Working from theoretical and practice base perspectives this book will be of great interest for researchers practitioners policy makers and academics as well as students in teacher education programs and graduate courses in educational administration and leadership organisational studies and educational ethics for broad international use Gender, Policy and Educational Change Sheila Riddell, Jane Salisbury, 2003-05-20 Gender equality has been a major educational theme for the past two decades and has become interwoven with other policy themes including those of marketisation and managerialism Contributors to this strong collection are key researchers in their fields and seek to address the following questions What patterns are discernible in the educational attainment of girls and boys over the past two decades To what extent are changes attributable to gender equality policies What form have gender equality policies taken in different parts of the UK What has been the impact of European equality policies How have gender equality policies been experienced by particular groups including pupils from ethnic minority and working class backgrounds This book aims to take an overall look at how significant have been the changes in experiences aspirations and culture of girls and boys and male and female teachers It explores how attempts to improve equal opportunities in education have fared and examines the tensions and contradictions in recent policies *Researching Widening Access to Lifelong Learning* Beth Crossan, Jim Gallacher, Michael Osborne, 2004-07-15 This authoritative volume is a truly international contribution to the worldwide debate on how best to widen access to lifelong learning The first section of the book comprises research studies from around the world reflecting the diversity of contexts in which widening access is researched and considers issues central to the access debate including different understandings of the concept of access organisational and structural change curriculum development entry policies performance and retention and labour market outcomes The second section illustrates diverse and innovative methodological approaches that have been employed by researchers in the field and considers the range of approaches available Given the growing concern around the world on the need to combat social exclusion and to improve economic circumstances through access to lifelong learning this book acts as a unique reference point informing the ongoing debate exploring the relationships between research policy and practice Leading for the Future Steve Lambert, 2014-03-17 Developing the next generation of leaders is critical to the success of further education colleges However this has to be more than talent development or succession planning if colleges are going to succeed in the highly complex and political environment in which they currently operate This book looks at developing future leaders through a different lens The book advocates for leadership development to be located within a sustainable leadership framework which encompasses a range of existing leadership theories This enables leadership to be developed holistically from deep within an organisation and provides a framework for developing individuals who have the skills necessary to lead further education colleges Using Everyday Numbers Effectively in Research Stephen Gorard, 2006-05-10 Illustrates how numbers can be used successfully for research purposes without you ever having to consider confidence intervals probability densities Gaussian distributions or

any of those complicated and generally useless things that appear in treatises on statistics This guide is useful for educational and social science researchers Research Questions Richard Andrews,2003-12-01 An informative guide to designing and formulating research questions Crucial starting points for research are often poorly conceived by students and researchers resulting in problems as they work through the research and overall design and quality of the thesis dissertation or research project As students and researchers often spend six months to a year getting their research question right this book will help set them on the right road **Action Research** Patrick J. M. Costello,2003-12-01 The central purpose of this book is to enable practitioners to undertake and to offer an account of an action research project The volume is divided into seven sections the first six of which are headed by commonly asked questions Having examined the nature of action research Costello focuses on developing an appropriate project data collection and analysis and producing a research report The final selection offers suggestions for further reading Ethics in Research Ian Gregory,2003-12-01 Ian Gregory explores how ethical concerns influence not only how research is conducted but also how researchers engage with a piece of research Also analysed in detail is the impact ethics have on the interpretation of data and research findings **BOOK JACKET Policy, Discourse and Rhetoric** Marie Lall,2012-09-11 This is not yet another book on New Labour and neoliberalism but the only book which uses policy case study evidence to show the rhetorical nature of the commitment New Labour appeared to have been making to education Unlike other books on that era this one aims to review New Labour's time in government through specific policy texts This book reviews some of the major policy shifts in the education sector analysing selected case study policies in order to articulate dominant discourses in recent policy making which have helped establish a particular hegemony The book's originality lies in its policy analysis and case study base whereby key policy texts across different sectors are dissected using the policy cycle framework allowing for an in depth analysis of the policy discourse as well as a discussion on how the neoliberal agenda was reflected and or promoted Education is often only perceived as limited to policies relating to schools and higher education However the book seeks to demonstrate that education as a sector is a much broader field and therefore the areas covered include key policies in citizenship and youth work widening participation in higher education the place of inclusive education in the curriculum the undergraduate medical curriculum and the effect of the Cox review on creativity In effect the broad selection of sectors demonstrates that New Labour's education policies were not only detrimental in traditional education settings but also affected areas such as medicine and the media which are of importance to those who no longer are affected by what happens in institutions of learning and teaching The book is consequently relevant for a much wider audience beyond the education community FE Lecturer's Survival Guide Angela Steward,2006-12-09 The author provides readers with strategies for dealing with a wide range of issues including managing workloads effectively developing positive relationships and creating a learning environment
