Reading Capital:

Reading Capital Louis Althusser, Etienne Balibar, 2009-06-09 Establishing a rigorous program of symptomatic reading that cuts through the silences and lacunae of Capital to reveal its philosophical core Louis Althusser interprets Marx's structural analysis of production as a revolutionary break the basis of a completely new science Building on a series of Althusser's conceptual innovations that includes overdetermination and social formation Etienne Balibar explores the historical and structural facets of production as Marx understood them scrutinizing many of the most fundamental points in Capital as though for the first time *Reading Capital's Materialist Dialectic* Nick Nesbitt, 2024-05-27 While the explicit Althusserian engagement with Marx's Capital remained largely limited to Reading Capital after 1968 Nick Nesbitt argues this theoretical intervention remained insistent adopting the form of a general theory of materialist dialectic The book thus analyzes the Althusserianist theory of a materialist dialectic across diverse sites including Althusser's unpublished archive Macherey's exposition of Spinoza's Ethics and Badiou's Logics of Worlds while simultaneously bringing this fully developed theory of materialist dialectic to bear anew on the reading of Capital itself to show that Spinoza's influence on Marx is far greater and that of Hegel increasingly diminishing than has been previously thought *Reading 'Capital' Today* Ingo Schmidt, Carlo Fanelli, 2017-04-20 Recent years have seen a surge of interest in Marxian political economy and especially Marx's great work Capital 150 years after the book's original publication are there readings of Capital that can help us find new pathways to progressive or revolutionary change In this wide ranging new volume leading thinkers reflect on Capital's legacy its limitations and its continuing relevance for today highlighting issues including ecology gender race labour communism the Third World and imperialism The contributors also aim to identify the connections between Capital and various socialist projects of the past and draw lessons from those experiences that might contribute to the reinvention of socialist politics today Contributors include Ingo Schmidt Carlo Fanelli William Pelz Anej Korsika Prabhat Patnaik Silvia Federici Paul Thompson Chris Smith Peter Gose Justin Paulson Jeff Noonan Hannah Holleman and Peter Hudis *How to Read Marx's Capital* Michael Heinrich, 2021-08-23 An accessible companion to Karl Marx's essential Capital With the recent revival of Karl Marx's theory a general interest in reading Capital has also increased But Capital Marx's foundational nineteenth century work on political economy is by no means considered an easily understood text Central concepts such as abstract labor the value form or the fetishism of commodities can seem opaque to us as first time readers and the prospect of comprehending Marx's thought can be truly daunting Until that is we pick up Michael Heinrich's How to Read Marx's Capital Paragraph by paragraph Heinrich provides extensive commentary and lucid explanations of questions and quandaries that arise when encountering Marx's original text Suddenly such seemingly gnarly chapters as The Labor Process and the Valorization Process and Money or the Circulation of Capital become refreshingly clear as Heinrich explains just what we need to keep in mind when reading such a complex text Deploying multiple appendices referring to other pertinent writings

