The 15 lessons make connections between classroom learning and real-world experiences in budgeting, career planning, credit management, and housing.

Corporate Investment Decisions and Economic Analysis Denis Babusiaux, Axel Pierru, 2005. The aim of this book is to help readers assimilate the concepts and methods for investment decision and project evaluation. It offers a wide range of exercises, problems, and case studies taken from business, which are the fruit of many years of teaching, consulting, and research. Some are direct application of basics; others require a higher degree of reflection for more complex applications. Our approach borrows elements from microeconomics, engineering, economics, and finance theory. This book is suited to both professionals and students who seek to master capital budgeting techniques. A review of essential points is proposed at the beginning of each chapter, and key methodological elements are recalled in the solutions.
