Reading Capital's Materialist Dialectic Nick Nesbitt,2024-05-27 While the explicit Althusserian engagement with Marx's Capital remained largely limited to Reading Capital after 1968 Nick Nesbitt argues this theoretical intervention remained insistent adopting the form of a general theory of materialist dialectic The book thus analyzes the Althusserianist theory of a materialist dialectic across diverse sites including Althusser's unpublished archive Macherey's exposition of Spinoza's Ethics and Badiou's Logics of Worlds while simultaneously bringing this fully developed theory of materialist dialectic to bear anew on the reading of Capital itself to show that Spinoza's influence on Marx is far greater and that of Hegel increasingly diminishing than has been previously thought

The Sauropods Kristina Curry Rogers,Jeffrey Wilson,2005-12-16 Sauropod dinosaurs were the largest animals ever to walk the earth and they represent a substantial portion of vertebrate biomass and biodiversity during the Mesozoic Era The story of sauropod evolution is told in an extensive fossil record of skeletons and footprints that span the globe and 150 million years of earth history This generously illustrated volume is the first comprehensive scientific summary of sauropod evolution and paleobiology The contributors explore sauropod anatomy detail its variations and question the myth that life at large size led to evolutionary stagnation and eventual replacement by more advanced herbivorous dinosaurs Chapters address topics such as the evolutionary history and diversity of sauropods methods for creating three dimensional reconstructions of their skeletons questions of sauropod herbivory tracks gigantism locomotion reproduction growth rates and more This book together with the recent surge in

Parsons, 2001-10-01 are dinosaurs social constructs Do we really know anything about dinosaurs Might not all of our beliefs about dinosaurs merely be figments of the paleontological imagination A few years ago such questions would have seemed preposterous even nonsensical Now they must have a serious answer At stake in the Science Wars that have raged in academe and in the media is nothing less than the standing of science in our culture One side argues that science is a social construct that it does not discover facts about the world but rather constructs artifacts disguised as objective truths This view threatens the authority of science and rejects science's claims to objectivity rationality and disinterested inquiry Drawing Out Leviathan examines this argument in the light of some major debates about dinosaurs the case of the wrong headed dinosaur the dinosaur heresies of the 1970s and the debate over the extinction of dinosaurs Keith Parsons claims that these debates though lively and sometimes rancorous show that evidence and logic not arbitrary rules of the game remained vitally important even when the debates were at their nastiest They show science to be a complex set of activities pervaded by social influences and not easily reducible to any stereotype Parsons acknowledges that there are lessons to be learned by scientists from their would be adversaries and the book concludes with some recommendations for ending the Science Wars Architecture Reading Lists and Course Outlines: Architectural design Architectural theory, history and criticism Human behavior Professional practice Special topics Urbandesign theory and history Georgia Bizios, 1998 **Modern American Reading Practices** P.
