Resource Regimes Oran R. Young, Young Oran R, 1982-01-01 **International Cooperation** Oran R. Young, 1989 The notion of regimes as institutions that shape international behavior has received much attention from scholars in the field of international relations as a way of understanding how sovereign states secure international cooperation Oran Young here seeks both to develop our theoretical grasp of international regimes and to expand the range of empirical applications of this line of analysis

Unequal Alliance Robin Broad, 1988-04-06 In this seminal work U S development specialist Robin Broad chronicles the Philippine experiment with the structural adjustment model of development espoused by the World Bank and the International Monetary Fund

The Power of Ideology Emanuel Adler, 2024-06-21 In this prodigiously researched book Emanuel Adler addresses the hotly contested issue of how developing nations can emerge from the economic and technological tutelage of the developed world Is the dependence of Third World countries on multinational corporations especially in the realm of high technology a permanent fixture of an inherently unequal relationship Or can it be managed by the developing nations for their benefit By a masterful comparative study of the development of science and technology in Argentina and Brazil the author discusses governmental policies that are effective in attaining autonomous technological development Professor Adler provides a useful corrective to the structural theories of development that have up to now prevailed in the study of international relations by demonstrating that intellectual and technological elites play a far more significant role in the success or failure of such governmental policies than has hitherto been recognized This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988

From Marshall Plan to Debt Crisis Robert E. Wood, 2024-07-26 This book traces the evolution of concessional financing to Third World countries from its postwar origins in the Marshall Plan to the debt crisis that engulfed virtually the entire Third World in the early 1980s It documents the evolution of a system of aid provision of structured access to concessional external financing The central focus is on how this structure of access to aid has changed over time and shaped development options and choices in the Third World From this perspective the emergence of the debt crisis is closely connected to the role of aid in the world economy Although the debt crisis had other roots as well this book elucidates an important set of determinants generally overlooked within the systems of aid provision itself It further seeks to show that the debt crisis defines a new era not simply

a set of discrete and extraordinary events between say Mexico's request for rescheduling in August 1982 and Argentina's coming to terms with the International Monetary Fund in September 1984. The debt crisis has profoundly altered the international environment that Third World countries face and the legacy of debt will continue to be a central focus of international relations and development choices for years to come. Driving a Bargain Richard F. Doner, 2023-11-15. *Driving a Bargain: Automobile Industrialization and Japanese Firms in Southeast Asia* explores the dynamics between developing nations and foreign investors in the context of automobile manufacturing. Focused on Southeast Asia, the book analyzes the national efforts of the Philippines, Malaysia, Indonesia, and Thailand to establish domestic automobile industries. These countries have pursued policies aimed at reducing dependency on foreign imports and building local manufacturing capacities. By examining the interactions between ASEAN countries and largely Japanese auto firms, the study highlights the challenges and opportunities these nations face in negotiating technology transfer, market access, and industrial autonomy. The book presents a critical examination of the bargaining processes that shape these countries' industrialization strategies. Through comparative case studies, the book challenges prevailing theories of foreign investment and dependency. It critiques the structuralist approach to bargaining, arguing for a more nuanced understanding of local leverage in manufacturing industries. The study highlights the significance of local firms, the role of the state, and the political and economic conditions that determine bargaining success. By exploring the interplay between the private sector and government in ASEAN nations, *Driving a Bargain* offers new insights into the potential for developing countries to increase their manufacturing capacity and achieve economic growth through strategic partnerships with foreign firms. This work also contributes to the broader development literature by emphasizing the importance of public-private coalitions in fostering sustainable industrial development. Regime Consequences A. Underdal,Oran R. Young,2013-06-05 This volume has a long and distinguished pedigree It is the product of an effort to devise clear and unambiguous methods for demonstrating that international regimes make a difference stretching back at least to the early 1990s What has transpired in the meantime is the development of a suite of useful techniques of analysis rather than the creation of a single correct methodology for use in this field of study Our assumption is that we can be relatively confident regarding assessments of the consequences of individual regimes when those employing a variety of methods converge on the same conclusions When different methods yield divergent conclusions on the other hand we can take this as a signal that more work is needed to arrive at convincing judgments regarding the consequences of the regimes in question Along the way we came to understand that there is an important distinction between what we describe in this book as simple effectiveness and broader consequences Most analyses of the effectiveness of international regimes focus on individual cases and seek to assess the performance of regimes on a case by case basis This is entirely understandable Yet it is now clear that individual regimes not only interact with one another but also operate in and affect broader settings The study of these broader consequences is less mature than research on the effectiveness of individual regimes

