Rebellion And Its Enemies In Late Imperial China Militarization And Social:

Rebellion and Its Enemies in Late Imperial China Philip A. Kuhn, 1970 **Rebellion and its enemies in late imperial China: militarization and social structure, 1976-1864** Philip A. Kuhn, Jennifer Rudolph, 2010-02-28 **Negotiated Power in Late Imperial China** The Zongli Yamen and the Politics of Reform explores the nature and functioning of reform during the nineteenth century of China's Qing dynasty 1644 1911 By analyzing the bureaucratic modes of management that developed around the creation and evolution of the Zongli Yamen or Foreign Office 1861 1901 the book demonstrates the vitality of not only the Chinese State but also the institutional traditions of its Manchu rulers Drawing on precedent and the flexibility of the administrative system in their efforts to manage the conduct of foreign affairs high Qing ministers transformed opportunities for institutional dynamism into the reality of a functioning central Zongli Yamen with a foreign affairs field administration supporting it in the provinces In the process they altered the governmental hierarchy and changed the definition of institutional power in the multi faceted area of foreign affairs and more generally for the Qing bureaucracy As the most significant example of institutional development in China's critical period of the nineteenth century the Zongli Yamen's experience serves as valuable background for understanding reform efforts in late imperial China and beyond *China* John King Fairbank, Merle Goldman, 2006-04-30 John King Fairbank was the West's doyen on China and this book is the full and final expression of his lifelong engagement with this vast ancient civilization The distinguished historian Merle Goldman brings the book up to date and provides an epilogue discussing the changes in contemporary China that will shape the nation in the years to come **Conflict, Community, and the State in Late Imperial Sichuan** Quinn Javers, 2019-03-04 Exploring local practices of dispute resolution and laying bare the routine role of violence in the late Qing dynasty *Conflict Community and the State in Late Imperial Sichuan* demonstrates the significance of everyday violence in ordering disciplining and building communities The book examines over 350 legal cases that comprise the cases of unnatural death archival file from 1890 to 1900 in Ba County Sichuan province The archive presents an untidy array of death including homicides suicides and found bodies An analysis of the muddled and often petty disputes found in these records reveals the existence of a local system of authority that disciplined and maintained daily life Often relying on violence this local justice system occasionally intersected with the state's justice system but was not dependent on it This study demonstrates the importance of informal local authority to our understanding of justice in the late Qing era Providing a non elite perspective on Qing power law justice and the role of the state this book will be of great interest to students and scholars of Chinese and Asian history as well as legal history and comparative studies of violence **Insurgency Warfare** Jeremy Black, 2023-06-22 This timely book offers a world history of insurgencies and of counterinsurgency warfare Working beyond traditional Western centric narrative arguing that it is crucial to ground experiences in Afghanistan and Iraq in a global framework Unlike other studies that begin with the American and French

revolutions this book reaches back to antiquity to trace the pre modern origins of war Interweaving thematic and chronological narratives Black probes the enduring linkages between beliefs events and people on the one hand and changes over time on the other hand He shows the extent to which politics technologies and ideologies have evolved creating new parameters and paradigms that have framed both governmental and public views Tracing insurgencies ranging from China to Africa to Latin America Black highlights the widely differing military and political dimensions of each conflict He weighs how and why lessons were learned or rather asserted in both insurgency and counterinsurgency warfare At every stage he considers lessons learned by contemporaries the ways in which norms developed within militaries and societies and their impact on doctrine and policy His sweeping study of insurrectionary warfare and its counterinsurgency counterpart will be essential reading for students of military history

Questioning Collapse Patricia A. McAnany, Norman Yoffee, 2009-09-28 *Questioning Collapse* challenges those scholars and popular writers who advance the thesis that societies past and present collapse because of behavior that destroyed their environments or because of overpopulation In a series of highly accessible and closely argued essays a team of internationally recognized scholars bring history and context to bear in their radically different analyses of iconic events such as the deforestation of Easter Island the cessation of the Norse colony

in Greenland the faltering of nineteenth century China the migration of ancestral peoples away from Chaco Canyon in the American southwest the crisis and resilience of Lowland Maya kingship and other societies that purportedly collapsed Collectively these essays demonstrate that resilience in the face of societal crises rather than collapse is the leitmotif of the human story from the earliest civilizations to the present Scrutinizing the notion that Euro American colonial triumphs were an accident of geography Questioning Collapse also critically examines the complex historical relationship between race and political labels of societal success and failure **Modern China's Network Revolution** Zhongping Chen, 2011-06-27

