**Linguistic Perspectives on Language and Education** Anita K. Barry,2002-12-30 Language issues are intrinsically part of every classroom setting Therefore there is a need to present the linguistic perspective to all teachers and teachers in training This perspective assumes that a complex system is learned by children at an early age with little conscious instruction It recognizes that languages change over time and that variation based on region ethnic identity gender social class and social context is inherent to language Focusing more on the practical than the theoretical Barry aims to engage teachers and education students in discussion of the relevance of linguistics to teaching and to encourage them to bring their own expertise to the discussion Based on the research of scholars in linguistics and related disciplines Barry s volume helps teachers synthesize some of the foundations of classic linguistic study with important current findings She starts by acquainting the reader with fundamentals of linguistics then she moves on to discussions of teaching grammar and the history of English orthography An entire chapter is devoted to the process of child language acquisition and another to the obstacles that some people face when attempting to learn a language The work concludes with pieces on language policies and language literacy Group exercises and suggested projects are included to facilitate the exchange between linguistics and education The book is a must for those interested in the fundamental role of language in education

**Dyslexia in First and Foreign Language Learning** Monika Lodej, 2016-08-17 According to International Educational Statistics 2008 there are total of 654 9 million school age children in the world. If dyslexia affects 10 15% of these youth Fletcher et al 2007 this translates to approximately 65 98 million students with difficulties in reading and writing. The EU strategic plan for education 2010 recognises the need for EU citizens to speak a foreign language. As such foreign language courses are introduced on an obligatory basis at the primary level of education. Dyslexic students are not exempt from this regulation and thus are confronted with different language systems that must be mastered. The difficulty here escalates if the systems differ significantly in their levels of orthographic transparency. Reading and writing are operationalised by the same biological functions that are defined by the universal perspective. However language systems differ in terms of their transparency for example English and French are considered opaque scripts whereas Spanish and Italian are described as transparent orthographies. These differences are discussed in this book as part of the language specific perspective which can in turn raise questions such as Is a dyslexic

student equally impaired in any language they study and Is the type of difficulty primarily dependent on the language system or is it rather a dyslexia syndrome This volume provides answers through a synthesis of research on reading difficulties in first and foreign languages and existing taxonomies of dyslexia sub types     *A Linguistic Approach to the Study of Dyslexia*  
Gloria Cappelli,Sabrina Noccetti,2022-08-19 This volume contributes to the growing body of research on developmental dyslexia focusing on the disorder's behavioural manifestations at different levels of the language system It is organised into three sections that cover the three main vantage points from which the effects of dyslexia on communication can be observed neuropsychology linguistics and the perspective of educators Together the chapters provide an insightful overview of the ways in which dyslexia impacts different components of language including lexical and pragmatic abilities and present data from experimental and applied research with suggestions for the application of research based data in both innovative and traditional language teaching ways to rehabilitate reading dysfunctions as well as teacher training The book will be essential reading for researchers and students investigating dyslexia as well as foreign language teachers and professionals who work on the rehabilitation of linguistic performance dysfunctions in people with dyslexia     **Cross-Language Studies of**