Water and Power Miriam R. Lowi,1995-10-26 Why do states in arid regions fail to co operate in sharing water resources when co operation would appear to be in their mutual interest Through in depth analysis of the history and current status of the dispute over the Jordan River basin Miriam Lowi explores the answers to these critical questions

Environmental and Natural Resources Economics Steven Hackett,Sahan T. M. Managing Political Risk Assessment Stephen J. Kobrin, 2024-03-29 The accurate assessment of political risk can make the difference between success and failure for a multinational corporation which must keep corporate objectives in sight while operating in a large number of widely varying environments While environmental or political risk assessment has become an explicit function in many firms and is inherent in all foreign investment the uncertainties of foreign political environments continue to pose critical problems for managers In *Managing Political Risk Assessment* Stephen J Kobrin describes and analyzes the techniques of political risk assessment employed by U S multinationals His analysis draws on organizational theory economics political science and international relations The study reveals that those charged with political risk assessment have often not been fully integrated into the core of the managerial process information from subsidiaries is often biased and the flow of data is poorly controlled As a result virtually all firms experience difficulties in using environmental assessment in planning and making decisions Kobrin persuasively argues that the thorough integration of the assessment function into the managerial process is a necessary step as the need for political risk assessment intensifies with the increased interaction between international business and its social and political surroundings Political scientists institutional economists managers and students and teachers of international business will all profit from Kobrin s excellent synthesis of knowledge in this area of scholarly interest This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982

The Paradox of Plenty Terry Lynn Karl, 1997-10-10 The Paradox of Plenty explains why in the midst of two massive oil booms in the 1970s oil exporting governments as different as Venezuela Iran Nigeria Algeria and Indonesia chose common development paths and suffered similarly disappointing outcomes Meticulously documented and theoretically innovative this book illuminates the manifold factors economic political and social that determine the nature of the oil state from the coherence of public bureaucracies to the degree of centralization to patterns of policy making Karl contends that oil countries while seemingly disparate are characterized by similar social classes and patterns of collective action In these countries dependence on petroleum leads to disproportionate fiscal reliance on petrodollars and public spending at the expense of statecraft Oil booms which create the illusion of prosperity and development actually destabilize regimes by reinforcing oil based interests and further weakening state capacity Karl s incisive investigation unites structural and choice based approaches by illuminating how decisions of policymakers are embedded in institutions interacting with domestic and international markets This approach which Karl dubs structured contingency uses a state s leading sector as

the starting point for identifying a range of decision making choices and ends by examining the dynamics of the state itself

The Paradox of Plenty Terry Lynn Karl, 1997-10-10 In these countries dependence on petroleum leads to disproportionate fiscal reliance on petrodollars and public spending at the expense of statecraft **Toward a Sustainable Whaling Regime**

Robert Friedheim, 2016-06-01 Toward a Sustainable Whaling Regime **The Anthropology of Conservation NGOs** Peter Bille Larsen, Dan Brockington, 2017-08-30 This book explores how NGOs have been influential in shaping global biodiversity conservation policy and practice It encapsulates a growing body of literature that has questioned the mandates roles and effectiveness of these organizations and the critique of these critics This volume seeks to nurture an open conversation about contemporary NGO practices through analysis and engagement **High-Tech Europe** Wayne Sandholtz, 2024-07-26

Governments have recognized for decades the dynamic role played by microelectronics computers and telecommunications in the modern economy Although Europe's deficiencies in these crucial sectors had long been acknowledged it was not until the 1980s that European nations began collaborating to develop and promote high tech industries Their collaboration gives rise to many questions Why for example did the joint efforts come at such a late date rather than in the 1960s or 70s And how is it possible to work together in economically sensitive areas These questions point to fundamental issues in the areas of international cooperation international institutions and technology policy Before the institution of the collaborative programs ESPRIT European Strategic Programme for Research and Development in Information Technology RACE R D in Advanced Communications technologies in Europe and EUREKA European Research Coordination Agency in the 1980s each European country sought its own technological renaissance through protection of national firms behind walls of technical standards procurement preferences and research subsidies This thorough carefully researched work examines the breakdown of these walls It will appeal to political scientists economists and scholars of technology and Western Europe interested in the political contours of the high tech landscape This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992
