Refugees In A Global Era:

Refugees in a Global Era Philip Marfleet, 2005-10-21 *Refugees in a Global Era* offers a topical and informative analysis of forced migration in the age of globalization identifying mass displacement as an outcome of conflicts and contradictions in the global system. It looks critically at histories of migration exploring the constructed nature of the refugee and considers the changing patterns of migration and the refugee experience of displacement flight and the search for asylum. Additionally, it offers a critical analysis of refugee policy in Europe North America and Australia and advances the case for open borders.

Refugees Worldwide Doreen Elliott, Uma A. Segal, 2012-08-03 Utilizing international perspectives this unprecedented collection of essays from leading authorities on refugee studies spotlights the realities and challenges of the global refugee population. With increasing changes in the socio political climate of the world as well as with the rising numbers of natural disasters people of all ethnicities and nationalities are frequently forced from their homes and their homelands. While there is a substantial body of work that addresses refugee policies post traumatic stress disorder and other specific issues there have been few attempts to understand refugee health or comprehend overall refugee adaptation until now. This is the first work to address refugee issues worldwide addressing the psychological health human rights political public policy law economic social and personal aspects of this universal problem. *Refugees Worldwide* also includes examples of first person refugee stories from around the world eye opening information not available in any other work. Drawing on the expertise of myriad international researchers theoreticians and practitioners from representative nations around the world this four volume set effectively speaks to a number of refugee issues from a truly global perspective. *The Refugee in the Global Era* Phil Marfleet, New Ethnicities Unit, 1996. *Refugees in Europe, 1919-1959* Matthew Frank, Jessica Reinisch, 2017-09-21 This book is open access and available on www.bloomsburycollections.com. It is funded by Knowledge Unlatched. *Refugees in Europe 1919 1959* offers a new history of Europe's mid 20th century as seen through its recurrent refugee crises. By bringing together in one volume recent research on a range of different contexts of groups of refugees and refugee policy it sheds light on the common assumptions that underpinned the history of refugees throughout the period under review. The essays foreground the period between the end of the First World War which inaugurated a series of new international structures to deal with displaced populations and the late 1950s when Europe's home grown refugee problems had supposedly been solved and attention shifted from the identification of an exclusively European refugee problem to a global one. Borrowing from E H Carr's *The Twenty Years Crisis* first published in 1939 the editors of this volume test the idea that the two post war eras could be represented as a single crisis of a European dominated international order of nation states in the face of successive refugee crises which were both the direct consequence of that system and a challenge to it. Each of the chapters reflects on the utility and limitations of this notion of a forty years crisis for understanding the development of specific national and international responses to refugees in the mid 20th century. Contributors to the volume also provide alternative readings of

the history of an international refugee regime in which the non European and colonial world are assigned a central role in the narrative

International Political Theory and the Refugee Problem Natasha Saunders, 2017-11-22 The refugee problem is a term that it has become almost impossible to escape Although used by a wide range of actors involved in work related to forced migration these actors do not often explain what exactly the problem is that they are working to solve leading to an unfortunate conflation of two quite different problems the problems that refugees face and the problems that refugees pose Beginning from the simple yet too often overlooked observation that how one conceives of solving a problem is inseparable from what one understands that problem to be Saunders study explores the questions raised about how to address the refugee problem if we recognise that there may not be just one problem and that not all actors involved with the refugee regime conceive of their work as addressing the same problem Utilising the work of Michel Foucault the book first charts how different problems lend themselves to particular kinds of solutions arguing that the international refugee regime is best understood as developed to solve the refugee as problem rather than refugees problems Turning to the work of Hannah Arendt the book then reframes the refugee problem from the perspective of the refugee rather than the state and investigates the extent to which doing so can open up creative space for rethinking the more traditional solutions to the refugee as problem Cases of refugee protest in Europe and the burgeoning Sanctuary Movement in the UK are examined as two sub state and popular movements which could constitute such creative solutions to a reframed problem The consequences of the refugee label and of the discourses of humanitarianism and emergency is a topic of critical concern and as such the book will form important reading for a scholars and students of international political theory and forced migration studies

Refugees and Knowledge Production Magdalena Kmak, Heta Björklund, 2022-02-13 Building on research within the fields of exile studies and critical migration studies and drawing links between historical and contemporary refugee scholarship this volume challenges the bias of methodological nationalism and Eurocentrism in discussing the multifaceted forms of knowledge emerging in the context of migration and mobility With critical attention to the meaning production and scope of refugee scholarship generated at the institutions of higher education it also focuses on refugee knowledge produced outside academia and scrutinizes the conditions according to which it is validated or silenced Presenting studies of historical refuge and exile together with the experiences of contemporary refugee scholars this book will appeal to scholars across the social sciences with interests in forced migration refugee studies the sociology of knowledge and the phenomenon of insider knowledge and research methods and methodology The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Refugees in International Relations Alexander Betts, Gil Loescher, 2011 Drawing together the work and ideas of a combination of the world's leading and emerging International Relations scholars *Refugees in International Relations* provides a comprehensive and challenging overview of the international politics of forced

migration **Refugees and the Meaning of Home** Helen Taylor, 2015-11-03 This book explores the meaning of home for Cypriot refugees living in London since their island was torn apart by war Taking an innovative approach it looks at how spaces time social networks and sensory experiences come together as home is constructed It places refugee narratives at its centre to reveal the agency of those forced to migrate **Refugees and Forced Migrants in Africa and the EU** Elisabeth Wacker, Ulrich Becker, Katharina Crepaz, 2018-12-28 The so called refugee crisis represents one of the biggest contemporary political and social challenges Although many African countries have been dealing with forced migratory and refugee movements for decades their experiences have so far largely been neglected in the predominantly Eurocentric public debate The present volume aims to bridge this gap by providing comparative African and European perspectives from different disciplines highlighting the challenges but also potential mutual benefits of social diversification and offering an insight into possible solution strategies **Asylum after Empire** Lucy Mayblin, 2017-04-05 Asylum seekers are not welcome in Europe But why is that the case For many scholars the policies have become more restrictive over recent decades because the asylum seekers have changed This change is often said to be about numbers methods of travel and reasons for flight In short we are in an age of hypermobility and states cannot cope with such volumes of others This book presents an alternative view drawing on theoretical insights from Third World Approaches to International Law post and decolonial studies and presenting new research on the context of the British Empire The text highlights the fact that since the early 1990s for the first time the majority of asylum seekers originate from countries outside of Europe countries which until 30 60 years ago were under colonial rule Policies which address asylum seekers must the book argues be understood not only as part of a global hypermobile present but within the context of colonial histories
