Resentment Against Achievement Understanding The Assault Upon Ability:

Resentment Against Achievement Robert Sheaffer, 1988 No Marketing Blurb *The Philosophy of Taxation and Public Finance* Robert W. McGee, 2011-06-27 Most public finance books are texts which are aimed at undergraduate or graduate students They are overly technical in nature and appeal only to a narrow range of bureaucrats and academics Books on taxation are written for tax practitioners and usually emphasize either what the law is or how to maneuver through the labyrinth of tax law to minimize taxes for clients Philosophy books on taxation or public finance simply do not exist The Philosophy of Taxation and Public Finance is different It is written in nontechnical language and is aimed to appeal to a wide range of readers including practitioners academics and students in the fields of taxation public finance economics law philosophy and political science as well as general readers who are interested in learning why they are being taxed the way they are The author addresses the major issues and topics in taxation and public finance and injects them with philosophical insights He discusses questions such as What arguments have been used to justify taxation When is tax evasion unethical Are some taxes better than others What are the proper functions of government How much is enough Is the ability to pay concept valid When can punitive taxes be justified

Total Quality in Managing Human Resources Joe Petrick, 2017-10-06 Human resource management is a particularly challenging role both domestically and globally This challenge can be viewed either as an opportunity or as a threat As an opportunity the principles and practices of total quality presented in this book can help human resource professionals or anyone who manages people transform institutionalized mediocrity into organizational excellence The focus of this book is on managing the difference TQ makes in human resources Whereas the traditional nature and scope of responsibility for most human resource professionals has been that of staff support geared to administrative compliance the total quality approach offered here reveals the keys to developing and sustaining commitment to world class performance These keys include strategic input and continual improvement of the human resource system to enhance internal and external customer satisfaction both now and in the future The full meaning of these new TQ role demands is explored in light of the driving forces reshaping the HR environment into the 21st Century In addition this book offers practitioner assessment instruments practical TQ tools and specific implementation steps to take in order to make the TQ difference in managing human resources domestically and globally

Rage and Time Peter Sloterdijk, 2010 While ancient civilizations worshipped strong active emotions modern societies have favored more peaceful attitudes especially within the democratic process We have largely forgotten the struggle to make use of thymos the part of the soul that following Plato contains spirit pride and indignation Rather Christianity and psychoanalysis have promoted mutual understanding to overcome conflict Through unique examples Peter Sloterdijk the preeminent posthumanist argues exactly the opposite showing how the history of Western civilization can be read as a suppression and return of rage By way of reinterpreting the Iliad Alexandre Dumas's Count of Monte Cristo and recent Islamic political riots in Paris Sloterdijk proves

the fallacy that rage is an emotion capable of control Global terrorism and economic frustrations have rendered strong emotions visibly resurgent and the consequences of violent outbursts will determine international relations for decades to come To better respond to rage and its complexity Sloterdijk daringly breaks with entrenched dogma and constructs a new theory for confronting conflict His approach acknowledges and respects the proper place of rage and channels it into productive political struggle

Genetic Enslavement Bruce L. Gary, 2011-06 Every living thing is assembled by its genes This is a crucial starting point for exploring a fundamental human dilemma As stated so starkly by Richard Dawkins a human is a lumbering machine created for the task of safeguarding and propagating the all important genes within I would add that since the machine's behavior is driven by brain circuits pre-wired by those genes sometimes we are prone to doing things which work against our individual best interest in order to advance the cause of the genes In other words some of our genes are our enemies outlaw genes because they jeopardize individual well-being as they work to assure themselves genetic immortality Every thinking person must face the following dilemma How can I achieve liberation from genetic pitfalls when my values and thinking are so profoundly influenced by the very same genes that have created those pitfalls The more one tries to answer this question the harder it is to imagine that an answer is possible Nevertheless this is a challenge that can become irresistibly fascinating This book is an attempt to bravely explore one of Humanity's most profound existential dilemmas The fate of a civilization is also affected by the outlaw genes especially those responsible for a feeling of discontent with civilization and a vague preference for a simpler society which I would describe as resembling those found in the human ancestral environment This book explores how a flawed human nature undermines every civilization starting a decline and eventual fall Those of us born during the 20th Century are lucky for having seen the best of times for our civilization and as a questionable bonus we may now witness from close up the forces that have condemned every past civilization to ruin

Taxation and Public Finance in Transition and Developing Economies Robert W. McGee, 2008-08-25 Topics in this comprehensive survey include bureaucracy corruption and tax compliance public finance in developing economies taxation in several former Soviet republics Eastern Europe and China taxation in the enlarged European Union tax harmonization vs tax competition and the philosophy of taxation and public finance The editor has assembled a stellar group of authorities to write about their areas of expertise

roots of affirmative action Civil Wrongs uncovers why it has been unsuccessful in resolving the dilemmas of racial ethnic gender and class discrimination in America Yates traces how the goals of President Kennedy s Executive Order No 10925 which first ordered affirmative action have been extensively undermined The ideological force behind this deviation is what Yates calls The Philosophy of Social Engineering deeply antagonistic to the principles on which the United States was founded and remarkably close to the totalitarian ideologies which have spawned misery around the globe Civil Wrongs details a fresh counter argument for reinvigorating civil rights activism the Philosophy of Social Spontaneity which demonstrates that civil rights can be upheld without detrimental government intervention while simultaneously offering women and minorities the opportunity to rise on their own merits Library Journal ,1988-07 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately **Forthcoming Books** Rose Army,1988-09
