Resource Sharing New Technologies As A:

The Future of Resource Sharing Shirley K. Baker, Mary E. Jackson, 2019-12-06 This book first published in 1995 addresses the key issue facing libraries on how to survive in an age of interdependence Increasingly individual libraries must act as if each is part of a world library Instead of being self sufficient each library from the small public library to the large research library must find ways to put materials from this world library into the hands of its patrons and must stand ready to supply materials from its own collection to others both quickly and cost effectively through interlibrary loan It explores the critical questions for making resource sharing work with particular emphasis on interlibrary loan Cooperative collection development economic decision models consortial arrangements copyright dilemmas and the possibilities of technology are explored and a national project to revamp interlibrary loan and document delivery is described and future directions posited Authors present historical perspective explore the future and report from multiple perspectives **Impact of Technology**

on Resource Sharing Thomas C Wilson, 1993-04-29 Here is an outstanding critical analysis of the impact groundbreaking technologies both new and established have had on resource sharing in the information industry It offers a unique opportunity to explore the possibilities of resource sharing in the electronic information age beyond the narrow scope of interlibrary loan This highly selective book not only assesses the technologies that have had a profound impact on resource sharing it also considers the political philosophical social financial legal managerial and attitudinal issues they have affected Technologies that hold great promise for revolutionizing interlibrary cooperation on various levels have been included in this important analysis Impact of Technology on Resource Sharing fosters an in depth understanding of these technologies by including chapters that range from descriptive analyses of particular projects to philosophical discussions of the challenges of change It questions traditional assumptions while providing an opportunity to examine the practical technological options available to libraries today and in the near future This thought provoking book introduces beginning level library professionals to the changes technological innovations have caused in resource sharing For more advanced professionals it is a valuable review of several areas of technology and resource sharing including CD ROM union catalogs collection analysis using the OCLC AMIGOS CD local integrated systems national bibliographic databases utilities large scale system interconnection Z39 50 Internet NREN networking high schools political social impediments to resource sharing financial issues of resource sharing history of library networking Public service technical service and systems librarians will gain a better understanding of technical issues in language that is easy to understand Library administrators will benefit from the review of issues important to the management and decision making process for the future of interlibrary cooperation and sharing Resource Sharing Today Corinne Nyquist, 2014-07-22 Budget constraints challenge collection development in unprecedented ways Collection development has increasingly become a cooperative effort among libraries in geographic proximity When their own library doesn't have certain books or journals users turn to interlibrary loan to obtain the

resources they need However many library science degree programs don t cover interlibrary loan Resource Sharing Today is a practical guide to resource sharing starting with the library across town and ending with libraries on the other side of the globe Chapters cover everything from the ALA s interlibrary loan form to successful innovations such as Virginia Tech s ILLiad to New York s IDS Information Delivery Service Appendices include regional state national and international ILL codes ALA and IFLA forms open access agreements and purchase on demand plans Consortium Approach to Resource Sharing in an E-Environment Y.M. Patil,2014-01-01 The book deals with resource sharing through consortium approach During 1990s due to journals crisis emergence of scholarly electronic publishing shift in print form to electronic version escalation of costs of journals all have compelled library professionals to move towards a strategic relationship in forming consortium by taking advantage of emerging new technologies To begin with resource sharing is briefed covering library cooperation Emergence of electronic publishing has facilitated subscription to e journals access and delivery mechanisms With proliferation of e resources constraints of copyright laws and licensing library consortia have emerged with a sole aim of moving from organizational self sufficiency to a collaborative survival mode There are several consortia types models at organization level types of libraries participating and parent organizations depending upon coverage of subject areas and purpose of coming together The very purpose of consortia is to deal with pricing and licensing by means of negotiations and strike a deal suitable for stakeholders With growth of different consortia in a country or region it is desirable to coordinate all such efforts and look for National Consortium and go for National Site Licensing Publishers were also providing bundled or big deal offers which could solve journals crisis but not budget constraints as faced by libraries With experience gained in forming consortia library professionals also gained enough skills for negotiations which bring about win win situation to all stakeholders In order to implement consortia activities it is required to have minimum infrastructure including access to Internet e mail service IP addresses networking archiving etc Also the consortia should have some standards protocols such as COUNTER SUSHI and SERU to run activities effectively It is also important to look into archiving needs of consortia on a long term basis as publishers perpetual access suffer from trust factors as a result of which some international agencies have emerged It is also worth looking for consortia migration and merger in order to make better use of available information and enhance consortia interests on a much larger scales There have been concerted efforts in India in forming consortia and a brief of each consortium is given followed by experiences gained which created confidence and strength to run consortia on a sustainable basis **Impact of Digital Technology on Library Collections and Resource Sharing** Sul H.

Resources Anytime, Anywhere Ryan Litsey,2017-05-29 University campuses and their academic libraries are increasingly

interconnected A major sign of this is the transformation of interlibrary loan into resource sharing The emergence of resource sharing has brought with it new challenges for the university library These challenges can be overcome and the university library can emerge a stronger institution more connected with the patrons and community it serves To accomplish this transformation libraries need to learn from the past in order to take a leading role in developing future technology to meet the needs of their patrons Resources Anytime Anywhere explores the transformation of interlibrary loan into resource sharing by looking at the ideas that have motivated the library developed technologies that have changed the way resource sharing is conducted Resources Anytime Anywhere illustrates how academic libraries can take an active role in developing technology to meet the needs of their patrons Through designing our own products and sharing them with other libraries we can join the lessons of the past with the technology of today to create a more interconnected library that can meet the future needs of library patrons Describes the theoretical underpinnings of interlibrary loan Explores how interlibrary loan has evolved to resource sharing Presents new ways of organizing and developing resource sharing staff Examines the technological developments within resources sharing Reconsiders the idea of collaboration and cooperation among libraries Considers new innovative technologies that can transform how resource sharing is conducted Provides recommendation and future directions of how libraries can apply these methods at their institution Resources in Education ,1997
