Reading Comprehension in Polish and English Monika Kusiak,2013-06-01 This book is about reading Throughout the book the author explains the complexity of the dual language involvement of FL L2 reading by showing how L1 and FL L2 factors interplay in FL L2 reading The main aim of the book is to explore reading in English in the foreign second language context as a cross linguistic phenomenon and to present the results of a think aloud study which investigated reading in Polish as the L1 and English as the FL of Polish learners of English The project consisted of six stages each focussing on a different aspect of reading Thus the following was explored reading strategies problems and solutions the way the subjects constructed their representations of the texts the students individual patterns of developing comprehension and effectiveness in identifying the main ideas The findings revealed both differences and similarities between the subjects reading in Polish and their reading in English The book offers implications for further research and elucidates the usefulness of think aloud protocols in foreign language instruction Verbal Protocols of Reading Michael Pressley,Peter Afflerbach,2012-12-06

Researchers from a variety of disciplines have collected verbal protocols of reading as a window on conscious reading processes Because such work has occurred in different disciplines many who have conducted verbal protocol analyses have been unaware of the research of others This volume brings together the existing literature from the various fields in which verbal protocols of reading have been generated In so doing the authors provide an organized catalog of all conscious verbal processes reported in studies to date the most complete analysis of conscious reading now available in the literature When the results of all of the studies are considered there is clear support for a number of models of reading comprehension including reader response theories schema perspectives executive processing models and bottom up approaches such as the one proposed by van Dijk and Kintsch The summary of results also demonstrates that none of the existing models goes far enough Thus a new framework constructively responsive reading is described This new model encompasses reader response schematic and executive processing and induction from word and phrase level comprehension to higher order meaning The important concept in this new model is that readers respond to bits and pieces of text as they are encountered all as part of the overarching goal of constructing meaning from text This volume also includes a critical review of the thinking aloud methodology as it has been used thus far This examination suggests that it continues to be an immature methodology and that much work is needed if a complete theory of conscious processing during reading is to be developed via verbal protocol analysis Finally after reviewing what has been accomplished to date the authors provide extensive discussion of the work that remains to be done and the adequacy of the verbal protocol methodology for permitting telling conclusions about text processing **Powerful Thinking** Adrienne Gear,2024-03-18 An inspiring book to help teachers shift their beliefs and