by Marx Heinrich reveals what is relevant about Capital and why we need to engage with it today How to Read Marx's Capital provides an illuminating and indispensable guide to sorting through cultural detritus of a world whose political and economic systems are simultaneously imploding and exploding **How to Read Marx's Capital** Stephen Shapiro, 2008-03-20 Capital Volume I is essential reading on many undergraduate courses but the structure and style of the book can be confusing for students leading them to abandon the text This book is a clear guide to reading Marx's classic text which explains the reasoning behind the book's structure and provides help with the more technical aspects that non-economists may find taxing Students are urged to think for themselves and engage with Marx's powerful methods of argument and explanation Shapiro shows that Capital is key to understanding critical theory and cultural production This highly focused book will prove invaluable to students of politics cultural studies and literary theory **Reading Capital** Louis Althusser, Etienne Balibar, 2009-06-09 Establishing a rigorous program of symptomatic reading that cuts through the silences and lacunae of Capital to reveal its philosophical core Louis Althusser interprets Marx's structural analysis of production as a revolutionary break the basis of a completely new science Building on a series of Althusser's conceptual innovations that includes overdetermination and social formation Etienne Balibar explores the historical and structural facets of production as Marx understood them scrutinizing many of the most fundamental points in Capital as though for the first time **The Concept in Crisis** Nick Nesbitt, 2017-07-20 The publication of Reading Capital by Louis Althusser Etienne Balibar Roger Establet Pierre Macherey and Jacques Rancière in 1965 marked a key intervention in Marxist philosophy and critical theory bringing forth a stunning array of concepts that continue to inspire philosophical reflection of the highest magnitude The Concept in Crisis reconsiders the volume's reading of Marx and renews its call for a critique of capitalism and culture for the twenty-first century The contributors who include Alain Badiou Etienne Balibar and Fernanda Navarro interrogate Althusser's contributions in particular within the context of what is surely the most famous collective reading of Marx ever undertaken Among other topics they offer a symptomatic critique of Althusser consider his writing as a materialist production of knowledge analyze the volume's conceptualization of value and crisis examine how leftist Latin American leaders like Che Guevara and Subcomandante Marcos engaged with Althusser and Reading Capital and draw out the volume's implications and use for feminist theory and praxis Retrieving the inspiration that drove Althusser's reinterpretation of Marx The Concept in Crisis explains why Reading Capital's revolutionary inflection retains its critical appeal prompting readers to reconsider Marx's relevance in an era of neoliberal capitalism Contributors Emily Apter Alain Badiou Etienne Balibar Bruno Bosteels Adrian Johnston Warren Montag Fernanda Navarro Nick Nesbitt Knox Peden Nina Power Robert J C Young **Profane Illumination** Margaret Cohen, 1993-07-12 Margaret Cohen's encounter with Walter Benjamin one of the twentieth century's most influential cultural and literary critics has produced a radically new reading of surrealist thought and practice Cohen analyzes the links between Breton's surrealist fusion of psychoanalysis and Marxism and Benjamin's post-Enlightenment

challenge to Marxist theory She argues that Breton's surrealist Marxism played a formative role in shaping postwar French intellectual life and is of continued relevance to the contemporary intellectual scene *The Thought of Matter* Richard A. Lee Jr., 2015-12-18 Discussions of materialism have exploded in recent years From the speculative realism materialism of Quentin Meillassoux to the New Materialism of many modern Marxisms the interest in a return to or rehabilitation of materialism is on the rise What is not analyzed in many of these discussions however is a trenchant methodological and metaphysical problem lying at the basis of any philosophical materialism if matter is simply that which is other than thought then how can it be thought without drawing it away from its materiality On the other hand if one assumes a direct access to matter to this other what are the conditions of that access Are they material conditions or cognitive thought conditions Does what would present itself immediately present at the same time the conditions that allow it to be presented If not then we are closer to a theology of matter and further from a philosophical materialism *The Thought of Matter* investigates this metaphysical and methodological problem through Aristotle Marx Adorno Althusser Duns Scotus Hobbes and Benjamin in order to show that a philosophical materialism necessarily requires the concepts and tools of thought in order to allow the otherness of matter to emerge in its own materiality

Understanding Sociological Theory for Educational Practices Tania Ferfolja, Criss Jones Díaz, Jacqueline Ullman, 2015-06-05 In contemporary classrooms it is crucial for teachers to have a thorough understanding of sociological issues in education *Understanding Sociological Theory for Educational Practices* addresses sociological theory highlighting its relevance to policy curriculum and practice for the pre service teacher education student The book explores a range of sociological issues related to diversity disadvantage discrimination and marginalisation contributing to the preparation of future teachers for work in a range of educational contexts It seeks to dispel the traditional one size fits all notion of education encouraging future teachers to think critically and reflexively in terms of creating a welcoming and equitable student environment through knowledge inclusion and understanding This book is an invaluable resource for primary secondary and early childhood pre service teacher education students as they prepare to navigate the diversity of the modern classroom It is also an excellent resource for practitioners and researchers interested in issues of diversity and difference in education