Chambers of commerce developed in China as a key part of its sociopolitical changes In 1902 the first Chinese chamber of commerce appeared in Shanghai By the time the Qing dynasty ended over 1 000 general chambers affiliated chambers and branch chambers had been established throughout China In this new work author Zhongping Chen examines Chinese chambers of commerce and their network development across Lower Yangzi cities and towns as well as the nationwide arena He details how they achieved increasing integration and how their collective actions deeply influenced nationalistic reformist and revolutionary movements His use of network analysis reveals how these chambers promoted social integration beyond the bourgeoisie and other elites and helped bring society and the state into broader and more complicated interactions than existing theories of civil society and public sphere suggest With both historical narrative and theoretical analysis of the long neglected local chamber networks this study offers a keen historical understanding of the interaction of Chinese society business and politics in the early twentieth century It also provides new knowledge produced from network theory within the humanities and social sciences *Chinese Business Enterprise* Rajeswary Ampalavanar Brown, 1996 Revolution and Its Past R. Keith Schoppa, 2017-10-03

Unlike other texts on modern Chinese history which tend to be either encyclopedic or too pedantic *Revolution and Its Past* is comprehensive but concise focused on the most recent scholarship and written in a style that engages students from beginning to end The Third Edition uses the theme of identities of the nation itself and of the Chinese people to probe the vast changes that have swept over China from late imperial times to the early twenty first century In so doing it explores the range of identities that China has chosen over time and those that outsiders have attributed to China and its people showing how as China rapidly modernizes the issue of Chinese identity in the modern world looms large

Hankow William T. Rowe, 1992-12-01 This is the second volume of a two volume social history of nineteenth century Hankow a city of over one million inhabitants and the commercial hub of central China In the first volume *Hankow Commerce and Society in a Chinese City 1796 1889 1984* the author emphasized the dynamism of late imperial commerce the relation of the metropolis to its hinterland and the corporate institutions of the city notably its guilds which assumed a number of functions we normally attribute to a municipal government In this volume the focus is on the people of Hankow in all their ethnic diversity occupational variety and constant mobility and on the social bonds that enabled this mass of people to live and work in a crowded city with much less disruptive social conflict than occurred in Hankow's counterparts

in early modern Europe Built into the argument of the book is a running comparison nineteenth century Hankow with such cities as London and Paris in the somewhat earlier period when they too were experiencing the growing pains of nascent preindustrial capitalism How are we to account for the fact that the cities of early modern Europe were so much more prone to protest and social upheaval than Hankow was in a comparable stage of development The author finds the answer in the cultural hegemony of an activist elite that fostered moral consensus social harmony and an aura of solicitude for the well being of residents at every social level exemplified in such service institutions as poor relief firefighting and public security Toward the end of the nineteenth century however the social bonds that had held Hankow together were beginning to fragment as social polarization and growing class consciousness fostered an atmosphere of increasing unrest Studying the Enemy Christiane Reinhold,2018-10-24 Unlike the majority of contemporary scholarly works that examine Sino Japanese relations between 1925 and 1945 this study de emphasizes the story of conflict and war in favor of one that revolves around the way in which the Chinese intellectually encountered the enemy the Japanese **Contingent Loyalties** Diana Zhidan Duan,2025-10-01 From the mid nineteenth century Hui rebellions which challenged centralised state control to the early twentieth century revolutions which led to Yunnan s decades long independence local actors shaped the history of Yunnan through their extensive cross border networks and contradictory roles in the attempted state consolidation of this contested area Among the local elites the state agents both Han and non Han acted on behalf of the state in the borderlands affairs while seeking the balance between the interests of the state and their own communities The state agents competed with each other while utilising and wrestling with the state authorities The dynamic relationship between the state and local actors created another contested facet of modern Yunnan s transformation Competing narratives emerged when local actors negotiated and reconstructed their status within the contemporary Chinese nation state Bandits became heroes separatists became patriots a vibrant regional center became an isolated exotic and marginal province of the People s Republic of China The Wobbling Pivot, China since 1800 Pamela Kyle Crossley,2010-01-28 This comprehensive but concise narrative of China since the eighteenth century builds its story around the delicate relationship between central government and local communities Rejects the traditional view of China as a wholly harmonious society based on principles of stability the Unwobbling Pivot of Ezra Pound s translation of the Chinese classic Zhongyong Provides an original interpretation arguing that developments can be explained through an understanding of China s surprising swings between centralization and decentralization between local initiative and central authoritarianism Serves as an introduction to the subject while readers with a background in Chinese history will find the book offers a personal perspective and addresses long standing interpretive issues Supported by a variety of timelines maps illustrations and extensive notes for further reading Places China s history within the context of global change Talons and Teeth Bradly W. Reed,2000-03-01 For commoners in the Qing dynasty the most salient agents of the imperial state were not the emperor s appointed officials but rather the clerks and

