one to remember and learn signs easily We refer to this structure as complementary or broadly speaking associational and what it implies is that words and objects that are related should have related signs Thus for example pairs of words like man woman cat dog coffee tea good bad love hate etc should have signs that are in some opposition while words like smoke flame fire tree wood forest water sea ocean good better best should have signs that are in competition With this in mind when one sees and learns the basic signs the meaning of many combinations of signs can be in advance anticipated This helps one to learn Nobel rather fast not months not weeks perhaps not even days but a couple of hours may suffice that one may learn hundreds and hundreds of words In this respect Nobel may be unique among languages written spoken of

The Fall of Language in the Age of English Minae Mizumura,2015-01-06 Winner of the Kobayashi Hideo Award The Fall of Language in the Age of English lays bare the struggle to retain the brilliance of one s own language in this period of English language dominance Born in Tokyo but raised and educated in the United States Minae Mizumura acknowledges the value of a universal language in the pursuit of knowledge yet also embraces the different ways of understanding offered by multiple tongues She warns against losing this precious diversity Universal languages have always played a pivotal role in advancing human societies Mizumura shows but in the globalized world of the Internet English is fast becoming the sole common language of humanity The process is unstoppable and striving for total language equality is delusional and yet particular kinds of knowledge can be gained only through writings in specific languages Mizumura calls these writings texts and their ultimate form literature Only through literature and more fundamentally through the diverse languages that give birth to a variety of literatures can we nurture and enrich humanity Incorporating her own experiences as a writer and a lover of language and embedding a parallel history of Japanese Mizumura offers an intimate look at the phenomena of individual and national expression