Walter Benjamin: Appropriations Peter Osborne, 2005 No other single author has so commanding a critical presence across so many disciplines within the arts and humanities in so many national contexts as Walter Benjamin 1892 1940 The belated reception of his work as a literary critic dating from the late 1950s has been followed by a rapid series of critical receptions in different contexts Frankfurt Critical Theory and Marxism Judaism Film Theory Post structuralism Philosophical Romanticism and Cultural Studies This collection brings together a selection of the most critically important items in the literature across the full range of Benjamin's cultural theoretical interests from all periods of the reception of his writings but focusing upon the most recent to produce a comprehensive overview of the best critical literature

The Continental Philosophy Reader Richard Kearney, Mara Rainwater, 1996 The

Continental Philosophy Reader is the first complete anthology of classic writings from the major figures in European thought and provides a powerful introduction to one of the 20th century's most influential intellectual movements **Communism and Poetry** Ruth Jennison, Julian Murphet, 2019-07-12 Communism and Poetry Writing Against Capital addresses the relationship between an upsurge in collective political practice around the world since 2000 and the crystallization of newly engaged forms of poetry Considering an array of perspectives poets poet critics activists and theorists these essays shed new light on the active interface between emancipatory political thought and poetic production and explore how poetry and the new communism are creating mutually innovative forms of thought and activity supercharging the utopian imagination Drawing inspiration from past connections between communism and poetry and theorizing new directions over the years ahead the volume models a much needed critical solidarity with creative strategies in the present conjuncture to activate movements of resistance on the streets and in verse **Continental Philosophy of Technoscience** Hub Zwart, 2021-11-18

The key objective of this volume is to allow philosophy students and early stage researchers to become practicing philosophers in technoscientific settings Zwart focuses on the methodological issue of how to practice continental philosophy of technoscience today This text draws upon continental authors such as Hegel Engels Heidegger Bachelard and Lacan and their fields of dialectics phenomenology and psychoanalysis in developing a coherent message around the technicity of science or rather technoscience Within technoscience the focus will be on recent developments in life sciences research such as genomics post genomics synthetic biology and global ecology This book uniquely presents continental perspectives that tend to be underrepresented in mainstream philosophy of science yet entail crucial insights for coming to terms with technoscience as it is evolving on a global scale today This is an open access book *Literary Materialisms* M. Nilges, E. Sauri, 2013-08-13 Literary Materialisms addresses what has become a fundamental concern in the last decade how do we today define literary studies as an academic discipline and literature as a relevant object of study Avoiding unproductive proclamations this volume unites new materialist critical thinking with a commitment to fundamental principles *Political Theory and Power* Sarah Joseph, 2004 This book draws attention to certain significant changes in the way in which power has been defined and it also examines some of the critical responses which those changes have evoked The objective is not to try and evolve a universally acceptable and comprehensive definition of power and of related terms like authority and influence The argument of the book is that that would be an impossible project since social and political theories themselves constitute an intervention into political discourse of a society and they may implicitly or explicitly embody a political perspective

Theory and History Gerard McCann, 2019-05-23 First published in 1997 the aim of this book is to look at the historical materialism of E P Thompson while introducing him as a political thinker of distinction The study examines many aspects of Thompson's life and work to give a comprehensive statement on his theory of historical change It surveys the intellectual background from which he emerged the core values of socialist humanism as understood by his generation of the Left his

contribution to history from below his critique of structuralist Marxism and his practical input to political dissent The scope of this study covers fifty years of socialist polemics and offers an insight into the battles which were fought out between the old and new Left until the collapse of command economy communism in 1989 Throughout the work of Thompson is presented as a testimony to a lineage of social thinkers as well as to the ideal of the common weal much cherished by radical practitioners of the past **Reading Capital** Louis Althusser,1977 Modern Critical Thought Drew Milne,2008-04-15

This anthology presents a series of texts in which major twentieth century thinkers engage in dialogue with their predecessors Presents a series of texts in which major twentieth century thinkers engage in dialogue with their predecessors Offers an innovative way into understanding modern critical thought Spans the period from Marx to the present day A conversation of ideas emerges between one generation and the next Editorial material defines key terms and maps out contested terrain Each piece is prefaced by contextualising notes and suggestions for further reading **Reading 'Capital'** Louis Althusser,1972
