on Foucault's writings on subjectivity, embodiment and power relations. The author examines the implications of the new social theories for the study of health promotion and health communication to analyze the symbolic nature of public health practices and explores their underlying meanings and assumptions. *Political Research* Sandr Halperin, 2025 Healthy Cities John K Davies, Michael Kelly, 2014-02-04 The growth of health promotion as a topic for discussion and a principle for practice is widespread and affects all groups of health professionals. The Healthy Cities project like Health for All was inaugurated by the World Health Organization and has informed policy throughout the world. Healthy Cities Research and Practice examines the application of the project in a number of countries. The contributors explore problems in the relationship between policy makers, communities and academic researchers and discuss how the Healthy Cities program affects housing, policy, community development, scientific interchange and health education. In addition, the Editors John Davies and Michael Kelly provide a context by tracing the history of the WHO projects and discuss them in the broader context of scientific and philosophical debates about modernism and post modernism. The contributors are drawn from practitioners and scientists with wide experience in the area from the United Kingdom, Canada, Australia and the United States. Healthy Cities will be invaluable to all those working at community level and in government with an interest in health as well as students of health promotion. **Research in Health Care** I. K. Crombie, 1996-06-03 This volume provides health care professionals with a comprehensive but readable guide to the design, conduct and interpretation of health services research. It strips the research process of its technical jargon, illuminating the methods of research by an extensive use of real examples. The common pitfalls of the design and interpretation of studies are reviewed together with guidance on how to avoid them. The result is a user friendly text which will enable all health care professionals to carry out research with confidence and success.
