Economic Geographies of Globalisation Martin Sokol, 2011 This introductory text is about economic geography and globalization in all their different stripes and colours It introduces clearly the subject matters in economic geography through a wide range of important conceptual lenses and theoretical perspectives It does so without a facts-based rendition of what globalization actually is Instead Sokol offers a refreshingly light touch on the various approaches in understanding contemporary economic geographies and applies these conceptual insights in a helpful and straightforward manner to our appreciation of such key challenges of globalization as inequality, instability and uneven development It is both wide in coverage and contemporary in relevance The text will be well adopted in courses on economic geography, global studies, development studies and international political economy Henry Yeung, National University of Singapore Telling it like it is in a direct and engaging style, this is a book without preconceptions It is a vital intervention that makes sense of the sorry state of the contemporary global economy and its formative geographies and shows what is involved in constructing an alternative Roger Lee, Queen Mary University of London, UK This well-researched book provides a concise contribution to a large-scale debate on economic globalisation Martin Sokol introduces key theoretical approaches that help us to understand how economies work, why they suffer recessions and crises and why economic inequalities at various levels are growing in the context of globalisation He introduces key economic geography concepts and theories demonstrating their application to our contemporary globalising world The role that economic geography may play in informing policymaking is highlighted and debates surrounding the recent global financial and economic crisis are expounded This highly accessible book will prove an essential reference tool for academics, students and researchers focusing on geography, economics, planning and regional development development studies, international politics and international business Policymakers and practitioners in local, regional and national authorities, international bodies and non-governmental organisations will also find this book to be an invaluable resource