runners of the county yamen the lowest level of functionaries in the Qing state's administrative hierarchy Yet until now we have known very little about these critically important persons beyond the caricatured portrayals of corruption and venality left by Qing high officials and elites Drawing from the rich archival records of Ba county Sichuan the author challenges the simplicity of these portrayals by taking us inside the county yamen to provide the first detailed look at local administrative practice from the perspective of those who actually carried it out Who were the county clerks and runners How were they recruited organized disciplined and rewarded What was the economic basis for a career in the yamen How did clerks and runners view themselves as well as legitimize their role in Qing government And what impact did their interests and practices have on symbolically laden elements of imperial government such as the magistrate's court In addressing these questions the author traverses the disjuncture between statutory regulations and the realities of daily administrative practice uncovering a realm of informal semiautonomous yet highly structured and even rationalized procedures Although frequently in violation of formal law this extra statutory system nevertheless remained an irreducible component of local government under the Qing Recognizing the centrality of such informal practice to yamen administration forces us to rethink not only traditional assumptions concerning local corruption in the Qing but also the ways in which we conceptualize the boundaries between state and society in late imperial China

Revolutions as Organizational Change Baohui Zhan, 2015-09-01 By comparing peasant revolutions in Hunan and Jiangxi between 1926 and 1934 *Revolutions as Organizational Change* offers a new organizational perspective on peasant revolutions Utilizing newly available historical materials in the People's Republic of China in the reform era it challenges the established view that the great Chinese revolution of the twentieth century was a revolution made by the Chinese Communist Party the CCP The book begins with a puzzle presented by the two peasant revolutions While outside mobilization by the CCP was largely absent in Hunan peasant revolutionary behaviors were spontaneous and radical In Jiangxi however despite intense mobilization by the CCP peasants remained passive and conservative This study seeks to resolve the puzzle by examining the roles of communal cooperative institutions in the making of peasant revolutions Historically peasant communities in many parts of the world were regulated by powerful cooperative institutions to confront environmental challenges This book argues that different communal organizational principles affect peasants' perceptions of the legitimacy of their communal orders Agrarian rebellions can be caused by peasants' attempts to restructure unjust and illegitimate communal organizational orders while legitimate communal organizational orders can powerfully constrain the mobilization by outside revolutionary agents such as the CCP In this thorough comparative account of the peasant risings in Hunan and Jiangxi and the role of the Communist Party Professor Zhang casts new light on both the risings themselves and what they can tell us about peasant risings in general This work is strong in both theory and detailed historical research Richard Rigby professor China Institute Australian National University Professor Zhang has beautifully crafted a comparative study of divergent peasant revolutions in two Chinese regions during

Mao's long revolutionary war. He brings to this task a broad and deep knowledge about revolutionary theory and also a razor-like analytical sensibility which enables him to examine the pros and cons of existing perspectives. Timothy P. Wickham-Crowley, associate professor of sociology, Georgetown University. *Discovering History in China* Paul A. Cohen, 2010-04-29

Since its first publication, Paul A. Cohen's *Discovering History in China* has occupied a singular place in American China scholarship. Translated into three East Asian languages, the volume has become essential to the study of China from the early nineteenth century to today. Cohen critiques the work of leading postwar scholars and is especially adamant about not reading China through the lens of Western history. To this end, he uncovers the strong ethnocentric bias pervading the three major conceptual frameworks of American scholarship of the 1950s and 1960s: the impact response, modernization, and imperialism approaches. In place of these, Cohen favors a China-centered approach in which historians understand Chinese history on its own terms, paying close attention to Chinese historical trajectories and Chinese perceptions of their problems rather than a set of expectations derived from Western history. In an important new introduction, Cohen reflects on his fifty-year career as a historian of China and discusses major recent trends in the field. Although some of these developments challenge a narrowly conceived China-centered approach insofar as they enable more balanced comparisons between China and the West and recast the Chinese and their history in more human, less exotic terms, they powerfully affirm the central thrust of Cohen's work.
