The Idea of a Writing Laboratory Neal Lerner, 2009-07-09 The Idea of a Writing Laboratory is a book about possibilities about teaching and learning to write in ways that can transform both teachers and students Author Neal Lerner explores higher education s rich history of writing instruction in classrooms writing centers and science laboratories By tracing the roots of writing and science educators recognition that the method of the lab hands on student activity is essential to learning Lerner offers the hope that the idea of a writing laboratory will be fully realized more than a century after both fields began the experiment Beginning in the late nineteenth century writing instructors and science teachers recognized that mass instruction was inadequate for a

burgeoning non traditional student population and that experimental or laboratory methods could prove to be more effective Lerner traces the history of writing instruction via laboratory methods and examines its successes and failures through case studies of individual programs and larger reform initiatives Contrasting the University of Minnesota General College Writing Laboratory with the Dartmouth College Writing Clinic for example Lerner offers a cautionary tale of the fine line between experimenting with teaching students to write and curing the students of the disease of bad writing The history of writing within science education also wends its way through Lerner s engaging work presenting the pedagogical origins of laboratory methods to offer educators in science in addition to those in writing studies possibilities for long sought after reform The Idea of a Writing Laboratory compels readers and writers to don those white coats and safety glasses and discover what works and asserts that teaching writing as an experiment in what is possible as a way of offering meaning making opportunities for students no matter the subject matter is an endeavor worth the struggle The Complete Home Learning Sourcebook Rebecca Rupp,1998 Lists all the resources needed to create a balanced curriculum for homeschooling from preschool to high school level A New Writing Classroom Patrick Sullivan,2014-07-15 In A New Writing Classroom Patrick Sullivan provides a new generation of teachers a means and a rationale to reconceive their approach to teaching writing calling into question the discipline s dependence on argument Including secondary writing teachers within his purview Sullivan advocates a more diverse exploratory and flexible approach to writing activities in grades six through thirteen A New Writing Classroom encourages teachers to pay more attention to research in learning theory transfer of learning international models for nurturing excellence in the classroom and recent work in listening to teach students the sort of dialogic stance that leads to higher order thinking and more sophisticated communication The conventional argumentative essay is often a simplistic form of argument widely believed to be the most appropriate type of writing in English classes but other kinds of writing may be more valuable to students and offer more important kinds of cognitive challenges Focusing on listening and dispositions or habits of mind as central elements of this new composition pedagogy A New Writing Classroom draws not just on composition studies but also on cognitive psychology philosophy learning theory literature and history making an exciting and significant contribution to the field *El-Hi Textbooks in Print* ,1984 **Why Johnny Can't Write** Myra J. Linden,Arthur Whimbey,2012-12-06 The authors of this book both experienced teachers examine the controversy surrounding two popular methods for teaching writing the process approach and its offspring Writing Across the Curriculum Both have recently been called into question for their ineffectiveness An alternative lesser known procedure called sentence combining which has been proven successful in numerous studies over the past fifteen years finally is gaining the attention it deserves Using the sentence combining approach the authors present a rationale for re thinking and re tooling the English classroom and consequently making the entire educational system work more effectively This book is useful for teachers at any level especially those involved in writing instruction It is also worthwhile
