

11+ Verbal Reasoning: Reading Information

In these questions you need to read the information you are given carefully. After you have read the information given you will then need to determine which of the statements is true.

11+

Joe is older than Ian and
John. Maria is younger
than John. Maria is older than John. Which
statement is true? Determine which of the
statements below is correct.

First, we need to read the information carefully. The first piece of information we are given is that John is three years older than Ian. From this, we cannot rule out any of the statements below.

We then find out that Maria is older than John. Reading both of these pieces of information, we can now rule out the first, second and third options as we now know that Maria isn't the youngest, John is not the eldest, and that Ian is not older than Maria.

We can use the remaining information to check statement number three to check that this one is true. We already know that Ian is younger than John and the information that Maria is younger than John but older than John means she will also be older than Ian, and that the statement Maria is older than John and Ian is correct.

1. It takes Henry twenty minutes to walk to school and it takes Hugo half that time. It takes Maria three times the amount of time that it takes Henry to walk to school and takes Toby a quarter of the time it takes Maria to get there. The time across the street from school as it takes two minutes to walk there. Using this information, determine which of the statements below is correct.

- ☐ Toby takes longer to walk to school than Hugo.
- ☐ Henry's walk to school is shorter than Toby's.
- ☐ Hugo's and Maria's journey to school takes the same amount of time.
- ☐ The bus for longest journey to school.
