Energy Abstracts for Policy Analysis, 1989 Commodity and Resource Policies in Agricultural Systems Richard E. Just, Nancy Bockstael, 2012-12-06 Agricultural natural resource and environmental problems are becoming increasingly interdependent For example soil erosion is largely determined by agricultural land use Both water use and water contamination depend on land use and technology choice in agriculture In many areas the fertilizers and pesticides used in agriculture are major pollutants of ground and surface water having adverse effects on drinking water and fisheries Agricultural pollutants such as pesticides also produce adverse health effects for agricultural workers and the consuming public On the other hand the availability of water resources and the value of competing land uses influence agricultural production Additionally regional air quality problems may affect crops and global environmental trends may have long term implications for farming Agriculture natural resources and environmental quality are all heavily regulated in the U S but they are done so by a vast array of competing or unrelated agencies within the U S Departments of Agriculture Interior and Commerce the Environmental Protection Agency and numerous state agencies Considering the large number of bureaucratically remote public agencies involved and the pervasive interdependencies between agriculture natural resources and the environment policies develop which are at best uncoordinated and at worst conflicting and counterproductive These policies have become sources of controversy as different interest groups struggle to affect their implementation as different agencies have fought for administrative control and as legislative bodies have attempted to enact piecemeal changes

Productivity Effects of Cropland Erosion in the United States Pierre R. Crosson, 2016-03-17 In the 1970 s agriculture in the United States seemed to be booming With an extra demand for crops extra acres were taken on to increase production which was predicted to increase further with an ever growing population However concerns were beginning to be raised over the adequacy of land for crops as potential croplands began to be converted into urban areas as

well as the effects of soil erosion decreasing the quality of these croplands Originally published in 1983 this study investigates the threats to crop productivity in the U S with a focus on human made problems This title will be of interest to students of environmental studies *Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for 1997* United States. Congress. House. Portney,2016-03-17 This volume offers an objective view of some of the most critical issues in natural resources Written in nontechnical language it uses ideas drawn from economics to look at the issues examine how government laws and policies have caused some of them arise and to find ways in which problems can be lessened Originally published in 1982 this is a valuable resource for students interested in environmental studies and public policy **Alternative Agricultural and Food Policies and the 1985 Farm Bill** Gordon C. Rausser,Kenneth R. Farrell,2016-03-17 In 1985 the U S Congress confronted the difficult and complex task of developing a 5 year omnibus legislation allowing for lower commodity prices But policies predicated on the concept of agriculture as a unique sector of the economy became less and less appropriate to the highly interdependent open agricultural economy throughout the 1980s First published in 1985 this collection of 16 papers and related discussions contained in these proceedings is an important contribution toward understanding the issues options and dilemmas in U S agricultural policy This is an ideal title for students interested in environmental studies agriculture and national policy *Science in the Mission Agencies and Federal Laboratories* United States. Hutchinson,Antoinette Paris-Greider,2002-07-17 This reference provides the groundwork tools and terminology required when conducting specialized searches for information and resources pertaining to traditional and emerging fields of agriculture The editors present 16 contributions from librarians and other information workers that offer information on research resources across the academic a **Aesthetics and the Environment** Allen Carlson,2005-08-08 First book by the world leading authority on the subject Carlson is respected worldwide by both environmentalists and philosophers The topic has a growing following among geographers planners and environmentalists as well as philosophers of aesthetics crossing over many markets **Role of Educational Institutions in Helping to Alleviate World Hunger** United States. Congress. House. Select Committee on Hunger,1984 **Adaptation and Resilience** Bonnie G. Colby,George B. Frisvold,2012-06-25 In America s arid southwest climate change will occur in the context of already keen competition for

water for agriculture urban growth electricity generation water based recreation and environmental protections This book explores the challenges that climate change and variability pose for water and energy managers and users communities and policy makers in the arid Southwest and demonstrates the application of economic methods to address these challenges It provides valuable tools for both those interested in resource management and climate change and those seeking to understand how economic methods can be used to analyze contemporary social problems and craft appropriate responses The book considers both adaptation to long term climate change and more immediate issues of water and electricity management in the face of inter annual climate variability and drought Thus no matter what one s perspective on long run climate change projections the book provides useful lessons for some of the region s most pressing resource management problems

The Vanishing Farmland Crisis John Baden,2021-10-08 Newspapers seem to be telling us that every cornfield is threatened by a Dairy Queen This media barrage about the crisis of our shrinking farmland can be traced to the 1979 publication of *Where Have All the Farmlands Gone* by the National Agricultural Lands Study The NALS report to which eleven federal agencies contributed argued that land use planning and control must be employed to protect valuable farmland from urban sprawl This volume a collection of essays by a distinguished group of economists including Theodore W Schultz Julian L Simon and Pierre Crosson takes issue with the belief that croplands need governmental protection In opposition the collection as a whole supports two theses 1 shrinking farm acreage is not a serious problem and 2 individual choices by landowners in a market setting result in better organized land use than would governmental land use planning and regulation Published for the Political Economy Research Center Bozeman Montana

Food Security In The United States William B. Lacey, Lawrence M. Busch,2021-01-07 Despite the fact that every year it produces a larger surplus of agricultural products than any other country in the world the U S still must contend with a number of important but often unaddressed issues related to food security including problems of soil erosion water supply energy availability nutrition farm worker health and safety and product distribution This book containing contributions from authorities in both the natural and social sciences expands the range of issues pertinent to the security of the U S food system taking into account the adequacy and sustainability of the food supply equity in access to food by the entire population the nutritional quality of food and the costs and benefits social economic and health of the food system as it is presently organized Each of the authors considers an aspect of U S food security from the point of view of a specific discipline as well as in terms of broader policy implications
