[Source: Papalia (2011), Saerbeck (2013)]

### Physical Development

- Girls retain somewhat more fatty tissue than boys
- Tooth decay remains one of the most common chronic untreated conditions
- Access to proper dental care is important for young children
- Recommended calories per day for schoolchildren 9 to 13 years of range from 1,400 to 2,600 depending on gender and activity level
- Sleep: average of 10 hrs a day
  - Factors that affect children's sleep:
    - ✓ Exposure to media screens
    - ✓ Physical inactivity
    - ✓ Secondhand smoke
    - ✓ Poor housing
    - ✓ Vandalism
    - ✓ Lack of parks and playgrounds
  - Persistent snoring, at least 3x a week, may indicate a child has sleep-disordered breathing, which is linked to behavioral and learning difficulties
- Faster and more efficient information processing and an increased ability to ignore distractions
- The overall volume of gray matter (linked with IQ) increases pre-puberty and declines post-puberty
  - Decline is due to loss in the density of gray matter
  - Gray matter volume peaks 1 to 2 years earlier in girls than boys
  - The loss in density of gray matter with age is balanced by another change - a steady increase in white matter
- Motor Skills continue to improve in middle childhood
  - Children play games during recess which usually involves socialization
  - Boys typically play physically (running), whereas girls loves games that involves verbal expression or counting out loud (jump rope, hopscotch)
  - Rough-And-Tumble Play - wrestling, kicking, tumbling, grappling, and chasing, accompanied by laughing and screaming

- 6-9 year olds need more flexible rules, shorter instruction time, and more free time to practice than older children
- Older children are able to process instruction and learn team strategies
- Body Image (how one believes one looks) becomes important early in middle childhood, especially for girls, which could lead to eating disorders during adolescence (may be influenced by playing unrealistic dolls such as Barbie)
- Causes of obesity:
  - ✓ Overweight parents or other relatives
  - ✓ Peer nutrition
  - ✓ Eating fast food
  - ✓ Sugar
  - ✓ Inactivity
- Acute Medical Conditions - occasional, short-term conditions, such as infections and warts
- Chronic Medical Conditions - physical, developmental, behavioral, or emotional conditions that persists 3 months or more such as asthma and diabetes
- Asthma - chronic, allergy-based respiratory disease characterized by sudden attacks of coughing, wheezing, and difficulty breathing
  - Caused by genetics, smoke exposure, low levels of vitamin D
- Diabetes - one of the most common diseases in school-aged children
  - Characterized by high levels of glucose in the blood as a result of defective insulin production, ineffective insulin action, or both
  - Type 1: result of an insulin deficiency that occurs when insulin-producing-cells in the pancreas are destroyed
  - Type 2: characterized by insulin resistance and used to be found mainly in overweight and older adults
- Hypertension - high blood pressure; children with hypertension are more likely to have learning disabilities and may have problems with executive functioning
- Accidental Injuries are the leading cause of accidental death among school-age US Children

E. Lamb, B. Sutton-Smith, Brian Sutton-Smith, Michael E. Lamb, 2014-01-14 First published in 1982 Since the emergence of developmental psychology early this century theorists and researchers have emphasized the family's role in shaping the child's emergent social style personality and cognitive competence In so doing however psychologists have implicitly adopted a fairly idiosyncratic definition of the family one that focuses almost exclusively on parents and mostly on mothers The realization that most families contain two parents and at least two children has occurred slowly and has brought with it recognition that children develop in the context of a diverse network of social relationships within which each person may affect every other both directly through their interactions and indirectly i.e. through A's effect on B who in turn influences C The family is such a social network itself embedded in a broader network of relations with neighbors relatives and social institutions Within the

family relationships among siblings have received little attention until fairly recently In this volume the goal is to review the existing empirical and theoretical literature concerning the nature and importance of sibling relationships **Handbook of Resilience in Children** Sam Goldstein,Robert B. Brooks,2023-03-09 The third edition of this handbook addresses not only the concept of resilience in children who overcome adversity but it also explores the development of children not considered at risk addressing recent challenges as a consequence of the COVID 19 pandemic The new edition reviews the scientific literature that supports findings that stress hardiness and resilience in all children leads to happier and healthier lives as well as improved functionality across the lifespan In this edition expert contributors examine resilience in relation to environmental stressors as phenomena in child and adolescent disorders and as a means toward positive adaptation into adulthood The significantly expanded third edition includes new and significantly revised chapters that explore strategies for developing resilience in families clinical practice and educational settings as well as its nurturance in caregivers and teachers Key areas of coverage include Exploration of the four waves of resilience research Resilience in gene environment transactions Resilience in boys and girls Resilience in family processes Asset building as an essential component of intervention Assessment of social and emotional competencies related to resilience Building resilience through school bullying prevention Resilience in positive youth development Enhancing resilience through effective thinking The Handbook of Resilience in Children Third Edition is an essential reference for researchers clinicians and allied practitioners and graduate students across such interrelated disciplines as child and school psychology social work public health as well as developmental psychology special and general education child and adolescent psychiatry family studies and pediatrics
