Information Systems -- Creativity and Innovation in Small and Medium-Sized Enterprises Gurpreet

Dhillon, Bernd Carsten Stahl, Richard Baskerville, 2009-07-10 This book contains the collection of papers presented at the conference of the International Federation for Information Processing Working Group 8.2 Information and Organizations. The conference took place during June 21-24, 2009 at the Universidade do Minho in Guimarães, Portugal. The conference entitled CreativeSME: The Role of IS in Leveraging the Intelligence and Creativity of SMEs attracted high quality submissions from across the world. Each paper was reviewed by at least two reviewers in a double blind review process. In addition to the 19 papers presented at the conference, there were five panels and four workshops which covered a range of issues relevant to SMEs' creativity and information systems. We would like to show our appreciation of the efforts of our two invited keynote speakers: Michael Dowling of the University of Regensburg, Germany and Carlos Zorrinho, Portuguese coordinator of the Lisbon Strategy and the Technological Plan. The following organizations supported the conference through financial or other contributions and we would like to thank them for their engagement. Advances in Enterprise Information Systems II

Charles Moller, Sohail Chaudhry, 2012-06-07 For many years now Enterprise Information Systems have been critical in helping businesses successfully navigate the global market. The development that started with design and implementation of integrated systems has evolved to incorporate a multitude of perspectives and ideas. The Enterprise Information Systems functionality extends from principally an ERP (Enterprise Resource Planning) system to a portfolio of standard systems including CRM (Customer Relationship Management) systems and SCM (Supply Chain Management) systems. Advances in Enterprise Information Systems II is divided into seven thematic sections, each exploring a distinct topic. In Concepts in Enterprise Information Systems, the authors present new concepts and ideas for the field. Cases in Enterprise Information Systems introduces studies of enterprise information systems in an organizational context. Business Process Management is one of the major themes within enterprise information systems and Designing Enterprise Information Systems discusses new approaches to the design of processes and systems and also deals with how design can be taken as a specific perspective. Enterprise Information Systems in various domains features generic studies that contribute to advancing the practical knowledge of the field as well as towards global issues of Enterprise Information Systems. Finally, in Emerging Topics in Enterprise Information Systems, new technologies and ideas are explored. Cloud computing in particular seems to be setting the agenda for future research in enterprise information systems. The book will be invaluable to academics and professionals interested in recent developments in the field of enterprise information systems. **Opening the Door on Elder Abuse**
