Christopher Robert Schenk, Ontario Federation of Labour, CSJ Foundation for Research and Education, 2001 *Re-shaping Work* Ontario Federation of Labour. Technology Adjustment Research Programme, 1995 **The New Role of Labor Unions in the AI Era** Arenas Falótico, Andrés J., Bayón Pérez, Jessica, 2025-06-04 As artificial intelligence AI is introduced on a day to day basis its use as tool is an effective and transformative tool for companies and even labor unions As AI reshapes industries tasks and redefine jobs unions must adapt to compete with its implementation Traditionally unions negotiate wages and working conditions now they are fighting for job security and worker presentation with the introduction of AI This new role positions labor unions as crucial mediators between technological innovation and worker rights ensuring that AI benefits all rather than deepening inequality The New Role of Labor Unions in the AI Era explores the transformative role of AI and how it is affecting the field of business and management It further discusses how technologies are reshaping business strategies operations and the overall management landscape Covering topics such as automation labor markets and workplace harassment this book is a useful resource for researchers academicians students and more The Left in Power Steven High, 2025-02-11 At the end of the twentieth century as social democratic parties around the world struggled to produce a coherent response to the deindustrialization crisis many pivoted towards progressive neoliberalism and Third Way social democracy Almost everywhere they turned their backs on the weakened trade union movement and embraced neoliberal assumptions about labour force flexibility and global competition Shamefully Third Way social democrats emphasized the moral dimension of poverty rather than its structural causes as they abandoned the old redistributive class politics of the Left Based on extensive archival research and interviews with NDP politicians senior economic policy advisors and trade unionists The Left in Power examines the response of the political Left in Ontario to the crisis that gripped the old industrialized world Steven High revisits the heartbreaking years of Bob Rae's Ontario NDP government from their historic and unexpected 1990 victory to their policy shifts that left working class voters feeling betrayed to their landslide defeat in 1995 to uncover what we can learn from one social democratic party's mistakes about how to govern from the Left

Prometheus Wired Darin Barney, 2011-11-01 From all sides we hear that computer technology with its undeniable power to disseminate information and connect individuals holds enormous potential for a reinvigoration of political life But will the Internet really spark a democratic revolution And will the changes it brings be so profound that past political thought will be of little use in helping us to understand them In Prometheus Wired Darin Barney debunks claims that a networked society will provide the infrastructure for a political revolution and shows that the resources we need for understanding and making sound judgments about this new technology are surprisingly close at hand By looking to thinkers who grappled with the relationship of society and technology such as Plato Aristotle Marx and Heidegger Barney critically examines such assertions about the character of digital networks Along the way Barney offers an eye opening history of digital networks and then explores a wide range of contemporary issues such as electronic commerce telecommuting privacy virtual community

digital surveillance and the possibility of sovereign governance in an age of global networks Ultimately Barney argues that instead of placing power back in the hands of the public a networked economy seems to exacerbate the worst features of industrial capitalism and in terms of the surveillance and control it exerts reduces our political freedom Of vital interest to politicians communicators and anyone concerned about the future of democracy in the digital age Prometheus Wired adds a provocative new voice to the debate swirling around the Net and the ways in which it will or will not change our political lives

International Handbook of Educational Policy Nina Bascia, Alister Cumming, Amanda Datnow, Kenneth Leithwood, David Livingstone, 2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over fifty chapters written by nearly ninety leading researchers from a number of countries It is organized into five broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them The serendipity within chapters with respect to jurisdictional particularities and contexts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and governance improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding finally with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy
