Resource Based Industrialization Sowing The Oil In Eight Developing Countries:

Resource-based Industrialization Richard M. Auty, 1990 This book is the first cross country analysis of resource based industrialization RBI a controversial industrialization strategy favored by developing countries in the 1970s It examines the expectations and the actual experience of RBI in the oil exporting countries Bahrain Cameroon Indonesia Malaysia Nigeria Saudi Arabia Trinidad and Tobago and Venezuela Auty shows that these countries underestimated the risks associated with RBI s large capital intensive projects and that many RBI plants were poorly implemented and became uncompetitive when prices fell below forecast levels However Auty argues given its long gestation period and link to volatile energy markets RBI does have considerable long term potential provided conditions of financial restructuring and macro and micro economic efficiency are met Scholars and students in development economics and advisers and consultants in and to developing country governments will find this important analysis covers a variety of country sizes and efficiency constraints offering a broad range of examples of RBI Oil Exporters' Economic Development in an Interdependent World Jahangir

Amuzegar, 1983-04-06 Not unpredictably there is a complex energy bind as we approach the end of the twentieth century The oil importing industrial countries have anchored their industries their means of transportation their home comfort in short their whole energy dependent lifestyle largely to hydrocarbon fuels *The Lives of Extraction*, 2023-11-13 The frontiers of extraction are expanding rapidly driven by a growing demand for minerals and metals that is often motivated by sustainability considerations Two volumes of International Development Policy are dedicated to the paradoxes and futures of green extractivism with analyses of experiences from five continents In this the first of these two volumes 16 authors offer a critical and nuanced understanding of the social cultural and political dimensions of extraction The experiences of communities indigenous peoples and workers in extractive contexts are deeply shaped by narratives imaginaries and the complexity of social contexts These dimensions are crucial to making extraction possible and to sustaining its expansion but also to identifying possibilities for resistance and to paving the way for alternative post extractive economies This volume is accompanied by IDP 16 *The Afterlives of Extraction Alternatives and Sustainable Futures* Dictators, Democrats, and Development in Southeast Asia Michael T. Rock, 2017 An examination of how dictators and democrats in Indonesia Malaysia and Thailand built and sustained pro growth political coalitions **Timber Booms and Institutional Breakdown in**

Southeast Asia Michael L. Ross, 2001-01-08 Scholars have long studied how institutions emerge and become stable But why do institutions sometimes break down In this book Michael L. Ross explores the breakdown of the institutions that govern natural resource exports in developing states He shows that these institutions often break down when states receive positive trade shocks unanticipated windfalls Drawing on the theory of rent seeking he suggests that these institutions succumb to a problem he calls rent seizing the predatory behavior of politicians who seek to supply rent to others and who purposefully dismantle institutions that restrain them Using case studies of timber booms in Indonesia Malaysia and the Philippines he

shows how windfalls tend to trigger rent seizing activities that may have disastrous consequences for state institutions and for the government of natural resources More generally he shows how institutions can collapse when they have become endogenous to any rent seeking process *The Indonesian Production Sharing Contract:An Investor's Perspective* Tengku Nathan Machmud,2000-07-12 The model contract for oil and gas development known as the Production Sharing Contract PSC originated in Indonesia in 1966 and enjoyed over a decade of successful implementation with minor adjustments in several oil producing countries In more recent years however numerous problems have arisen as changes in economic realities have driven the level of private investment down This penetrating study the only one of its kind uses legal analysis as well as historical data to pinpoint the reasons for the initial success of the PSC and for its subsequent and persistent frustrations for investors The author first examines the original Indonesian contract along with the variants adopted in Malaysia and the People s Republic of China and then proceeds to an in depth analysis of the main clauses and their amendments and execution in all three countries Taking into account various commissioned surveys and emerging policies and strategies espoused by both governments and industry representatives he concludes with a detailed proposal for an overhauled contract that allows for meaningful adjustments or even renegotiation when the balance of interests between parties changes substantially Focusing as it does on some central issues in global economic development The Indonesian Production Sharing Contract will be of great value to lawyers multinational corporate executives and policymakers far beyond the Asia Pacific region *Environmental Resources* A.S. Mather,K. Chapman,2018-10-08 *Environmental Resources* provides a comprehensive text for undergraduate resource management courses It begins with an introduction to natural and environmental resources and then considers them in the context of politics time and space *Sustaining Development in Mineral Economies* Richard Auty,2002-09-26 This highlights the drawbacks of possessing natural mineral resources These can quickly become a curse on the ore exporting economies of developing countries leading to drainage of resources and the faltering of long term growth **Development Strategies and Inter-Group Violence** William Ascher,Natalia Mirovitskaya,2016-01-12 Although many scholars and practitioners recognize that development and conflict are intertwined there is much less understanding of the mechanisms behind these linkages This book takes a new approach by critically examining how various development strategies provoke or help prevent intrastate violence based on cases from all developing regions *Engineering Earth* Stanley D. Brunn,2011-03-19 This is the first book to examine the actual impact of physical and social engineering projects in more than fifty countries from a multidisciplinary perspective The book brings together an international team of nearly two hundred authors from over two dozen different countries and more than a dozen different social environmental and engineering sciences Together they document and illustrate with case studies maps and photographs the scale and impacts of many megaprojects and the importance of studying these projects in historical contemporary and postmodern perspectives This pioneering book will stimulate interest in examining a variety of both social

and physical engineering projects at local regional and global scales and from disciplinary and trans disciplinary perspectives

Oil and Governance David G. Victor, David R. Hults, Mark C. Thurber, 2011-12-08 National oil companies NOCs play an important role in the world economy They produce most of the world's oil and bankroll governments across the globe Although NOCs superficially resemble private sector companies they often behave in very different ways Oil and Governance explains the variation in performance and strategy for NOCs and provides fresh insights into the future of the oil industry as well as the politics of the oil rich countries where NOCs dominate It comprises fifteen case studies each following a common research design of NOCs based in the Middle East Africa Asia Latin America and Europe The book also includes cross cutting pieces on the industrial structure of the oil industry and the politics and administration of NOCs This book is the largest and most systematic analysis of NOCs to date and is suitable for audiences from industry and academia as well as policymakers

Handbook of Sustainable Development Giles Atkinson, Simon Dietz, Eric Neumayer, Matthew Agarwala, 2014-09-26 This timely and important Handbook takes stock of progress made in our understanding of what sustainable development actually is and how it can be measured and achieved

Corporate Sustainability in Africa Samuel Adomako, Albert Danso, Agyenim Boateng, 2023 This book addresses empirical theoretical and policy perspectives in its examination of the development of sustainability management of African firms Documenting cases of sustainable activities across Africa and accelerating knowledge about the opportunities and challenges facing firms operating in Africa the chapters examine various aspects of sustainability and sustainable entrepreneurship innovations in the African context The authors seek to shed light on how African nations can be positioned to meet the 2030 Sustainable Development Goals as well as the innovative strategies necessary to improve sustainability practices of African firms for greater success With guidance for scholars and policymakers this book will serve as a valuable resource providing readers with an up to date and contextual understanding of sustainability practices drivers and challenges in Africa Samuel Adomako is Associate Professor of Strategy at the Birmingham Business School at the University of Birmingham UK Albert Danso is Associate Professor of Accounting and Finance at the Leicester Castle Business School at De Montfort University UK Agyenim Boateng is Professor of Finance and Director of Finance and Banking Research Centre at the Leicester Castle Business School at De Montfort University UK

Bringing in the Future William Ascher, 2009-10-15 Humans are plagued by shortsighted thinking preferring to put off work on complex deep seated or difficult problems in favor of quick fix solutions to immediate needs When short term thinking is applied to economic development especially in fragile nations the results corruption waste and faulty planning are often disastrous In Bringing in the Future William Ascher draws on the latest research from psychology economics institutional design and legal theory to suggest strategies to overcome powerful obstacles to long term planning in developing countries Drawing on cases from Africa Asia and Latin America Ascher applies strategies such as the creation and scheduling of tangible and intangible rewards cognitive exercises to increase the understanding of longer term consequences

self restraint mechanisms to protect long term commitments and enhance credibility and restructuring policy making processes to permit greater influence of long term considerations Featuring theoretically informed research findings and sound policy examples this volume will assist policy makers activists and scholars seeking to understand how the vagaries of human behavior affect international development Development Theory and the Economics of Growth Jaime Ros,2001

Why are some countries richer than others Why do some economies grow so much faster than others do Do economies tend to converge at similar levels of per capita income Or is catching up simply impossible These questions have vast implications for human welfare After a period of lack of interest in growth theory they are back on the research agenda of mainstream economics They have also been at the heart of development economics since its inception some decades ago This book endeavors to answer such questions by blending classical contributions to development theory with recent developments in the economics of growth The unifying theme is that early theoretical insights and accumulated empirical knowledge of development economics have much to offer to research in the theory and empirics of economic growth With the help of a number of recent contributions the ideas and insights of the classical literature in development economics can be given simple and rigorous formulations Together they amount to an approach to growth theory that can overcome the long recognized empirical shortcomings of neoclassical growth economics while being free from the objections that can be raised against the new brand of endogenous growth theory In addition to an original thesis on the contribution that early development theory can make to the research program of modern growth economics the book provides professional and research economists and graduate students with an evaluation of the strengths and limitations of the different strands of inquiry in the modern economics of growth In addition it presents findings on comparative growth performance across countries Jaime Ros is Professor of Economics and Faculty Fellow of the Helen Kellogg Institute of International Studies University of Notre Dame

Environment and Ecology in the History of Economic Thought Vitor Eduardo Schincariol,2024-07-05 This volume proposes a reconsideration of ecological and environmental aspects of the work and ideas of various heterodox authors and traditions in the history of economic thought including the field of economic development Many of the contributors to this book focus on thinkers and works which are not typically considered as part of the ecological sphere while others consider such economists in a new light or domain Thus the book elucidates a new and useful research field of reconsidering ecological dimensions in the traditional history of economic thought as well as helping to delineate alternative views for ongoing debates on ecological themes Did Veblen Keynes Sraffa C Furtado and other key economists and schools of thought of our age have relevant and useful insights with respect to environmental issues Which aspects of their intellectual legacies should eventually be discarded in the face of our new environmental challenges On the contrary what aspects of their economic theories can be updated and adapted to a better interpretation of our present ecological concerns How do they differ and why The essays contained in this book will help to answer these questions by

means of recovering analysing and updating the work of some of the most relevant heterodox economists and schools of thought of our time This book will be of great interest for readers in the history of economic thought ecological economics environmental economics and economic development **A New Era of Transformation in Ghana** Clemens

Breisinger,Xinshen Diao,Shashidhara Kolavalli,Ramatu M. Al-Hassan,James Thurlow,2011-01-01 Several Sub Saharan African nations have experienced increased economic growth and political stability in recent years compared with the stagnation and turmoil of previous decades Ghana is one of the biggest success stories of the region the nation has enjoyed an annual average of five percent economic growth for the past 20 years and will probably be the first Sub Saharan African country to achieve the Millennium Development Goal of cutting poverty in half by 2015 This study examines how Ghana can build on its achievements and possibly serve as a model for other African countries By drawing on existing literature and applying a highly disaggregated dynamic general equilibrium model to Ghana s experiences the authors identify certain necessary factors for further economic development in the country These requirements include continued political stability growth in manufacturing improved domestic services such as transportation and agricultural development that goes beyond past reliance on cash crops such as cocoa to include major staples and livestock This kind of broad based growth will benefit the entire economy thereby reducing poverty The authors analysis provides an economic development strategy for Ghana and possibly other countries in the region to policymakers development specialists and others concerned with Sub Saharan Africa

Evren

Tok,Lolwah R. M. Alkhater,Leslie A. Pal,2016-08-10 This book explores in a series of detailed case studies how public policy is actually made in Qatar While Qatar is a Gulf monarchy its governance is complex Other analysts have tried to come to grips with this complexity using qualified descriptions of the system such as late rentier pluralized autocracy tribal democracy or soft authoritarian The authors of the volume use the lens of a transformative state Qatar is deliberately engaged in a rapid process of radical economic and societal transformation That process has its contradictions and tensions particularly with regards to achieving a balance between Islam social traditions and modernity This book explores how it also has a specific policy dynamic of generating ideas and institutions developing policy and program designs implementation and

coordination **Flexible Crossroads** Roger Hayter, 2011-11-01 British Columbia's forest economy is at a crucial crossroads. Its survival, Roger Hayter argues, rests on its ability to remain flexible and open to innovation; a future by no means assured given recent policy initiatives and the current contested nature of British Columbia's forests. *Flexible Crossroads* looks at the contemporary restructuring of British Columbia's forest economy, demonstrating how both resource dynamics, the transition from old growth to managed forests, and industrial dynamics, changing technology, and global market forces have shaped this transformation. Conceptually, the restructuring is portrayed as a shift from a commodity-based, cost-minimizing production system (Fordism) to a more product-differentiated, value-maximizing production system informed by the imperative of flexibility. The first part of the book provides global and historical perspectives by situating British Columbia's forest economy within the wider context of global industrialization, the history of resource dynamics, and the current shift from Fordist to more flexible systems of production. In the second part, Hayter assesses the extent to which British Columbia's forest economy is enacting this shift by focusing on factors such as foreign ownership, the strategies and structure of MacMillan Bloedel, the role of small firms, trade relations, employment, and labour relations, forest community development, environmentalism, and resource use and innovation policy. *Flexible Crossroads* will appeal to geographers, political economists, and forestry professionals as well as to students of British Columbia's economy and forest economies generally.
