Primary School Peter Langford,2016-03-10 Originally published in 1987 this book introduces work on the intellectual development of children in the primary school It contains chapters on the teaching of reading writing art science and mathematics While critical of many of the once popular ideas of Jean Piaget the author also emphasises the continuing validity of some aspects of Piaget s thinking Readings in Methodology Jean-Bernard Ouedraogo,Carlos

Cardoso,2011-12-15 One of the weaknesses of research in Africa is the little consideration that is given to questions of epistemology and methodology What we see is the trivialization of research protocols which consequently are reduced to

fantasy prescriptions that detach social studies from universal debates over the validity of science rather than an interrogation of research procedures induced by the complexity of social dynamics As a result social sciences have become an imitative discourse and a recital of exotic anecdotes without perspectives Knowledge production therefore loses any heuristic bearing It is on the basis of this reality that attempts to correct this tendency have been made in this book by discussing the methodological foundation of social science knowledge This volume is a collection of papers presented during methodological workshops organized by CODESRIA Its objective is to revitalize theory and methodology in field work in Africa while contributing to the creation of a critical space hinged upon the mastery of epistemological bases which are indispensable to any scientific imagination Far from being a collection of technical certainties and certified methods this book interrogates the uncertain itinerary of the process of social logics discovery In that sense it is a decisive step towards a critical systemization of ongoing theories and practices within the African scientific community The reader can therefore identify the philosophical historical sociological and anthropological foundations of object construction field data exploitation and research results delivery This book explains the importance of the philosophical and social modalities of scientific practice the influence of local historical contexts the different usages of new investigative tools including the audiovisual tools Finally the book backed by classical theories serves as an invitation toward considering scientific commitment to African field research from a reflective perspective
